How to FERTILIZE FRUIT TREES -

Here and there on all farms and in most fruit gardens will be seen an oc-

well, and yet seems to have no parti

or the body of a grape-vine. That is just the place where it will do the least good. Nearest the trunk of the

tree, the roots are all large The fi brous roots—the feeders, are further

off near the ends of the roots. These

only can take up the nutriment. It is

always safe to assume that the roots

extend as far from the trunk in every

direction as do the limbs of the tree,

and to properly fertilize, spread the ma-nure all over that area. Then fork it

in and you have done a good work and done it well. If some disease has be-

gun its work on the tree, you will put

the tree in a healthy, vigorous condi-tion, the better enabling it to success-

fully contend against its enemies. We

Baid-Headed Suggestions.

Chicago Telegram.

A baid-headed man is refined, and he always shows his skul-sure.

It has never been decided what causes bald heads, but most people think it

is dan'd rough.

A good novel for bald heads to read

"The Lost Heir."

What does a bald-headed man say

to his comb? We meet to part no Motto for a bald-head-Bare and fur-

However high a position a bald-headed man holds, he will never comb lown in the world. The bald-headed nan never dyes.

Advice to bald-headers-Join the Indians, who are the only successful hair-raisers.

What does every bald headed put on his head? His hat.

You never saw a bald-headed

with a low forehead.

Shakspear says—There is a divinity that shapes our ends.

Bald men are considered the coolestneaded men in the world.

It was perfectly bear-berons in the forty wicked children to salute the white-pated Elijah with the taunting remark, "Go up, thou bald-head."

A bald head is eloquently suggestive

of premature piety.

Ice cream and chocolate caramels are

Bald headed eagles are natives of the Bald mountains. Never go after a man, or woman either in a "perfectly bald-headed fash-

gallery gods as he sat in a front row enjoying the ballet will rejoice to know that the day of his deliverance is at hand. The *Telegram* has heard of a party who has invented a wonderful foul weeds in the pasture, and he is hair restorative, warranted to cover the baldest head with a thick growth of glossy hair in only seventy-two hours. The remedy is said to be extracted from the inner bark of the mesquite tree. The restorative produces different shades of bair. In order to avoid answering numerous queries, we realize the pertinence of saying that we do not know the name of this preparation, or the address of its inventor

#### Cured with Snake Venom.

A RATTLESNAKE'S PANGS DRAWN UPON TO BAFFLE A CASE OF LOCKJAW.

The last number of the Philadelphia Medical News contains a recital of a successful experiment with snake venom as a curative for tetanus by Dr. A. O. Ameden, of Glens Falls, N. Y. Being in a locality in which the rattle-snakes were fearfully numerous, and

oration of the tetanic spasms and rigidity, which entirely ceased at the end of ten hours, and the patient enjoyed a quiet sleep of six hours duration.

Twenty hours after the insertion of the great many poison, however, rigidity with slight pasme again came on. A second introduction of the venom was made as before, and no further trouble with tetanus was experienced, and the patient made a fairly rapid recovery. But extreme prostration followed the last introduction of venom, which necessitated active alcoholic stimulation as in all cases of accidental snake poisoning. There was no diffuse inflammation from the wounds, as frequently happens when persons are bitten in the limbs lieve that this snake venom, which has been propererly called 'crotaline,' can be used with comparative safety, and may yet prove to be a valuable

## How Accidents Run in Streaks.

Accidents, like murders, suicide and rimes of all sorts, run in streaks. The

Steamship accidents furnish a notable illustration. Everybody remem-bers the series of mishaps that befell the steamers of a French transatlantic line some eight or ten years ago with-out fault of management, and the sub-sequent streaks of ill luck that over-took German and English steamers after periods of absolute security on the ocean ferry. What New Yorker has forgotten the summer of the Seawahaka's burning, with its amazing record of sound steamers wrecked by fire or accident?

"There are four battles in our business." remarked a dry-goods merchant.
"The first battle is to secure consignments from desirable manufacturing houses; the second to provide the money with which to make advances on those consignments; the third, to sell the goods after they have been consigned; and the fourth, to get the pay for them. And the hardest fight of all is the first—to obtain the right consignments. Any fool can sell goods that everyholds wants to buy, but it requires everybody wants to buy, but it requires a judgment to have on sale the goods that the public most wants.

CREAM TOAST.—Cut stale bread half an inch thick and dip them in sweet cream. Fry a delicate brown in but

Feeding Turnips.

Feeding turnips to milking cows is objected to on account of the ill flavor communicated to the milk, and which spoils it for any good use, but it is not necessary that this ill flavor should be

given to the milk. It is caused by the very volatile odor of the roots, which is absorbed by the stomach, and then by the blood, and lastly by the milk. A large part of it is carried off by the perspiration through the skin and a large part through the kidneys. The reason of the rapidity of this effect of feeding turnips is the large proportion of water which they contain, and that the water is very quickly absorbed by the blood and dispersed through the system, and as quickly got rid of through the skin and the kidneys. It is precisely the same with onions, gar-lic and other strong flavored weeds, and also with impure water. But this

very rapid transpiration of the water gives a clue to a ready means of avoid-ing the objectionable effect referred to. If turnps are fed immediately after milking, night and morning, the odor passes off and does not affect the next morning. It is not safe to feed them before milking, unless done immediate ly before, as water is absorbed from the stomach into the blood with great rapiof premature piety.

Ice cream and chocolate caramels are the leading precedents of incipient baldness.

dity, and the odor would begin to reach the milk in a few minutes. The odor of garlic may be prevented—it is said—in somewhat the same manner, but we have not personally tried the effect for want of the garlic. But it is so reported by the dairyman who says he was troubled with the smell of garlic or wild onion in his milk. To obviste The bald are always truly good.

This accounts for Ben Butler having about three o'clock each afternoon, and this he put the cows in the stable at demonstrated himself such an exemplary Governor.

The venerable bald-head who has so
long been the target for the wit of the
pass off in the other secretions, though

#### The Use of Coal Ashes

We see the question often asked What is the use of coal ashes? The uestion has never been satisfactor answered." This is a mistake. It has. As a manurial agent they are of no perceptible value. As an agent in loosening heavy soil they are of value. We have experimented with them for a number of years, and that is about all that we can make of them. We ap plied some years ago, about two inches of the ashes all over the garden, the soil of which was rather heavy, and they had a direct tendency to make it more friable. Their presence was ob-servable for several years; but that they acted in any degree as a fertilizer we could not discern, nor do we believe they did. The best use to make of coal having previously given some thought to the subject, Dr. Ameden resolved to make the test.

"Availing myself of the services of an experienced snake catcher," he says, better, or so good, for these purposes. "I soon obtained venom fresh from the They are dry five minutes after a rain fangs of one of the reptiles; with this I and never become actually soft, even moistened the point of a hypodermic in a thaw, which causes a gravel way syringe and inserted it beneath the cusurfaced with them and thoroughly rolled will not requre half as much cleaning as those where either gravel or

> We see coal ashes recommended for act as a manure, as a protector against insects, and so on; but we do not believe they have any more effect than so much road dust or any fine dry

## A Paying Poultry Farm.

A poultry farm of 8,000 Plymouth Rocks is owned and carried on by A. C. Hawkins at Lancaster, near Boston, Massachusetts. He calculates to have by these snakes, and no other results over about 2,500 laying hens through that would deter me making a second the winter. At the present time he experiment in the same manner. I am has 12,000 including all sizes. His about 8,000 fowls every fall and carries of the opinion that the second in farm contains twenty-five acres, and sertion of the venom was too much, his poultry buildings occupy an acre and might have been withheld. I besouth slope of a hill, and comprise six or seven sheds 200 feet in length. Each shed is divided into apartments of 12 by 20 feet, and about twenty five hens remedial agent in tetanus, and possibly are kept in each division. A yard is in some other spasmodic diseases." made in front of each apartment, so that the members of each are by themselves. Mr. Hawkins believes that if confined poultry have all their wants attended to, they will do as well in egg-production as if allowed free range. He bases this belief upon several tests. senomenon is as early experience as it is apparation, except on the philosopher's theory that there is in all things appertaining to life a wave-like motion, like the regular swinging of the pendulum of a clock, which in itself is one of the unfathomable mysteries of existence, dimly discovered but beyond the firm grasp of the human intellect.

To the case of suicide and violent at any prices are large, about ninety per cent. being profit. He also has a standing order for sixty to ninety dozens of eggs daily, for which he gets the highest market price. Mr. Hawkins began at the age of twenty one with 100 hens, and by careful management and economy his business has entered at the age of twenty handsome incompany that at the age of twenty handsome incompany that at the age of twenty handsome incompany the possible of explanation, except on the philosopher's theory that at the age of twenty handsome incompany the possible of explanation, except on the philosopher's theory that there is in all things appertaining to life a wave-like motion, like the regular swinging of the best many prices for eggs and poultry, and his sales of fowls an explanation, but it can be applied to a coldents as little as to fires, which exhibit the same gregarious tendency. "It larged, so that at the age of twenty-never rains but it pours," is the state-nine he has a very handsome income. The manure from the poultry is quite the same and experience common to all at \$1.50 a barrrel.—Cultivator.

## How to tell Good Butter.

Mr. Robert Hall, an Ohio butter inspector, says that where butter is properly churned, both as to time and to temperature, it becomes firm with very little working, and it is tenacious; but its most desirable state is waxy, when it is easily modeled into any shape, and may be drawn out a considerable length without breaking. It is then styled gilt-edge. It is only in this state butter possesses that rich nutty flavor and smell, and shows up a rich golden yellow color which imparts so high a degree of pleasure in eating it, and which increases its value many fold. It is not always necessary, when glistening cream-colored surface shows its height of cleanliness. It may be necessary at times to use the trier, or even use it until you become an expert in testing by taste, smell and rub-

Young Mr. Brown was making at ter. Serve plain at breakfast or spread with any kind of jam or jelly and use for desert.

Wipe your pen after using, and it will last the longer. Remember, a pen is saved, a pen is earned.

Young Mr. Brown was making an evening call, when his best girl's little brother approached him and begged the loan of his whistle. "Whistle?" skinnel and sliced make a very pretty salad if mixed in layers with hard-boiled eggs. They should be seasoned with pepper, salt and butter, and a little vinegar or lemon juice.

Household Aids.

To prevent a door from creaking apply a little soap in the hinges.

To clean steel, rub the article with a piece of wash-leather dipped in kero-

varnishing it with the white of an egg. Apply with a sponge. When tins are much blackened by

the fire they should be scoured with soap, water and fine sand. If brooms are wetted in hot suds one

week they will last much longer, and always sweep like a new broom. Kid shoes can be kept soft and free from cracks by rubbing them once a week with pure glycerine or castor

A little saltpeter or carbonate of soda mixed with the water in which flowers are placed will keep them fresh for two

To remove egg stains from silver spoons take a little common salt be-tween the thumb and finger and rub the stain briskly. Then wash in hot

Venice turpentine with one ounce of water, stir with a rough stick until thick; then wrap a good coating of it around the finger with a cloth. Another method is to wrap the part affected with a linen cloth dipped in a tincture

To polish marble cut the surface with piece of fine sandstone, using fine as it seems to be predestined that the sand and water. When the whole surface has been equally gone over take a He is not the first predestinarian who piece of felt or old hat wrapped around has had the wind knocked out of him. piece of felt or old hat wrapped around a weight, dip it in fine emery powder and rub the marble until all the marks left by the former process are worked out. Afterwards finish the polish with putty, powder and fine rags.

To make black Japan varnish mix

has had the wind knocked out or num. His political theology will unquestionably get a bad shaking up in 1884, and he will know of a certainty that the Republican party must go, just as he had to get out of public life and for the same reason—robbing the Treas-

ogether burnt umber, eight ounces; true asphaltum, three ounces; boiled linseed oil, one gallon; grind the um-ber with a little of the oil; add the asphaltum, previously dissolved in a small quantity of the oil by heat , mix, add the remainder of the oil, boil, cool and thin with a sufficient quantity of oil of turpentine.

To make crystal varnish take gen-uine pale Canada balsam and rectified oil of turpentine, equal parts; mix, place the bottles in warm water, agitate well, set it inside in a moderatly warm place, and in a week pour off the clear. It is used for maps, prints, drawings and other articles of paper also to prepare tracing paper and to transfer engravings.

POTATO PANCAKES .- They make nost excellent dish for supper. Serve with the same embilishments in the way of pickles, sauces as you would do were the dish you were offering fried ovsters. Grate a dozen medium sized potatoes, after peeling them and washing thoroughly. Add the yolks of three eggs, a heaping teaspoonful of flour, and if they seem too dry, a little milk will do to thin them, with a large teaspoonful of salt, and lastly the whites of the three eggs beaten stiff, and thoroughly beaten in with the potatoes. Heat your griddle and put butter and and I shall have robust and blooming lard in equal proportions on it, and fry the cakes in it until they are brown. spine. Symptoms of snake poisoning of grass and weeds, and garden walks rapidly followed, with a decided amelidinary size of the pancake.

CHICKEN SOUP .- A delicious chicker soup is made by cutting up one chick a great many purposes, where it is to nearly two quarts of water, a teaspoonact as a manure, as a protector against insects, and so on; but we do not been and putting it in your kettle with of barley or of rice. When this is done remove the chicken from the soup. tear or cut part of the breast into small pieces, add to the soup with a cup of cream. The rest of the chicken may be reserved for salad or for chicken cro-

CIDER JELLY .- Delicious jelly can be made of cider. To one pint of clear, sweet cider allow one pint of cold water, two pounds of sugar, one package of gelatine, one large pint of boiling water. Soak the gelatine until it is entirely dissolved in the cold water; then add to this the sugar, a spoonful of add to this the sugar, a spoonful of two lemons, the inice of two lemons, the grated rind of two, then the galatine Add the cider last; then put all in thick flannel bag and let it drain. Do not squeeze it at all. Put it in lowls

or glasses and set it away to cool. Sherry or Madeira wine may be substituted for the cider.

Somewhat Mixed.

Somewhat Mixed.

An Ohio man, who had visited Gotham and got many new ideas, returned home and re marked most of his goods, so that he could say the price of this and that was so much, with so much off. Everything seemed to work pretty well for a week or so, when one of the clerks said he needed a little more posting.

"For instance," he evelaimed, "we

liquer alone. For on their clearniess of sight and cooliness of head depends the safety of life and property."

Recpling his hand on the wheel as he said this, Mr. A. Brockman, of No. 25% Silver street, Chicago, added: "Of course, some of 'em drink; but the sobre ones have the sat postions and the best positions and the best positions and the best pay. Yes, the work and exposure sometimes tells on us; but for my part, I find Parker's Tonic to be all the invigorant I need. I vegot a bottle aboard here now; never go an trip without it. When I here now; never the up in though the prem, to break off. (No, that isn't a light-house; it's a star, low down near the water.) As I was saying, the Tonic is new life bottled up. You see that flag-staft? Well, with a bottle of Parker's Tonic in the locker I can keep malaria as far from me as that, all the time. My wife has used it for three years for summer complaints and coile, and as an invigorant, when she's tired out from overwork. She says the Tonic is a daisy. Good-bye! Don't break your neck going below."

This preparation, which has been known as Parposting.
"For instance," he exclaimed, "we

are giving twenty off on all wooden-

"And pails are twenty cents apiece?

"Then every time a man wants pail he gets it for nothing, and if he takes two I give him twenty cents !" "James, are you a born fool !" demanded the merchant.

"No, sir!" was the prompt reply "I've got rid of the eight dozen pails we had stored up stairs in less than a week, and have promised five dozen more. If you have a clerk who pleases customers more than I do trot

# Naming a Lake.

Years ago it was discovered that a certain lake which had long been con-sidered the head of the Mississippi, had no claim to that bonor. The explorers found a new and smaller lake from which the river took its rise. A discussion arose as to what name would be appropriate for it. The story is that it was decided in this way "Let's make a new name by coining a word," said an old voyager. "Some of you learned ones tell me what is Latin for true."

"Veritas," answered a scholar. "Well, now, what is the Latin

"Caput." "Now write the two words togethe by syllables."

The scholar wrote on a strip of birch-bark "veritas caput."

The five syllables were read. "Now drop the first and last sylla bles and you'll have a good name for this lake." And "Itasca it was.
