THE ANCIENT GREEKS.

THEIR BELIEF CONCERNING THE SEAT OF LOVE AND PASSION.

The Liver Regarded as the Favored Organ How Could it be So ! Rec at Facts Partly Confirm This Belief.

The ancient Greeks thought the seat of love and passion was in the liver, and in great measure their opinion was not far astray. The lover whose liver is off, or the husband who is bilions, as not half a man-his sluggish liver has filled his blood with

Of all the mean contemptible conterfits in the world, red blood full of

bile is the worst—the very worst!

We have about 10 quarts of this fluid in the average sized man. It is constantly undergoing change and is manufactured from the food we daily consume by a chemical process nature has. She selects only that portion which, after digestion is found to be proper, and takes it up by a tube calld the thoracic duct, emptying it into the large vein near the left collar bone, from which it is at once carried to the kidneys to be strained of all the deleterious matter which was left

If the kidneys are in healthy condition the blood is in an absolutely pure state, contains all the elements for repairing waste, returns at once to the heart and is thrown by that organ to every part of the living body to give up its nourishment and take up all the worn-out material.

Contrary to general belief the liver is not a blood purifying organ; its purpose is only for nutrition, digestion, and it secretes daily many pounds of bile, some being used in digestion and nutrition, and the balance as a cathar-

Now, after being housed up all winter, with meat largely composing the diet for the purpose of producing heat the liver increases one third of its supply of bile, and in the spring, nature not having use for the excess, it is thrown into the blood, carried to the skin (for it must be got rid of in some way) and causes that condition known as "bilious" when the person is dull, lethargic, restless, well to-day and half sick to-morrow; because the blood is loaded with this substance, which is just as foreign to it as so much dirt or corruption, and poisons the entire body, making your blood impure. You know there is something out of gear and the natural impulse is to take catharties.-but drastic catharties do not remove the cause—they make

You a-k, wiy! Because, my friend the liver is a sluggish, lethargic organ that cannot be relieved of any ailment except by medicine which acts upon it in a quiet steady manner, producing permanent effects, and assisting, not goading its normal action. The kidneys do the purifying. Always remember that! No other organ in the body can take their place in this respeet, and they attend to over 9,000 hogsheads of blood in a year! Think of it and wonder that they are able to

do so large an amount of work! A healthy kidney to purify, and healthy liver, emptying its poison into the boxels and not into the blood, are the true and only givers of pure blood. The interior of the kidneys have few

nerves of sensation, and a stone can be, and often is present without any indication until it reaches the first out-let, which is supplied with nerves that soon sound the alarm.

Do you see the moral of this? A bealthy liver and kidney is all there is to this question of pure blood. Keep them in order. Don't wait until you find they are diseased, for then it may be to late. Do this and you are bound to have pure blood. Warner's safe cure has a direct action upon both the kidneys and liver, and has become a recognized agent for its health-preserving and blood-purifying properties, and as such is used by many physicians. A few bottles will positively prevent disease, and we are certain that disease of either organ is prevented by its use, if taken is time.

its use, if taken in time. The spring approaches, and nature needs help. Take it and save sickness and doctor's bills. Don't let any season go by without its use, or you may regret it forever.

American Enterprise.

A Cleveland speculotor sent his son to Wisconsin to buy hops, telling him to keep his eyes open for any other speculation. After a few days a despatch came, saying: "A widow has got a corner on the hop market of this State. Shall I marry her?" "Certainly," was the reply sent over the Twelve hours later the son announced: "Got the hops, the widow and seven step-children, and shall go to Chicago to-morrow to see about a

The Last Brigadier.

The Savannah News says: The last brigadier-general appointed under the Confederate government is now carry-ing on a saddlery and harness business in this city. Colonel Peter McGlashan enjoys the distinction of having been the last brigadier whose commission was signed by President Davis. The commission was signed just before the fall of Richmond, and was never deliv-ered. Colonel McGlashan, though a general by right, has never seen the record of his promotion. A native of Scotland, he came to this country and settled in Thomasville about 1850. When the war broke out he entered the confederate service as a lieutenan in the Thomas County Rangers. He was a brave soldier and soon after he entered the army became colonel of the Fiftieth Georgia regiment. At the second battle of Cold Harbor, in 1864, he led his command through the thick-est of the fight, and for gallantry in repulsing a federal attack was recom-mended by General Good Bryan for promotion. His commission, though made out and signed, did not reach his hands. Mr. Davis, when last in Savan-nab, asked very kindly after Colonel McGlasban, and spoke in terms of praise of his gallant conduct in the long and terrible struggle.

After a thorough test J. H. Mercer most positively asserts that Acker's English Remedy is the best medicine for asthma, croup, coughs, whooping cough and all lung troubles that can be found. Ask him about it, for he fully

The editor who very suddenly sat down on a boil wrote: "A press of other matter necessarily cartails our humorous column this week."

VINEGAR BITTERS

of any other medicine in the world.

No person can take the Hirrana according to directions and remain long nuwell, provided their bones are not destroyed by teineral poison or other means, and the vital organs wasted beyond the point of repair.

Remittent, Intermittent and Malarial Fevers are prevalent throughout the United

Antum, especially during seasons of musual heat and dyness.

These Fevers are invariably accompanied by extensive derangements of the stomach, liver and bowels. In their treatment, a purgative, exerting a poverful influence upon these organs, is absolutely accessary.

There is no cathartic for the purpose equal to Dr. J. Walkers's Vincoan Bittries, as it will speculity remove the dark-colored viscid matter with which the howeits are loaded, at the same time atmosfating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

restoring the healthy functions of the digestive organs.

Fortify the body against disease by purifying all its fluids with Vixnean Bitters. No epidemic can take hold of a system thus forestimed.

It invigorates the Stomach and stimulates the torpid Liver and Bowels, cleaning the blood of all impurities, imparting life and vigor to the frame, and carrying off without the aid of Calomel, or other minerals, all poisonous matter from the system. It is easy of administration, prompt in action, and certain in its results.

By appairs or Indigention, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Fraumonia, Diziness, Bed Taste in the Mouth, Illious Atlacks, Palpitation of the Heart, and a hundred other painful symptoms, are at once relieved by Vixnoas Bitters.

For Inflammantery and Chronic Rheumatism, Gout, Neuralia, Diseases of the Blood, Liver, Kidneys and Bladder, the Bitters have no equal. In these, as in all constitutional Diseases, WALKER'S VIXNOAR BITTERS has shown its great curative powers in the most obstinate and intractable case.

powers in the most obstinate and intractable color.

Rechamical Biseases.—Persons engaged in Paints and Minerals, such as Plumbers. Typesetters, Gold-beaters, and Miners, as they advance in life, are subject to Paralysis of the Bowels. To guard against this, take occasional doses of Viseasa Birrens.

Nitis Diseases, Scrofula, Salt Rheum, Ulcers, Swellings, Pimples, Pustules, Boils, Carbuncies, Ring-worms, Scalchead, Sore Eyes, Eryspeias, Ilch, Scurfs, Discolorations, Humors and diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of the Bitters.

Pin, Tape and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vernifuges, no anthelminites, will free the system from worms like Visiona Birtens.

Meanles, Scarlet Fever, Mumps, Whooping Cough, and all children's diseases may be made less severe by keeping the bowels open with mild doses of the Bitters. This wonderful remedy is especially adapted to the systems of children, for purifying herbs alone give it its remarkable curative powers. It contains no alcobol, optum or other poison.

For Female Completints, in young or old,

other poison.

For Fernale Compleints, in young or old, married or single, at the dawn of womanhood, or the turn of life, this Bitters has no equal.

Cleannee the Vitiated Blood when its impurities burst through the skin in Eruptions or Sores; cleanse it when obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when, and the health of the system will follow. follow.

In conclusion: Give the Bitters a trial, It will speak for itself. One bottle is a better guarantee of its merits than a lengthy advertisement.

Around each bottle are full directions printed in different languages.

Turned Gray in a Night-

Every person who has ever seen Jimmy Kane, the sporting man, now on trial at Pittsburg for murder, has experienced great surprise when told that he is but 35 years of age. His hair is perfectly white, and his face almost as ancient looking as that of an old maid. His friends give a wonderful reason for his aged appearance. About fifteen years ago, while Jimmy and a party of friends where looking through the party of friends are looking through a cemetery back.

Dans De Kennery: The day after I came home.

pearance. About fifteen years ago, while Jiemny and a party of friends were looking through a cemetery back of Pittsburg they came to a large vault, the door of which was open. Jimny stepped into the place, when one of his friends closed the door after him. They all then walked away, think ng he would soon follow. They were not aware that the door fastened with a spring lock. Jimmy remained in the value and they are sufficiently purge the blood of deep-seated disease.

They all then walked away, think ng he would soon follow. They were not aware that the door fastened with a spring lock. Jimmy remained in the bladder. In the part of the self-time properties of which as another form without the use of Alcohol.

It is the great Blood Purfler and Life-fiving Principle; a Gentle Purguitoe and Total; a seried. Hencovator and Invigorator of the system. Never before in the listory of the world has a melicine seen tongois indep loosessing the power of viscous and the self-time properties of Viszoas his world when at last he was preleased it was low to the self-time properties of Viszoas his and the self-time properties of Viszoas his off-time properti but says that his experience was terri ble ; that all night be fought the rate, and that he was about to give up hopes when released.

The Soldiers' Orphans' Investigation.

There was a meeting of ex-soldiers and sailors in the Common Council Chamber of Philadelphia, on Friday last, an investigating committee ap pointed and the following resolution adopted :

"Whereas, Public charges are made that the soldiers orphans' homes and schools of the State of Pennsylvania have been dishonestly and fraudulent-ly managed and the children deprived of the proper care, support and nurture which it was intended they should reeive ; therefore, be it "Resolved, By the soldiers and sail-

ors here assembled, that we most earnestly request the Governor to have an immediate official and searching investigation made, and if the investiga-tion should find those or any other charges well founded to have all parties implicated prosecuted to the full extent of the law."

The Philadelphia Times refering to

the action at this meeting thus says:
The committee of the Grand Army of the Republic that is about to investigate the speculations and abuses of the Soldiers' Orphans' Schoools of the State, need only read the letter purporting to be from ex-Senator Wright, head of the school syndicate, to the principal of the Mount Joy School on the 30th of January, 1884, to guide them in their inquiry. The etter is published in the Record as a genuine letter from ex Senator Wright, and is as follows :

MERCER, Pa., January 30, 1884.-. I find the last coffee bought very poor, and have this day ordered other to Mount Joy. While I do not want the poor thrown out I do not cant you to use it next week. See that it is put out of the way, sure. It is not a fair sample of what we usually use by any means. You will likely have some visitors from the G. A. R encampment, which meets at Lancaster city next Wednesday, February 6. You need not be surprised if members drop in on their way to or from the en-campment. I need not say more, only see the cook and all other departments and have no mistakes anywhere. I much fear trouble from this encamp

ment for Mount Joy. If frozen feet, toe nails dropping off, itch, etc., with your four month's record of deaths, etc., do not warm up our G. A. R. friends I shall feel that I am no prophet All these matters are sure to be investigated and brought up at the encampment; so get in shape to meet charges and receive visitors. I forgot to caution Sherbin in writing him yes-terday about next week. Talk it over with him and matron, and get to work

with him and matron, and get to work and in shape.

Unless the foregoing letter is a bald and malicious forgery, it is conclusive of the guilt of Wright and his partners as systematic robbers of the orphans of our soldiers. There is not a keeper of a prison in Pennsylvania who would be tolerated for a day after such a confession of his treatment of the crimi nals committed to his care; and when the most beneficial charity of the State is thus prostituted to inhumanity and greed, and the corfession made without an expression of regret beyond the fear of exposure, the only questions for the Grand Army committee to con-sider are—first to what extent fraud and abuse have been practiced; and second, how Wright and his this ving syndicate can be most speedily broken in their contracts and their plunder

recovered by the State. No citizen of ordinary humanity can read the letter published as from Wright, without a sense of shame for a great Commonwealth whose noblest charity has been prostituted to the meanest aims of theft and cruelty. The ills of "frozen feet, toe-nails dropping off, itch, etc.," are discussed without the least semblance of shame, and they and the "four months" record of deaths" are referred to only to make sure of their concealment so that the same atrocious barbarism and its pro-fits might be continued indefinitely. There is no demand, no suggestion even, for the correction of these start ling abuses, but only the cold-blooded demand of a speculator in the orphans woes he has himself created, to concea his crime and the orphans' sorrows

from discovery. Assuming that the letter quoted is genuine, and its genuineness has not yet been disputed—the only material inquiry for the Grand Army committee is as to the extent of this cruel robbery and the measure of restitution to be made to the State. The payment of all moneys to the Wright syndicate Just as it has led ever since its should be stopped at once, and the introduction, so Baugh's \$25 proper authoris should summarily representate will continue leading voke all its contracts. There is no need to wait for further inquiry to revoke contracts and suspend payments unless the letter we have quoted shall be proved a forgery, and no such inti-mation has yet been made in any quarmatton has yet been made in any quar-ter. Perfunctory investigations a-mount to little, and even earnest inves-tigations may be defeated by the plans suggested by the Wright letter to the Mount Joy principal; but if that letter is genuine, it is ample to justify the promptest and most radical action by the State officials to god the syndicate the State officials to end the syndicate contracts and balt the heartless specu-lators in cruelty to the orphans of sol-

J. H. Mercer wishes to state that he has at last found an article be can sell on its merits. It is with pleasure he guarantees to the public Acker's English Remedy as a sure and never failing cure for Asthma, Coughs, Whooping Cough, Croup, and all Lung TrouTHE NARROW ESCAPE TAKE

LOUISE MICHEL IN PRISON.

Observations on the Relative Sociability Observations on the Relative Sociability of Cate and Rats—Domestication.

Louise Michel brought four cats with her from Noumes to France. They were given her when she arrived in New Caledonia by a convict who had served her time and was returning to Europe. The youngest, Moustache, is now 16, and the eldest, Ninette, is 19. They were with her at St. Lazare. The fourth killed himself under circumstances honerable to himself and mistress. The day she was returning from London he was on the top of a house. When he saw her getting out of a cab. house. When he saw her getting out of a cab, he, in trying to jump from balcouy to bal-cony, fell into the street from the third story and was so injured that he died in a few

ours.
These cats at St. Lazare were taught to live

These cats at St. Lamre were taught to live on good terms with the rats that came every morning in crowds to Louise's cell to be fed. I asked the "Citoyenne" what she thought of the rat. She said that it was intelligent, incapable of attaching itself, she thought, to a human being, and more on the lookout for benefits to come than for past services, but family affection was strong in its heart. Young rate were 'not only kind but respectful to their aged relations and, indeed, to old rats in general. Mothers, directly they had weaned their little ones, not only brought them to Louise's cell, but placed them at her feet and seemed to ask her protection for them. There were rats toothless from age. When a crust was thrown to them younger rats chewed it, so as to enable them to eat it

When a crust was thrown to them younger rate chewed it, so as to enable them to eat it comfortably. If a young rat was so ill-bred as to help litself before an elderly one, the others were down upon it.

Before the cats had been taught to live in amity with the denizeus of the sewers. Moustache bit the paw off one of the latter. According to Louise Michel, there was quite an explosion of sympathy among her four-footed visitors on behalf of the wounded one, and she gained their confidence by letting it down with a string from her window into the court, after she had nursed it for about a fortnight. When she had been some time in juil the rate grew so dainty that they would jail the rats grew so dainty that they would not eat plain bread unless she got it toasted for them. The governor of the prison, who was meet kind to her, and who is a naturalist and un homme d'esprit, enjoyed her succes-ful attempts to bring cats and rats to live in amity and to tame the latter. She could amity and to same the latter. See containing mover domesticate them. No sconer had she fed them than they all climbed up the wall to the window and passed out thereby to return to their severs. Paris Cor. London News.

Was It a Case of Telepathy? The subject of telepathy or the action of one mind upon another, irrespective of dis-tance, is attracting attention in Philadelphia as well as in London. A singular incident occurred a few evenings since, which shows that if there is nothing in telepathy there is a least count him many in subsidience. Dethat it there is nothing in telepathy here is at least something queer in coincidences. Dr. J. J. Levick was sitting in his library talking with a friend, and incidentally the subject turned upon telepathy. He had been illus-trating it by anecdotes of what he had no-ticed in hospital practice, and in this way the subject of the great fire of 1850 in Phila-selnia was brought up. He stoke of the delphia was brought up. He spoke of the fact that it originated from the explosion of saltpetre in Brock's warehouse, and re-marked: "This gave rise to the question, will saltpetre explode?" He had not spoken or thought of this matter before for twenty

years.

The conversation reverting to telepathy, it was explained by saying: ."Now, if what we are talking about should be interesting to another mind, as there is nothing to suggest it, that would be telepathy. The conversation broke up about midnight, the friend going home and Dr. Levick retiring. The next day nome and Dr. Levick retiring. The next may each accidentally took up an evening paper and read the following paragraph: There used to be a much-vexed question in Philadelphia as to the explosive nature of saltpetre, growing out of the explosion at Brock's store, in Water street, in 1850. Now that a brewery has been blown up by an explosion of out meal, the old question process. the old question comes up in a new form:
"Will lager beer explode?" While they were talking some one, unknown to either of them, was penning the paragraph in question.—
Philadelphia Times.

Oddities and singularities of behavior may attend genius, but when they do, they are its misfortunes and blemishes. The man of true genius will be ashamed of them, or, at least, will never affect to be distinguished by them.

Ouida's English publishers pay her \$7,800 for each book she writes.

He Broke in His Successor A story they tell about Andrew Jeck, the veteran railway mail clerk. comes in well at this time, when they are making so many changes in the postal service. Jeck is the oldest rail-way clerk in Maine, and there are few if any, on the postal cars anywhere as old as he; yet he is active, efficient and as sharp as a letter of removal from Vilas. Years ago another fellow suc-ceeded in getting himself appointed to fill Jeck's place. Of course Jeck con-seated to make one or two trips with him to show him the ropes. It happened that on the first trip they made together there was an accident and the car was thrown from the track. Jeck caught firmly hold of his table when he felt the first jar and came out of the accident unscathed and not the least disconcerted. The novice was

flung into a heap into one corner and badly bruised. "Does this sort of thing happen very often !" he asked Jeck. "Oh, yes," said Jeck. "And I for got to tell you that we all have a place to cling to when it comes. You must have a holding place purposely fixed to get a stiff grip on with your hands."
The top of the car was much battered by time, and the new man asked, before he had gone much further on the route: "Mr. Jeck, what has made all

these scars in the top of this car?"
"That's nothing, said Jeck. "It's only where my heels have struck when I've been tossed into the air by accidents such as we have had this morn-

When they had finished their ran the new appointee said he guessed he had enough of it, and would go back to selling groceries for a living, and Jeck staid in the Railway Mail Service then and ever after."—Lewiston (Me.)

The population of London now ex ceeds every other city, ancient or mod-ern, in the world. New York and all its adjacent cities combined are not equal to two thirds of it. Scotland, Switzerland, and the Australian colon tes each contains fewer souls, while Norway, Servis, Greece, and Denmark have searcely half so many. Yet at the beginning of the present century the population of all London did not reach one million.

Over one million boxes of Acker's Dyspepsia Tablets sold in the past twelve months, purely upon their merits. Why suffer with Chronic Constipation, Dyspepsia, Sour Stomach, Sick Headache, Heartburn, and Female Troubles, when J. H. Mercer offiers you relief and positive cure in the y s pepsia Tablets. He sells them on

There are scores of persons who are suffering from some form of blood disorder or skin disease, such as Scrofula, Boils, etc., etc. After a practical test, J. H. Mercer asserts that Acker's Blood Elixir will certainly cure all such diseases, including Syphillis and Rheumatism. Itis not a patent nostrum, but a scientific preparation, he guarantees it.

assertion, which he can back with a SUNDAY ONLY.
