pain. My pulse was a nong mass of pain. My pulse was uncontrollable. In my agony I frequently fell to the floor and clutched the carpet, and pray-ed for death! Morphine had little or no effect in deadening the pain. For six days and nights I had the deathpremenitory hiccoughs constantly! My water was filled with tube-casts and albumen. I was struggling with Bright's Disease of the kidneys in its last sta-

While suffering thus I received a call from my pastor, the Rev. Dr. Foote, at that time rector of St. Paul's Episcopal church, of this city. I felt that it was our last interview, but in the course of conversation Dr. Foote de tailed to me the many remarkable cures of cases like my own which had come under his observation. As a practicing physician and graduate of the schools, I derided the idea of any medicine outside the regular channels being in the least benificial. So solicitous however, was Dr. Foote, that I finaly promised that 1 would waive my prejudice. I began its use on the first day of June, 1881, and took it according to directions. At first it sickened me; but this I thought was a good sign for one in my debilitated condition. I continued to take it; the sickening sensation departed and I was finally able to retain food upon my stomach. In a few days I noticed a decided change for the better, as also did my wife and friends. My hiccoughs ceased and I experienced less pain than formerly. I was so rejoiced at this improved condition that, upon what I had believed but a few days before was my dying bed, I vowed in the presence of my family and friends, should I recover I would both publicly and privately make known this remedy for the good of humanity wherever and whenever I had an oportunity, and this letter is in fulfillment of that vow. My improvement was constant from that time, and in less than three months I had gained 26 pounds in flesh, became entirely free from pain and I believe I owe my life and present condition wholly to Warner's safe cure, the remedy which I used.

Since my recovery I have thoroughly re-investigated the subject of kidney difficulties and Bright's disease, and the truths developed are astounding. I therefore state, deliberately, and as a physician, that I believe more than one-half the deaths which occur in America are caused by Bright's dis case of the kidneys. This may sound like a rash statement, but I am pre-pared to vertify it fully. Bright's disease has no distinct features of its own (indeed it often develops without any pain whatever in the kidneys or their vicinity), but has the symptoms of nearly every other common complaint. Hundreds of people die daily, whose burials are authorized by a physician's certificate as occurring from "Heart Disease," "Apoplexy," "Paralysis," certificate as occupicxy," "Paratysis, Disease," "Apoplexy," "Rheumatism," "Pacamonia" and other common complaints, when in reality it is from Bright's disease of the kidneys. Few physicians and fewer people, realize the extent of this disease or its dangerous and insidious nature. It steals into the system like a thief, manifests its presence if at all by the commonest symptons and fastens itself in the con stitution before the victim is aware of it. It is nearly as hereditary as consumption, quite as common and fully as fatal. Entire families, inheriting it from their ancestors, have died and yet none of the number knew or realized the mysterious power which was removing them. Instead of common symptons it often shows none whatever but brings death suddenly, from con-

future, to find that the possibilities of the past and present will in the future retraive effects.
