

Winter Quarters For Stock.

Mr. Henderson in his book, "How Farming Pays," says the use and value of farm houses are often greatly reduced by a want of proper arrangements for stabling them.

The American Agriculturist, speaking on the same general subject, says an abundance of light in the shelters provided for stock in winter is a point which should not be overlooked.

The Maine Farmer takes a very sensible view of the common plan of judging live stock. It says that a scale of points has a fascination for some men, including some very competent judges.

Carefully prepared scale of the desirable points in animals of different breeds are valuable aids, as we think, as a help to inexperienced breeders or observers in familiarizing themselves with these points.

One result of judging solely by a scale with fixed numerical value for each point would be, that an animal with some glaring defect in an important point might be placed over one without any striking excellences.

In selecting for breeding purposes, we believe it is at best, equally as important to emphasize the undesirable points as to give credit for the good ones.

The abundant supply of apples the past season, and the low prices they have brought in market, have induced many landowners to hesitate in planting for future profit, and some are even prepared to cut down their trees.

A beautiful clock is made of ivory white shellac in long pelican shape, laid in narrow plates down the center of the back, lined with pink satin and bordered with white marabout feather trimming.

Dissolve one pound of copperas in two gallons of water, and add to it one ounce of sulphuric acid, then add one ounce of phosphatic soda, and the same quantity of common salt.

What is Malaria?

A PLAN TO SUCCESSFULLY COMBAT A DISEASE THAT DESTROY ANALYSIS. The once accepted theory that malaria is a disease of the blood, and that it is to be combated by purging the system, is now shown to be entirely wrong.

Malaria is a disease of the system, and not of the blood. It is caused by a malarial poison which enters the system through the lungs, and is disseminated through the blood.

One of the worst cases of malaria was that of Mrs. C. F. Boston, of 67 Fifth St., Troy, N. Y. Her experience, of great value, is given, that others may receive like benefit.

At first it made me drowsy sick, but after the bile had been eliminated, I began to feel better, and my physician, when I commenced the new treatment, I weighed 160 pounds.

Every winter thousands of dollars are lost by the ravages of mice, and in nearly every case where damage is done to trees, the owners acknowledge that they neglected to see any means to protect their orchards.

It is said that by coating the trunks of the trees a foot up from the ground with equal parts of lime and kerosene, mice will not touch them.

The remedy that we have always used, and one that never failed, is to make a small compact mound of dirt around the bodies of the trees.

During the last year occasional mention has been made of the horseback trip of two Wisconsin girls to California and return. Intelligent Larson, a well-to-do farmer, living two miles west of Marquette, Green Lake county, has two daughters, Emma and Ida, who were possessed of adventurous spirits, and in May, 1883, they formed the determination to make a horseback trip to California.

A beautiful clock is made of ivory white shellac in long pelican shape, laid in narrow plates down the center of the back, lined with pink satin and bordered with white marabout feather trimming.

Dissolve one pound of copperas in two gallons of water, and add to it one ounce of sulphuric acid, then add one ounce of phosphatic soda, and the same quantity of common salt.

Foreign Immigration for 1884.

The foreign immigration for the year just closed has fallen off about twenty per cent, the arrivals being about one hundred thousand less than during 1883.

A view of the nationality of the coming citizens will not be without interest. The complete figures can only be given for eleven months ending November 30, but they are sufficient to show the drift.

Having recently leased the Exchange Hotel Stable, I am now running it as a boarding, exchange and Hotel stable. I can offer owners the very best accommodation for their horses.

A good joke has leaked out about the bagmaster on Goodenough Bendish's train of the Naugatuck road. The other day he was found with a bag of Bridgport heavy cast iron, and all the train hands supposed they had a corpse for a passenger.

At first it made me drowsy sick, but after the bile had been eliminated, I began to feel better, and my physician, when I commenced the new treatment, I weighed 160 pounds.

John H. Mercer distinctly states that Acker's English Remedy has done more contracted consumption. Ask for circular. An entirely new medicine, guaranteed.

John H. Mercer, of Kansas, sowed 1 1/2 bushels on three acres and harvested 185 bushels of good wheat. This is at the rate of forty-five bushels per acre, and sixty bushels for every bushel of seed sown.

Ask James H. Mercer about Acker's Blood Purifier, the only preparation guaranteed to cleanse the blood and remove all chronic diseases.

"I Have Suffered"

With every disease, I have suffered for the last three years. Our Druggist, T. J. Anderson, recommended "Hop Bitters" to me.

Can I say that I was afflicted with indigestion, and that my appetite was so poor that I could not eat? Yes, I can say that.

Having recently leased the Exchange Hotel Stable, I am now running it as a boarding, exchange and Hotel stable. I can offer owners the very best accommodation for their horses.
