

Death Before Dishonor.

Reading, Pa., Sept. 25.—The community was startled this morning by the report that the wife of Robert W. Spang had committed suicide, that the immediate cause of the sad act was the fact that the jury in the trial of slander which she brought against Miss Charlotte Harvey, of South Eleventh street, had brought in a verdict in favor of the defendant. The suit was tried before Judge Hageman in Court this week, and in his charge the Judge distinctly and explicitly stated that if the jury, after considering all the facts, brought in a verdict in favor of Miss Harvey, such verdict could not at all be construed as setting forth that Mrs. Spang was the sort of woman Miss Harvey was alleged to have said she was. Judge Hageman said the defense did not put in a plea of justification by saying that Mrs. Spang was alleged to have said that Mrs. Harvey declared she never made use of such expression, inasmuch as Mrs. Spang was a respectable lady. During the trial Mrs. Spang, who was a medium-sized, black-haired, dark-complexioned lady, slightly built, with her hair and eyes of the green-cobalt color, at one of the green-covered tables in the third story of the Court House. She was a close listener to all of the proceedings and frequently wept.

When the case was concluded at 5 o'clock yesterday afternoon, the jury, composed of Mr. and Mrs. Spang went home. Yesterday morning the jury brought in a sealed verdict in the case, but Mr. and Mrs. Spang were not present. The verdict, as above stated, was in favor of Miss Harvey. Mrs. Spang was restless and uneasy and appearing to be troubled in mind. On Wednesday night when the jury's verdict was not yet known she seemed anxious to know the result and her one dread seemed to be a verdict in favor of Miss Harvey. She told her friends that such a verdict would make her heart all that Miss Harvey had alleged as to her character.

Mrs. Spang heard of the verdict through her counsel yesterday afternoon. She went home in a troubled condition of mind. Robert W. Spang, the husband of the woman, said: "All day yesterday Mrs. Spang was in a case of her mortification and shame were great when she learned of the result of the trial." She made threats that she would take her own life, but Mr. Spang did not at first pay serious attention to them. He thought that his wife was merely excited and would cool down as time passed on, and she would forget her unfortunate experience in Court.

Mr. Spang guarded her as much as possible, and kept a watch over her until they retired at 9 o'clock last night. In making her threats outside Mrs. Spang stated to her husband that she would select drowning as the manner of making away with herself. She promised her husband before she went to sleep that she would make no such attempt that night, and he went to sleep. An hour afterward, or about 10 o'clock, he awoke and found her dead, and was startled to find her gone from his side. He called her by name, when she answered him from down stairs. He struck a light, and found her sitting in the front room. By kind persuasions he induced her to go back with him. He said that he thought she gave herself such concern about the matter, and the husband, tired and worn out, then again fell asleep.

At 3 o'clock this morning he was awakened by his wife calling him. He found that she had gone from their room. She was sitting in the lounge, and appeared to be in terrible agony. To him she confessed all; how she had taken poison, and that she desired to die. The husband, now thoroughly alarmed and dazed by his wife's terrible confession, hastily dressed himself and ran to the office of Dr. Loos, whom he awakened. Dr. Loos hurriedly went to the house and applied all known remedies, but the poison had taken too deep a hold on her system, and at 4 o'clock she died.

Dr. Loos had a conversation with Mrs. Spang in which she told her that she had taken water but he thought she had any request to make she should state it. She said that she had none. She refused to have a minister summoned. Mr. Spang was not aware that there was any poison in the house. The family purchased a box of Rough on Salt water but he thought that it had all been used. When questioned as to what she had taken Mrs. Spang pointed to a table drawer and here the poison was found. The box was half empty, but Mrs. Spang stated that she had only taken half a teaspoonful.

Miss Harvey, the defendant, is a daughter of Isaac Harvey, who married a sister of the deceased, thus making the deceased an aunt of Miss Harvey, the defendant. The deceased brought the suit against Miss Harvey charging her with having used vulgar and obscene language concerning her, both in Reading and in Philadelphia, casting odium upon her character as a respectable woman and alleging that her home was visited by persons not of good character and that no person associates with her any more.

Household Wisdom.

A newspaper is preferable to a brush for polishing a stove. If salt is thrown over carpets before they are swept, it will tend to freshen their colors. The annoyance of squeaking soles on boots may be disposed of by an application of linseed oil. A dish of cold water placed in an oven that is too hot for baking will speedily reduce the temperature. Oranges, lemons, and similar acid fruits should be put up in glass vessels, as the acid readily attacks tin plate. Brass, copper or tin vessels should never be used in making pickles, as the action of the acid frequently produces poison. A porcelain, or granite iron vessel is best for pickle making.

To prevent mould forming on fruit jellies, pour a little melted paraffine over the top. It will harden into a solid case when it cools, and it may be easily removed. It can be saved and used again next season. For iced tea it is claimed that a cold infusion is preferable to a hot one. Four cold waters on this dry tea at least four hours before it is needed for drinking, place it in the ice chest and add the ice when served.

An excellent method of administering castor oil to children is arrived at by pouring the oil into a pan over a moderate fire, then breaking an egg into it and stirring well. Flavored with a little sugar or currant jelly, the mixture will not be disagreeable. The White House letter paper is of the finest quality, with beautifully printed heading. Jefferson headed his own foolscap with a quill pen.

Schools in France.

Nowadays, when so much is being said about the undue pressure put upon young children in the school, the reader will be interested to learn how such matters are conducted in France at one of the best public schools here, through one of our comparative recent origin. The Ecole Monge is a well-organized institution, in which the whole system of education is set forth in simple language. Monge is a big school numbering hundreds of pupils, but its division into several school divisions away from the trouble and drawback of overcrowding. No corporal punishment is ever administered at French schools. The worst that can befall the offending pupil is a short period of solitary confinement; but this is rarely resorted to, and a public reprimand is usually found sufficient. Pupils are only permitted to begin Latin when they have been thoroughly grounded in their own language, geography, arithmetic, and the rudiments of history and German—that is to say, about their 11th or 12th year. Until the age of nine the boys are exclusively under the care and supervision of female professors. The Ecole Monge is the only school where lady teachers are employed, the routine of the university not permitting such an innovation to the Lycees. The programme of education between the 5th and 9th year includes French, Latin, Greek, Latin, and composition, ancient and Bible history, taught by word of mouth, and the geography of Europe, more especially of France, the four rules of arithmetic, German writing and reading, with pronunciation and conversation, besides the study of natural history, rendered as attractive as possible. Often the lady professors take a fable of Lafontaine as a text, and describe the habits of birds and animals mentioned therein. The young pupil is occupied thirty-three hours and three-quarters in a week, and ten hours devoted to instructive reading, German conversation and games. Only one in the course of each day is the pupil kept at his desk so much as an hour and a quarter at a time and that is after his first arrival at school. During the rest of the day the studies are divided by half-hours of recreation or gymnastics.

J. H. Mercer wishes to state that he has at last found an article he can sell on its merits. It is with pleasure he guarantees to the public Ayer's Sarsaparilla, a medicine that never fails to cure Asthma, Coughs, Whooping Cough, Croup, and all Lung Troubles. It is the standard remedy for Consumption. I have never found its equal.

J. H. Mercer wishes to make an assertion, which he can back with a positive guarantee. It is all about Ayer's Sarsaparilla. He claims for it superior merits over all other remedies of its kind, and guarantees for it a positive and sure cure for Rheumatism, Syphilis, and all blood disorders, it frees the skin from spots and disease, and leaves the complexion clear. Ask him about it.

One of the evidences of January offered in a New Orleans contest would be that the man, while changing his high silk hat twice a year, invariably had them made in the fashionable shape of precisely ten years before.

A prominent physician of Athens, Ga., who has had many cases of sore throat lately, made an investigation and found nearly every one of them was caused by cigarette smoking.

Only Temperance Bitters Known. WINEGARB BITTERS. PURELY VEGETABLE. FREE FROM ALCOHOL. DRUGGISTS EVERYWHERE.

There is no cathartic for the purpose equal to Dr. J. C. Ayer & Co.'s Sarsaparilla. It is a purely vegetable preparation, made from the most pure and healthful ingredients, and its action is gentle and soothing. It is a powerful purgative, and its use is recommended by the most eminent physicians of the world.

TO GRATIFY HIS WIFE.

A GOOD REASON FOR HAPPINESS. For many years I had suffered from a complaint which the physicians call gravel. I had employed some of the most noted doctors without obtaining any permanent relief, and for a long time my case was regarded as hopeless. All who knew my circumstances said I must die. Finally my wife induced me to try a bottle of Dr. Kennedy's "Favorite Remedy," which she said she had used with success. Without the slightest faith in it, but solely to gratify her, I used that and two or three bottles more, and so made a long story short—I am now as healthy a man as there is in the country.

"Since then I have recommended 'Favorite Remedy' to others whom I know to have suffered from kidney and liver complaints, and I assure the public that the 'Favorite Remedy' has done its work with a similar completeness in every single instance, and I trust some other such and discouraging mortal may hear of it and try the 'Favorite Remedy,' as I did."—Washington Monroe, Catawba, N. C.

Don't let a foolish prejudice against popular medicine stand between you and the health of your wife, child or baby. It is always right to advertise a blessing. Dr. Kennedy's "Favorite Remedy" is a blessing to thousands, and it will help you. If you are sick from troubles of the kidneys, liver, or blood, spend one dollar for this king of medicines.

KILLER'S CATARRH REMEDY. THE GREAT BLOOD PURIFIER OF THE WORLD. AN ABSOLUTE CURE FOR CATARRH.

THE most stubborn cases yield readily to this medicine. It is a purely vegetable preparation, and its action is gentle and soothing. It is a powerful purgative, and its use is recommended by the most eminent physicians of the world.

A FORTNITE CURE FOR MALARIA. One bottle is generally sufficient for a cure. Stop taking quinine. A trial only is asked for KILLER'S CATARRH REMEDY. It is a purely vegetable preparation, and its action is gentle and soothing. It is a powerful purgative, and its use is recommended by the most eminent physicians of the world.

A HOME DRUGGIST. Popular at home is not always the best test of merit, but we point proudly to the fact that our medicine is used in every city, town, and country, and among all people.

Ayer's Sarsaparilla. The following letter from one of our best known Massachusetts druggists shows the success of our medicine in curing a case of Rheumatism.

RHEUMATISM. "Eight years ago I was attacked with Rheumatism, and it was so severe that I could not move from the bed, or dress, without help. I tried every remedy, but without success. I finally took Ayer's Sarsaparilla, and it cured me. I have since used it several times, and it has cured me each time. It is the best medicine I ever used for Rheumatism."—S. L. B. D., Duxbury, Mass., May 15, 1882.

SALT RHEUM. "I was afflicted with Salt Rheum, and it was so severe that I could not move from the bed, or dress, without help. I tried every remedy, but without success. I finally took Ayer's Sarsaparilla, and it cured me. I have since used it several times, and it has cured me each time. It is the best medicine I ever used for Salt Rheum."—S. L. B. D., Duxbury, Mass., May 15, 1882.

Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists; 25¢ six bottles for \$1.50.

How to Succeed.

The Country Gentleman offers its readers some very pertinent and valuable suggestions on the important question, how to succeed on the farm. The farmer who is determined to succeed, it says, will place on his list of indispensable requirements the following operation: 1. The erection of sufficient fences to give him possession and control of every field. 2. Thorough or sufficient underdraining of the soil and control of at least three of the soils beneath the surface. 3. The adoption of such a rotation as will give an increase of each successive kind of crop, and a decrease and extermination to such weeds as have obtained possession. 4. Saving all the manure made on the farm, and its application at the best time and in the best manner possible. 5. Providing tools for a most thorough pulverization of the soil for all crops. These five operations lead to the foundation of good farming. There are many other provisions to be made, and in addition to these, which should not be overlooked, such as the saving of labor, selection of weeds, providing the best animals, shelter for tools, shelter for animals, testing commercial fertilizers, and many other operations which will suggest themselves to the owner who has his head to the work.

In providing sufficient fences for the farm, the importance must occur to every one, of laying out the fields so that they may be easily accessible, and so that the least amount of fencing material may be needed; at the same time, to include those of similar character within the same enclosure; and it may be best, in many cases to make the field oblong instead of square, that the ploughing may be done with less frequent turning of the ends. In the case of good farm roads or lanes will be obviously quite important, as they must be travelled many times a year in bringing in heavy crops, or with loads of manure to the fields. Sometimes a few hours' work in leveling obstructions, filling ruts, or clearing depressions, or in the case of a heavy load of gravel, embanking, or providing side ditches, may have all this labor many times repaid in a single year, in drawing in heavy loads of hay and grain, or in drawing out hundreds of loads of manure. The farmer would do well to have his fields so laid out that improvements he may make in the disposition of his fields, or in the finish of his farm roads.

The advantages of thorough underdraining are so well understood that but little need be said on the subject. We have pointed out many instances, more than three years were required to repay the expense in the increase of the crops. A young farmer, who was in debt for his farm, told us that he found he could not pay the mortgage till he borrowed money to buy a mill, and a successful cultivator, and a few of his neighbors equal him in the heavy return from his land.

Rotation has one peculiar advantage—it requires no outlay of money—it only expends in thought. A continued succession of the same crop in the same field will not only have the return from an equal amount of hard work. There is no easier way to keep the land free from weeds as by a well devised rotation—in which hoed crops are followed with sown crops, and sown crops with grass, and so on.

It is a well known fact that the soil is a very fertile one, and that the return from an equal amount of hard work. There is no easier way to keep the land free from weeds as by a well devised rotation—in which hoed crops are followed with sown crops, and sown crops with grass, and so on.
