The question has been asked whether marriage license issued from one county authorizes the performance of the ceremony in a different county. From the plain language of the law it would appear that it does not. The Act of 1885 says that no person within this commonwealth shall be joined in marriage, until a license shall

have been procured from the clerk of the orphuns court, in the county whire the wirriage is performed.

The rule fixing Moday for the holding of delegate election ought to be changed at the coming County Democratic Convention. It is much more convenient for farmers to go to the polls on Saturday afternoon when their week's work is done, than it is on Catawissa last Saturday afternoon to play Monday when they must lose tnearly a half day, if they have any distance to travel, and thus a much larger vote can be got out on Saturday than Monday. Another objection to the present rule is that there is not sufficient time given between the election and convention to figure out the returns and ascertain the instructions. > An Important Discovery of Coal An important discovery of coal has been made at the Centralia collieries, operated

by L. A. Riley & Co. For some time past they have been prospecting for the mammoth vein, and have now struck it. The seam is one of the largest in the region, i being 35 feet in thickness. The coal is of excellent quality and will prove a big conanza to the operators. It will not be nined as is the custom but the vein will be stripped, thus saving the cost of sinking a dope and creeting a new breaker. The eoal will be taken to the old Centralia breaker, a distance of about 200 yards and there prepared for 'ie market.

The Canadian Thistle Pest.

The farmers of every community should sternly enforce the law of 24th April, 1885, forbidding all citizens from allowing the Canadian thistle to go to seed on their remises. It is one of the most pestilential weeds of all that now pollute the fields of the farmers, and it spreads from the thriftless to the land of the thrifty with earful rapidity.

The law of 1885 provides that any person holding lands by lease or otherwise, who shall allow the Canadian thistle to go to seed on their premises, shall be fined fifteen dollars, to be paid to the school fund of the district. Any citizen who is hkely to be injured by the spread of the pest from his neighbor's lands, may give notice to have the weeds cut before going to seed, and if not done, the Constable or Supervisor is required to enter upon the property, cut the weeds and can compel the payment of labor and costs from the holder of the polluted lands.

No average farmer or good citizen should require official notice from an officer to make him cut the Canadian thistle seems that the Secretary falled to attend to before it ripens its seed. A few hours' work at most would cut it on any average farm, and the holder of any land should cut it for his own protection. It is destructive of all crops when it gets rooted in fields, and its downy seeds are wafted hither and thither to pollute ell neighboring lands.

Supervisors of public roads are also required, by the new law, to cut the Canadian thistle on or along all roads or unseated lands in their districts, and in case of failure, they are liable to a fine of ten dollars, to be recovered for the use of the parties about to be injured by such neglect or refusal. The present is the time to destroy the Canadian thistle pest, and every occupant of land should wi'lingly and promptly obey the law .- Times,

This history is upon an entirely novel and original plan, which makes it indispersable to every person no matter how many other histories he may have.

It is arranged chronologically by years, from the discovery of America to 1884. Every event is narrated in the order of its date. These are not confined, as in other works, to political matters, but embrace every branch of human action. It describes under it proper date all important patents all discoveries in schene and the useful arts; the digging of canals and the building of railroads and telegraph lines; the founding of towns and the creetion of notable buildings and bridges; the first performances of plays and the first appearances of actors and singers; fires, floods, hall-storms, tornadoes, cyclenes, epidemies, acticents and disasters on sea and land; riots and crimes paints and business failures; "corters," and phenomenal prices in all markets; labor troubles, strikes and lock-outs, and hundreds of other matters never mentioned by historians, which are of the greatest importance to all who wish to understand the progress of their country. Beades being a history in the ordinary sense, it is a condensed newspaper file for four hundred years.
