Scientific Truth.

REGARDING THE FUNCTIONS OF AN IM-PORTANT ORGAN.

OF WHICH THE PUBLIC KNOWS BUT LITTLE WORTHY CAREFUL CONSIDERATION. To the Editor of the Scientific

American : Will you permit us to make known to the public the facts we have learned during the past 8 years concerning disorders of the human Kidneys and the organs which diseased Kidneys so easily break down? You are conducting a Scientistic paper, and are un-prejudiced except in favor of Taurn. It is needless to say, no medical Journal of "Code" standing would admit these facts, for very obvious

H. H. WARNER & CO. Proprietors of "Warner's Safe Cure."

That we may emphasize and clearly explain the relation the kidneys sustain to the general health, and how much is dependent upon them, we propose, metaphorically speaking, to take one from the human body, place it in the wash-bowl before us and examine it for the public benefit.

You will imagine that we have before us a body shaped like a bean, smooth and glistening, about four inches in length, two in width, and one in thickness. It ordinarily weighs in the adult male, about five ounces, but is somewhat lighter in the female. A small organ? you say. But understand the body of the average size man contains about ten quarts of blood, of which every drop passes through these filters or seivers, as they may be called, many times a day as often as through the heart, making a complete revolution in three minutes. From the blood they separate the waste material, work ing away steadily night and day, sleeping or waking, tireless as the heart itself, and fully of as much vital importance; removing impurities from sixty-five gallons of blood each hour, or about forty-nine barrels each day, or 9, 125 hogshead a year! What a wonder that the kidneys can last any length of time under this prodigious strain, treated and neglected as they are? We slice this delicate organ open lengthwise with our knife, ard will

roughly describe its interior. We find it to be of a reddish-brown color, soft and easily torn; filled with hundreds of little tubes, short and thread-like, starting from the arteries, ending in a little tuft about midway from the outside opening into a cavity of considerable size, which is called the pelvis or, roughly speaking, a sac, which is for the purpose of holding the water to further undergo purification before it passes down from here into the ureters, and so on to the out-side of the body. These little tubes are the filters which do their work automatically, and right here is where

the disease of the kidney first begins Doing the vast amount of work which they are obliged to, from the slightest irregularity in our habits from cold, from high living, from stimulants or a thousand and one other causes which occur every day, they be-come somewhat weakened in their nerve force.

What is the result? Congestion or stoppage of the current of blood in the small blood vessels surrounding them, which become blocked; these delicate membranes are irritated; inflammation is set up, then pus is formed, which collects in the pelvis or sac; the tubes are at first partially, and soon are totally, unable to do their work. The sac goes on disten corruption, pressing upon the blood vessels. All this time remember, the blood, which is entering the kidneys to be filtered, is passing through this terrible disgusting pus, for it cannot take any other route!

Stop and think of it for a moment you realize the importance nay the vital necessity, of having the kidneys in order? Can you expect when they are diseased or obstructed, no matter how little, that you can have pure blood and escape disease? It would be just as reasonable to expect, if a pest house were set across Broadway and countless thousands were compelled to go through its pestilential doors, an escape from contagion and disease as for one to expect the blood to escape pollution when constantly running through a diseased kidney.

Now, what is the result? Why, that

the blood takes up and deposits this poison as it sweeps along into every organ, into every inch of muscle, tissue, flesh and bone, from your head to your feet. And whenever, from hereditary influence or otherwise, some part of the body is weaker than another, a countless train of diseases is established, such as consumption in weak lungs, dyspepsia, where there is a delicate stomach; nervousness, insanity, paralysis or heart disease in those who have weak nerves.

The heart must soon feel the effects of the poison, as it requires pure blood to keep it in right action. It increases its stroke in number and force to compensate for the natural stimulus wanting, in its endeavor to crowd the im pure blood through this obstruction, causing pain, palpitation, or an out ofbreath feeling. Unnatural as this forced labor is, the heart must soon falter, becoming weaker and weaker until one day it suddenly stops, and death from

apparent "heart disease" is the verdict. But the medical profession, learned and dignified, call these diseases by high sounding names, treat them alone and patients die, for the arteries are carrying slow death to the affected part, constantly adding fuel brought from these suppurating, pus-laden kidneys which here in our wash-bowl are very putrefaction itself, and which ald have been cured first.

But this is not all the kidneys have to do; for you must remember that each adult takes about seven pounds of nourishment every twenty-four hours to supply the waste of the body which is constantly going on, a waste equal to the quantity taken. This, too, the kidneys have to separate from the blood with all other decomposing matter.

But you say, "my kidneys are all right. I have to pain in the back."
Mistaken man! People die of kidney
disease of so bad a character that the organs are rotter, and yet they have never there had a pain nor an ache!

Why? Because the disease begins, as we have shown, in the interior of the kidney, where there are few nerves of feeling to convey the rensation of pain

Why this is so we may never know. When you consider their great work the delicacy of their structure, the case with which they are deranged, can you wonder at the ill health of our men and women t Health and long life cannot be expected when so vital an organ is Non wonder some writers my we are degenerating. Don't you see the great, the extreme importance of keeping this machinery in working as a star. She would rather become the leading member of a strong stock company than to play a "one part piece." Her plays than to play a "one part piece. Her plays have selected for intrinsic strongth, and, though den disease is? It is lurking about us Could the finest engine do

constantly, without giving any indica-

tion of its presence.

The most skillful physicians cannot detect it at times, for the kidneys them selves cannot be examined by any means which we have at our command. Even an analysis of the water, chemic ally and microscopically, reveals nothing definite in many cases, even when

the kidneys are fairly broken down.

Then look out for them, as disease, no matter where situated, to 93 per cent., as shown by after death examinations, has its origin in the breaking down of these recreting tubes in the interior of the kidney

As you value health, as you desire long life free from sickness and soffer ing, give these organs some attention. Keep then in good condition and thus prevent (as is easily done) all disease.

Warner's Safe Cure, as it becomes year after year better known for its onderful cures and its power over the kidneys, has done and is doing more to increase the average duration of life than all the physicians and medicines Warner's Safe Cure is a true known. specific, mild but certain, harmless but

nergetic and agreeable to the taste. Take it when sick as a cure, and never let a month go by if you need it, without taking a few bottles as a preventive, that the kindeys may be kept in proper order, the blood pure that health and long life may be your bless-H. H. WARNER & CO. ing.

CHURCH NOTES.

It is stated that Methodist mishave made 10,000 converts in Sierra Leone,

Sunday, Nov. 7, will be specially observed as a day of prayer for foreign missions throughout the world. Dr. William Dean, after service for fifty

years as a missionary in China, has just re-turned to Portland, Me. The annual meeting of the board of educa-tion of the Methodist Episcopal church will be held in New York on Wednesday, Nov. 10.

Methodist leaders are discussing the advi-sability of holding a convention of Methodists from all parts of the world, in this country in 1891. Ex-Secretary of War Robert Lincoln has offered to give the new Episcopal church, known as "Lincoln Memorial," in Chicago, a

ge and elegant Bible presented to his ner during his presidency of the United The joint anniversaries of the Sunday The joint anniversaries of the Sunday School union and of the Tract Society of the Methodist Episcopal church, will be held in St. Louis, Mo., Nov. 19-21. Bishop Bow-man, president of the societies, will preside, and several distinguished clergymen and lay-men will take part in the exercises.

Three years ago there were no German Congregational churches in any of the large cities of the west. Now there are churches in St. Louis, Chicago, Omaha and a promising mission in Kansas City. Thirteen German Congregational churches have been organ ized in Dakota, and in the Scandinavian de

partment more than twenty missionaries are at work. missionary societies represented in India, writes the editor of The Star of India, to The Independent, besides ten or more pri-vate missions. All branches of the church are represented. Europe and America, Great Britain, the continent, the United States and Canada. According to the statistical summary for 1885 there were 107,504 communi cants representing the fruits of these missions

COLLEGE NOTES Harvard has nine more-students this year

There are twenty more students at Bow Professor Gray, of Harvard, has contrib-uted over 100 plants to the conservatory of Vassar, which is now being filled.

An intercollegate press association has been formed by Harvard, Princeton and Yale, whereby the daily papers of these col-leges are to have telegraphic news on sports and matters of general interest.

Senator Allison, of Iowa, and J Carthy will lecture to the Yale students on the currency question. The students at Yale all recognize the need of a greater circulat-ing medium, says The New York World. The preliminary catalogues of Yale col-lege show that there are representatives from thirty-six states and territories and eight

foreign countries among the students. Con-necticut sends 256, the largest number from Professor Dwight, Yale's new president, is rapidly getting a reputation for witty and humorous speech making, and if he keeps on at the present rate it won't be long before New York will be trying to import him for

a place beside Chauncey M. Depew and

Dr. S. Weir Mitchell's novel, "Roland Gen. Francis A. Walker has almost finished

a book of his war experiences. "Katy of Catoctin," George Alfred Town-send's new novel, will be issued soon. A "Life of Mark Twain," by Will Mont-

gomery Clemens, an author of some note, will appear shortly. Charles Dickens' son has re-edited "Pick-

wick," adding three addresses published with the original number. Col. T. W. Higginson has written a novel, "The Monarch of Dreams," It is said to be a queer study of brain action.

Miss Braddon has written a new novel en-titled "Mohawks." The scene is laid in Lon-don in the times of Walpole and Bolingbroke.

Rev. William Burnet Wright, of the Berkeley Street Congregational church, Hoston, has just published through Houghton, Mifflin & Co., a book on "Ancient Cities," most of them eities of the Bible.

Dr. George Brandes' new book on "Eminent Authors of the Nineteenth Century" has been translated by the Hon. R. B. Anderson, our minister to Denmark, and the translation will be published shortly.

"Mr. Life" is the life of the forbespiele.

"My Life" is the title of the forthcon

autobiography of Liszt. It is reported that "he has delineated with considerable vigor the faults and folicies both of his enemies and of his friends. The book is full of portraitsketches of 'men of the time,' but there is said to be not a breath of scandal in it."

PLAYERS AND PLAYHOUSES.

Fanny Davemport is playing "Fedora"

hans" for the eleventh season. She has or-ered a new play from D'Ennery. Fay Templeton is still in London trying to in a new piece to be brought out at the

Gaisty the first of the year. It is intimated that Joe Jefferson will withdraw from the stage shortly and pass the re-mainder of his life in the enjoyment of his

James Barton Key is going to bring out "Jack," Mrs. Harry Beckfet's play, in New York. It has had a great success in Landon, and Mr. Key is very sanguine about it. Myra Goodwin has 8,610 of the drummers of the country on her free list. They work up a boom for her wherever she plays "Sis," and this novel advertising scheme is turning her in a lot of money.

The Boston Ideal Opera company is all torn up by a quarrel between the two leading ladies—Miss Huntington and Mile Lablache—and if Managar Foster cannot reconcile them one or the other will have to retire.

Mr. Dion Boucienult is playing "The Jilth in New York. It is said to be the freshest of the many plays he has produced and all the plot is inferior. The play is diverting enough to make a pleasant evening's enter-

Mr. Henry Irving will visit this country again next September, bringing with him Mr.
Wills version of "Faust," which is acknowlodged by all who have seen it in London to
be the finest production in a speciacular sense
ever seen on the stage.

Lawrence Barrett is a busy man this sea-sess, directing as he does his own and the tour of Edwin Booth and acting seven times each week himself. He contemplates pro-ducing a new play, by George H. Boker, in Washington in a few weeks.

Madame Modjeska proposes to sink larself

MEN AND WOMEN OF LETTERS. Gea, Lew Wallace's "Ben Hur" has reached

sale of 115,000 copies Rhea has agreed to write a magazine arti-ele on French and American actresses. Mrs. Louise Chandler Moulton is back from

tive educational duties on a pension of \$7,500 Hon. Andrew D. White is said to have the

finest historical library in the country. It numbers over 30,000 volumes besides many Thomas Bailey Aldrich will be 50 years old on Nov. II. Half a century has fallen easily on the author's shoulders and he scarcely looks to be more than 40.

W. D. Howells is going abroad next year and will remain two years in Europe. His son will go with him, and will be placed in the Polytechnic school at Paris. "Adirondack" Murray has given up his Montreal restaurant and is going to devote himself entirely to authorship and lecturing. He says he will never enter political life as he

has no taste for it. He hasn't been asked to Ella Wheeler Wilcox has written a poem entitled "Two Sinners," and Mrs. James Brown Potter expects to recite it. In this way she will add to the fame she achieved by reciting "Satler Joe." Mrs. Potter will win-ter in France.

Mr. Bancroft, the aged historian, is very simple in his habits. He goes to bed early and sleeps for eight or nine hours. He works about four hours a day, and occupies the rest of his time driving or walking with his granddaughter. Miss Susannah, who lives with him in a great brown stone house

CURIOUS THINGS IN LIFE.

They are teiling the old story of sparrows killing a cat again. This time it comes from Galena, Ills.

Tom Acrefoot is the appropriate name of a man in Key West whose feet are 10 inches long and 0% inches wide. His mother was

A curious wedding eeremony took place in Nicholasville, Ky., the other day. Miss Car-rie, a deaf mute, daughter of Dr. F. M. Jas-per, was married to Prof. M. C. Clewer, of the Danville Deaf Mute institution. The ceremony was performed in sign language by Profs. W. K. Argo and G. T. Schoolfield.

The light from an electric lamp tower in Daverport, Ia., falls full upon a flower gar-den about 100 feet away, and during the past summer the owner has observed that lilies which have usually bloomed only in the day have opened in the night, and that morning glories have unclosed their blossoms as soon as the abevire light, fall on them. as the electric light fell on them. Miss Rosa Fenton, of Crittenden county.

Ark., was recently bitten in the left hand by a huge cotton-mouth snake. She seized an ax near by, iald her wounded hand on a block of wood and chopped the bitten finger off at a single blow; then she ran into the house, swallowed half a tumbler of whisky and fainted. She recovered in about two

A correspondent writes that in a gambling a correspondent writes that it a gambling saloon in Moscow the walls and ceiling were covered with paper on which stars were stamped. Among the stars in the ceiling holes were cut, and a man lying on the floor in the room above saw the hands of those playing cards and telegraphed them, by means of wires connected with his shrees, to means of wires connected with his shoes, to

CREATION'S LOWER ORDERS.

A snake entered the house of Burt G, Smith, at Kissimmee, Fla., entered the bird eage through the wires, and after swallowing the canary coiled up in the bottom of the eage to take a nap.

An engine of the "camel back" type, used by the Pennsylvania road, has been on exhibition on the Consolidated road, and has taken several trains over the road. Once the feed pipe seemed to be choked up. At Bridgeport the pipe was opened, and after the water was drawn off a two-foot eel came squirming

in Sacramento the other day. Instantly the snake struck it, and in a moment the rat turned over and died. The next day another rat was put in the box, and although his ratship provoked the snake to bite him several times, continued as lively as a cricket, and when released ran away none the worse for

John Burdick, employed on a Ridgefield (Comi.) farm, was picking up apples for the cider mill about four weeks ago. One, mel-lower than the rest, tempted him, and he bit out a big mouthful. With it came a bee, which stung him on the tongue. The tongue swelled up, and for two days he was consweller up, and for two days he was con-stantly nauseated. Then the swelling went down. Since then every time he bites an apple his tongue feels just as though a bee was stinging it. Two or three days ago he made up his mind to eat an apple, any way. He tried to, but the tongue swelled up again and the nausear returned. and the nausea returned.

An interesting battle recently took place between a rat and a garter snake at Visalia between a rat and a garter snake at Visalia, Cal. The rat was cautious but quick, spring-ing with lightning jumps upon the snake and burying its teeth in the serpent's body. The latter would coil and dart forward frequent-ly, knocking the rat over on its back. Once the rat caught the snake's head and held it until the latter, coiling about its body, squeezed it so rightly that it was forced to let go. Finally the rat, by biting his antag-onist through the neck several times, severed onist through the neck several times, several its head, and dragged its body in victory

That rheumatism and neuralgis are so prevalent? This question has not been satisfactorily answered, but it is certain that these diseases are not only the most painfal but among the most common, and some member of nearly every family in the land is the victim of one of these dread tormentors. Ladies seem to be peculiarly liable to neuralgic attacks, which, in the form of neuralgic headache, pain in the back, or nervous pains are of constant occurrence. Not until the discovery of Athlophoros had any remedy been found for either rheumatism, neuralgia or nervous headache, and they were generally conceded to be ineurable, but Athlophoros has been proved to be not only a certain cure for these discusses, in all their varied forms, but a safe remedy. If, in the use of Athlophoros, he bowels are kept freely open, its success is certain, and to aid this, Athlophoros Pills are recommended, which, while providing the necessary cathorite, will be found to be a valuable aid to the action of the medicine. Athlophoros is no experiment, it has been tested and has proved its wonderful efficacy.

The Athlophoros Pills were originally propared as a remedy for us in connection with Athlophoros, for rheumatism and neuralgia and kindred complaints. Used in connection with that remedy, they are a certain cure for either of these very common and distressing diseases. They have also been found to be an invaluable remedy for any and all diseases orising from vitiated blood or general debility. They are especially valuable for nervous debility, blood poisoning, dyspepsia, distress after eating, healache, constipation, loss of appelite, and all stomach or liver troubles. For diseases of women, they are invaluable. These pills are perfectly harmless and may be safely used by adults or children.

Every druggist should keep Athlophoros and Athlophoros Pills, but where they cannot be bought of the druggist, the Athlophoros pills, but where they cannot be bought of the druggist, the Athlophoros pills are of the pills. send either (carriage paid) on receipt of regular price, which is \$1.00 per is told for Athlophores and 50c. for Pills.

Having struggled 20 years between life and death with ASTHMA or PHTHISIC, treated by eminent physicians, and receiving no beneut. I was compelled during the last 5 years of my illness to sit on my chair day and night gaspling for breath. My sufferings were beyond description. In despair I experimented on myself by compounding roots and herbs and inhaing the medicine thus obtained. I fortunately discovered this WONDERFUL CURE FOR ASTHMA AND CATARRIH, warranted to relieve the most stubborn case of ASTHMA IN FIVE MINITES, so that the patient can lie down to rest and sleep confortably. Please read the following condensed extracts from unsolicited testimonnis, all of recent date:

Oliver V. R. Holmes, San Jose, Cal., writes: "I find the remedy all and even more than represented. I receive instantaneous reliet."

E. M. Carson, A. M., Warren, Kansas, writes: "Was treated by cained the climate of different states—nothing afforded relief like your preparation."

T. E. dates, County Treasurer, Philadelphia, Miss., writes: "Have used the homely. Would not live without R. Fvery one that uses it recommends it."

L. B. Phelps, P. M., Griggs, Onio, writes: "Suffered with asthma 40 years. Your medicine in a minutes does more for me than the most eminent physician did for me in three years."

II. C. Plumpton, Joilet, Ili, writes: "Send Catarri Remedy at once. Cannot get along without it, I find it to be the most valuable medicine."

We have ever tried."

Geo. W. Brady, Nelson Co., Ky., writes: "I am using the remedy. Gained 8 pounds in 3 weeks, would not be without it."

We have many other hearty testinonials of cure or relied, and in order that all inflerents from Ashma, Catarrh, Hay Pever, and kindred diseases may have an opportunity of testing the value of the Remedy excellent. Could not live without it."

We have many other hearty testinonials of cure or relied, and in order that all inflerents from Ashma, Catarrh, Hay Pever, and kindred diseases may have an opportunity of testing the value of the Remedy excellent. Having struggled 20 years between life at leath with ASTHMA or PHTHISIC, treated be minent physicians, and receiving no benefit,

Provoked Him to Smile.
"I wish you were good and helpful around the house like Mrs. Jones's bushand," and Mrs. That drunken fellow Jones!

"Yes, that drunken fellow Jones. He's kind to his wife, anyhow, so he is. He helps her on wash days ever so much." "Oh, he does, does he?"
"Yes, he does, does he. The other day Mrs.
Jones was telling me that he didn't have any money to get a drink with and he took some of the clothes and put them to seak, and that's more than you'd ever do for me, so it

And Smith just sat and grinned.—Mer-chant Traveler. He's Gone Till Next Season. The waves break on the shore with suffer sound,
And the beach is tone and drear,
And the sea serpent won't be seen around
Until another year.

Beatin Course.

"That's a nice dinner," said the woman to the tramp, "but why don't ye set down while ye cut it." "Set down?" repeated the tramp: "madar I was a street car driver until I got too tared to ride, an' I wouldn't know how to ent if I had to set down to my mostle" - New York

A Little Mixed. She—Do you not think, Mr. Blank, that Miss Coldcosh is a very plain person? He (absent mindedly)—Yes, indeed: I think she is the bomeltest girl I ever saw, present company, of course, always er—um—that is, yes; she is certainty a very plain person. Are you lawn tennising any this season, Mise Jonesi-Columbia Spectator.

He's New Searching for Gour. A young thing of about twenty-four, Of the "genus home" called bour— Once threatened to guage A Boston mail's augo, And straightway was shown to the dour.

The Last Resort. Theatrical Manager—You must do some thing to attract attention or we can never draw a crowd. Have you a husband? Burlesque Actress—No.

"Admirers, perhaps?"
"No; I won't be bothered with them."
"Well, the lost diamond and lost dog scheme
has run out. What shall we do?" "I have it. I will advertise that I have lost every stitch of my stage wardrobe,"—Omaha World.

Hushand lets the contarryone In the celiar, dark and dim-Cont, as well his wifey knows,

He Exposed Himself.

Chawley-Aw, Gussy, old boy, wheah have you been! Pawsitively, I haven't seen you in three whole days.

Gussy—Aw, I've had a most dweadful cold.

I was almost niwaid to come out to-day.

Chawley—You don't say, old fel! How did you catch it!
Gussy-1 went out without my glasses, don't you know. - Pittsburg Chronicle

A Forcible Illustration An Arkansas man made a ballet out of a piece of plug tobacco and shot if through the body of a wildest. The animal died. Here fatal effects of tobacco on the system.-Mo ristown Herald.

Now are the days when the instand yearns
For the "piping times of peace" afar,
As, wrestling with store joints, he learns
These are the piping times of war.
