Cincinnati Times Star. When cocaine was discovered the medical world exclaimed "thank heav-

ous, especially when its use is pervert ed from the deadening of pain for surgical operations, to the stimulation and estruction of the human body. Its first effects are soothing and captivating, but the thralldom is the most hor rible slavery known to humanity.

J. L. Stephens, M. D., of Lebanon O, was interviewed by our reporter yesterday at the Grand Hotel, and durng the conversation the doctor said The cocaine habit is a thousand time worse than the morphine and opium habits, and you would be astonished,' he said, "if you knew how frightfully the habit is increasing.

"What are its effects ?" "It is the worst constitution wrecker ever known. It ruins the liver and kidneys in half a year, and when this work is done, the strongest constitution

soon succumbs." "Do you know of Dr. Underhill's

case here in Cincinnati ?" "That leading physician who be-Yes. His case was a very sad one, but the babit can be cared. I have rescued many a man from a worse con

"What, worse than Dr. Underbill's?" "Indeed, sir, far so. Justin M. Hall A. M., M. D., president of the State Board of Health of Iowa, and a famed practitioner, and Alexander Neil, M. D. professor of surgery in the Columbus Medical College, and president of the Academy of Medicine, a man widely known, Rev. W. P. Clancey of Indian apolis, Ind., from personal experience in opium eating, etc., can tell you of the kind of success our form of treat-ment wins, and so can H. C. Wilson, formerly of Cincinnati, who is now associated with me."

"Would you mind letting our read ers into the secret of your methods? "Well, young man, you surely have a good bit of assurance to ask a man to give his business away to the pub-lic; but I won't wholly disappoint you. I have treated over 20,000 patients. In common with many eminent physi cians, I, for years made a close study of the effects of the habits on the sys tem and the organs which they most severely attack. Dr. Hall, Dr. Neil and Mr. Wilson, whom I have men tioned, and hundreds of others, equally as expert, made many similar experiments on their own behalt. We each found that these drugs worked most destructively in the kidneys and liver in fact finally destroyed them. It was then apparent that no cure could be effected until those organs could be restored to health. We recently exhausted the entire range of medical science experimenting with all known remedie for these organs, and as the result of these close investigations we all sub-stantially agreed, though following different lines of inquiry, that the most reliable, scientific preparation, was Warner's safe cure. This was the second point in the discovery. The third was our own private form of treatment, which, of course, we do not divulge to the public. Every case that

habit is nourished and sustained in the liver and kidneys. The habit can be kept up in moderation, however, if free use also be made, at the same time, of that great remedy." "Yes, it is a world famed and justly celebrated specific! Like many other physicians, I used to deride the claims made for it, but I know now for a fact that it is the world's greatest blessing having sovereign power over hitherto incurable diseases of the kidneys and liver, and when I have said that,

we have treated first with Warner's

safe cure, then with our own private

treatment, and followed up again with Warner's safe cure for a few weeks,

has been successful. These habits can't

be cured without using it, because th

young man, I have said nearly everything, for most diseases originate in, or are aggravated by, a deprayed condition of the kidneys." "People do not realize this, because, sin gular as it may seem, the kidneys may be in a very advanced stage of decompo sition, and yet owing to the fact that there are but few nerves of sensation in them the subject will not experience much pain therein. On this accounthousands of people die every year of kidney disease unknowingly. They have so called disorders of the head, of the heart and lungs and stomach, and treat them in vain, for the real cause

if they were restored to health the other disorders would soon disappear." Dr. Stephens's experience, that can be confirmed by many thousands whom he has treated, adds only more emph sis to the experience of many hundreds of thousands all over the world, that the remedy he refers to is without any doubt the most beneficent discovery ever given to humanity.

Enormous Beer Consumption-

Consul Tanner, of Chemnitz, reports to the Secretary of State that the beer production of Germany in 1885 was 1,100,000,000, gallons, enough "to form a lake more than a mile square and six and a half feet deep, or it would make a running stream as large as some of our rivers." He says the consumption of intoxicants in Germany per head is four times as great as in the United States, yet there are a thousand helpless drunkards in the United States to ten in Germany. The difference arises largely, he says, if not entirely, from the manner of drinking in vogue in the two countries.

"This science of drinking," he writes. "consists simply in the tardiness of drinking. All drinks are taken sip-by sip, a half or three-quarters of an hour being consumed for a glass of beer. This is so ample that one is liable to ridicule for laying stress upon it, and yet upon this one point hinges, in my opinion, a question of vast importance

"By this manner of drinking the blood is aroused to greater activity in so gradual a manner that there is no violent derangement of the animal economy. By slow drinking the Ger man accomplishes the object of drinking, and gives his animal economy chance to say 'Hold ! enough !" which

only slow drinking will do. Mr. Tanner says that since his a rival it. Germany, he has his "first glass of water to see drank."

A Question of Weather. The weather is not yet cold enough to make visitors leave your office door open.—New Orleans Picayune.

When Prudence fair was in her teens She was as slender as a reed, And many men possessing means Admired her waist—'twas slim indeed.

But years have rolled; the maid's grown fat And she is rather past her prime. Her shapely waist is so changed that I've heard it called a waist of time. She Strove to Make Him Happy Mrs. Yerger was dressed to go to the ball.
She had on her new dress.
"You look stunning in that new dress, but,
great Cæsar! what a lot of money it costs
these hard times," remarked Col. Yerger.
"Lor", Charles, what do I care for money when it comes to making you happy," replied Mrs. Yerger with a beaming smile -- Texas
