The New Orleans Exposition

OFFICE OF ALTERNATE COMMISSIONER OF PENN'A. MECHANICSBURG, Cumberland Co., Pa.

The World's Centennial Exposition which opens in the city of New Or-leans Dec. 1st next, and continues open for six months, is attracting the atten-tion of all civilized countries and is already an assured success. Every State and Territory in the Union, Mexico, the countries of South America and nearly all of the European Governments are contributing of their natural products to the exhibition, and it is now beyond doubt that the Exposition will equal, if not surpass, the great Centennial held in Philadelphia

AGRICULTURAL AND MINERAL DEPART-

MENT. varied manufacturing industries, should will proceed as follows :

HOW TO CONTRIBUTE.

Let each contributor give to this purpose two quarts of every kind and name of donor, county and township.

The entire contributions of each one to

quart parcels, and other products of bear transportation and keep withbe included in contributions for exhi-

IMMEDIATE ACTION NECESSARY.

In order to make the undertaking successful and establish a name highly creditable to the willingness of farmers to assist in every way to advance the interests of agriculture, and to give to our own State a proud prominence in the display at the Expo-

As a people we are all greatly interested in the success of this project. A ested in the success of this project. A ed from the hundred and sixty-acre failure will reflect adversely on the farm. The soil has not forgotten that cause of agriculture, while a grand success, such as the farmers of this State plied more than twenty-five years ago. or lung complaint by using Acker's to their calling a character and standing second to that of no other, and unsurpassed by any of the varied indus-tries that will place on exhibition the products of their skill and labor.

Respectfully, R. H. THOMAS,

Alternate Commissioner.

Feeding Hay.

easy to guage the quantity given, and ren of Mary Evans. even if this were possible, it would vary materially with the quality of the product, although where good grain rations are given, variations in the qualremember once weighing some hay or claimants to the estate, who gave that had been passed through a cutting their names as Parry. They claim to machine, and that a great big pile of it uneut, measured only a few bushel Llewellyn. Among the evidence they basketfuls after the machine had done offer as to the genuineness of their with it, weighing seven and a half claim is a silver watch which their pounds to the basket, or just half the grandmother presented to Watkins at at the same time. It is not possible in which he left behind when he fled from the practical operation of the farm, to Wales. With these steps in a Mrs. be strictly accurate in some matters, but whatever departures there may be should be, so far as possible, controlled by calculation, and not left altogether other claimants to do likewise. The a chemical analysis made of his hay to the legatees under the will live at Asha chemical analysis made of his may to the legated wilkill county. They are a find ascertain its exact intrinsic value, and land, Schuylkill county. They are but he cannot weigh out to each bullock so Robert M. Watkins and the wife of street with the county of the street will be county. many pounds and so many ounces; but coal operator David Vaughn. The he can, considering the quantity of Parrys throw an additional feature into grain he is feeding and the average the case by charging that a sister of quality of hay, make up his mind about their grandmother came here to see he does this, and finds part of it wasted he can decrease the quantity, and if the quantity should be insufficient, his own practical observation will soon disclose that fact to him. Having made up his mind about how many pounds to feed, he will have to guess and weigh a few times until he can approximate somewhat the desired quantity, and will have a basis or starting point from which to increase or decrease the ration. Beside he is pursuing a method, and there is nothing that contribtues so much toward sharpening one's powers of observation and ripening his exper-ience as the habit of doing everything according to some fixed method or plan,-Breeder's Gazette.

A Much Contested Will.

COMPLICATIONS ARISING FROM A MAN'S MANY VENTURES ON THE SEA OF MATRIMONY.

Animals, like men, when the opportunity for exercising preferences is presented, are apt to consider that the best only is good enough for them; and if more hay is given than they require will pick out the tenderest and sweetest portions and leave the romain.

Fifty-four years ago Robert Watkins, then a young man living at Lianguannon, Wales, married Ellen Llewellyn, who a few months thereafter presented him with a son. Watkins require will pick out the tenderest and sweetest portions and leave the romain.

Bloomsburg, Pa. Fifty-four years ago Robert Watsweetest portions and leave the remain- at Roaring Creek, near the Columbia der, which not only wastes valuable county line. Here he married Mary feed, but encourages the habit of dain- Evans. The first wife went to Engtiness in the animals which is conduc-ive to anything but thrift. Animals other children. Two children were that pick over their food, smelling and born to Watkins here and then his secpoking every blade and stem in apparent destration as to whether to eat or ly he married Sarah Feats. Prior to ent hesitation as to whether to eat or not, do not compare in thriftiness with the good, square eaters, whose appetites give them a good relish for a reasonable quantity of any proper food. The general practice is to feed enough which is correct enough when just enough is given, and very incorrect when great quantities are given to be trampled under foot or otherwise wast. trampled under foot or otherwise wast. a will by which his property was devis-But, with hay in bulk, it is not ed to his son and daughter, the child-

ity of hay are not so important. We under the will there appeared two oththeir names as Parry. They claim to be the offspring of the son of Ellen weight of coarse wheat bran weighed the time of his marriage to Ellen, and to accident. The farmer cannot have Parrys live in Luzerne county, while how many pounds he should feed. If Watkins twenty years ago, and was never heard of afterwards and their intimations are not complimentary to the man whose estate they claim to

The Value of Eggs as Nutriment.

Eggs are usually esteemed expen-sive diet, in fact a luxury which only the rich or well to do can afford to use. But it is a mistake when we consider their food value, their nourishing qualities. Eggs, like milk, contain every element necessary for the development of the perfect animal. This is proved by the fact that bones, muscles, blood, feathers, everything in fact that makes the fully formed chicken is contained in the yolk and white of an egg. In deed, there is no more concentrated or neurishing food than eggs. The albuond marriage takes place, where she kneels and prays him not to be offended at her for taking another busband But, as a guarantee against any fail. three eggs properly cooked will afford more nourishment than a piece of meat ceased, she takes along with her a more nourishment than a piece of meat donkey laden with water and saturates the grave, a proceeding which is to compare the cost of producing eggs calculated to keep the dead husband and pork we find it costs nearly twice as much to produce a pound of pork as it does a pound of eggs, and taking into account the nutritive value of each Preparing Fruit for Market.

Among the most common and most valuable of special manures I place with fruit, October is a busy month wood ashes. The amount of ash and its relative composition vary with the kind and part of vegetable burned, but | tention than formerly must be given to we may safely take the ash of the body of the beech tree as representing the average composition of wood ashes One bushel of ashes represents about compels careful gathering, intelligent selection and judicious packing, if any

In making selections it is, as a rule, best to first pick out all of the best ashes contain sixteen pounds of potash fruit,—that which is of good form, worth eighty cents, three and a half large size, and free from any appearpounds of soda worth two cents, sixty-seven pounds of lime and magnesia worth eight cents, and five and a half pounds phosphoric acid worth twenty by transportation, will always com-mand a fair price. The second pick three away such valuable materials, or sell them for sixpence a bushel to a soap boiler? No argument is needed; here is the value and there is the selling price. Draw your own conclusions.

Even when the ashes have been the sellicached to the sellicac six cents. If we had to buy in market | ing should be the smaller size, but It is highly important that the great of ashes the cost would be one dollar known varieties. Sometimes a third State of Pennsylvania, so rich in agricultural and mineral products, as well
as foremost among the States in her
or sell them for sixpence a bushel to a
quality, composed of the large imperfeet fruit, will pay for selecting; this
or sell them for sixpence a bushel to a be amply and thoroughly represented. here is the value and there is the sell-Having been assigned the task of coling price. Draw your own concluing two qualities, for drying and for

dollars and eighty cents a ton. The market gardeners of Long Island knew ed the fruit should be stored in some their value, and sent ships one thousand miles to bring the ashery heaps of Maine, even when they had to draw if it can be avoided, pack more than other cereals raised by him this season, placing the samples of each, separately, in a strong paper sack, marked with the name and variety of cereal, name of donor, county and township.

The entire contributions of each one to

In 1880 there were of colored persons in the United States 4,001,207 ten dried and evaporated fruits in one had to bear brunt of hard work. I 3,600,000 colored persons in the United had plenty of stable manure and used States over ten years of age who can

White birch bark appears to be very desirable object in the arts. An oil taken from it imparts to leather made in Russia the peculiar odor, the origin of which was long a puzzle to leather manufacturers in other countries. When the oil is dissolved in alblight nor water sprouts, but golden cohol it can be applied to preserve fab-fruit in bountiful supply. Like my ever-so great-grandfather, Adam, I left keeps insects from the products of the rics and render them waterproof. It keeps insects from the products of the loom, and does not affect the pliability
