The erines of all the Fra Diavolos of Spain were successively passed in review, and if I did not dream of briganos that night it was because—the dinner having been very elaborate, and moistened with the best wine of the coun-try—my sleep, under this burning atmos-phere of Andalusia, was unusually pro-found. Before dinner the consul had kindly presented me to some of the nota-bilities of the cities, and to a countryman of ours, a rich capitalist held in high es-teem by both natives and French, who had invited me to visit him.

I asked him then if he him-self believed these extraordinary stories. "Assuredly," said he. "I have very good reasons to believe in brigands, for I have very often found myself in forced rela-tions with them. You know that I am the director of a lead mine in the Sierra Ne-vada's. Under my order's I have a large number of workingmen, who not only work in the mine, but relieve the hard-ships of that laborious toil and add to its profits by occasionally following another trade, smuggling, for example, or robbery on the highways. But as I am not charged with the duties of police outside my own with the duties of police outside my own works, and as everybody there does his duty, I never bother myself about what

After looking him over and hearing his request, proffered in the purest Castillian, I told him that the kind of work I had was hardly suited to the delicacy of his hands or the distinction of his manners and his person, and advised him to seek employment better suited to a man of his position. "I don't care how rough the work is," he answered. 'I must work for a living; I am out of work and absolutely without a sou."

"One evening, as I was taking the fresh air at the door of my hacienda. Samarilla unexpectedly appeared, shook my hand cordially, took a chair, rolled a cigarette, and told me what he was doing and how he was now the chief of the brigands. Let us allow the famous captain to speak for

We went into an inn at the edge of the bed of the Cocin, a little stream usually dry, where he ordered a sort of biscuit, which he placed in a glass of fresh water, making a drink that I found to be delicious. He took a like drink himself and then threw a piece of gold on the table. Without waiting for the change, we re-mounted, and at the next turn of the road my unknown shook my hand warmly,

In the family circle they are content to remain in the back-ground. The politeness which seems arti-ficial as they get older is with them grace-ful and natural, the genuine inspiration of an amable character. Gross Cruelty of Austrian Police. A great sensation was caused in the reichsrath at Vionna recently by a speech from one of the opposing members, Herr Kronawetter, who, in a discussion on the estimates for the state police service, ac-cused the police of gross cruelty in their treatment of suspected socialists and of political offenders generally. He said the object of the police was always to extort confessions from those whom they ar-rested, and for this purpose they practiced the most ruthless brutality and trickery, keeping their victims for months in prison without trial. for months in prison without trial. He cited the case of a workman who was arrested on suspicion of being con-nected with a clandestine printing office. After being months in jail, he was prom-ised pardon if he would confess, but the prombe was not kept for he was sen-tenced to three years' imprisonment on his own confession, while a certain Eduard Prady, related to a former Liberal cabinet minister, was condemned to twelve years' confinement for the same aftair. Herr Kronawetter declared that Prady's cell in confinement for the same affair. Herr Kronawetter declared that Prady's cell in the fortress of Pilson was only six feet long, and that the wretched man was go-ing mad. These revelations and others powerfully excited the opposition, who kept shouting: "It is infamous:" "It is slow murder" Count Taaffa, however, made no answer.—Vienna Letter. no answer.-Vienna Letter. Noted for His Benevolenes. The venerable Dr. Peabody, of Harvard, is noted for his benevolence. One warm day in summer he was coming into Bos-ton from Cambridge. He had just left the horse car and was hurriedly turning the sharp corner near the Revers house, when he came near colliding with an old gentleman. The elderly-looking individ-ual stood with his hat off wiping the per-spiration from his brow, but he held his hat in such a position as to give the ap-pearance that he was begging. Dr. Pea-body, seeing only the hat, dropped 35 cents into it with his customary kind re-mark. Dr. Oliver Wendell Holmes, who was holding the hat, put the 25 cents into his pocket, solemnly thanked Dr. Pea-body, and passed on .- Chicago Living Church.
