A still small voice whispers the answer George E. Elwell. The bee can be caught and put in the bonnet and it will buzz.

A thought strikes us that is worthy of some consideration. From all the correpondents in the county who write for their respective localities to the different news papers of the county, there has been but ittle said in reference to the subject of Temperance Physiology. Whether the various boards of directors introduce this subject as a discretionary branch, left to the judgment of parents and pupils, or whether parents and pupils quietly acqui esce in its universal introduction, is workers, who would not be employed thought of more interest than the subjecof physiology itself. A certain class of people in our township and also in Sugarloaf would prefer a forfeiture of the state appropriation rather than submit to what they deem a "tyranny." But there is still another class who would hold the Board of Directors responsible? for its forfeiture, children especially. as it is quite an item in the sum total o the exhorbitant taxes that are yearly levied upon our people which seems to be about all the load they can carry.
