It seems strange that when a proprietary medicine is doing the good that Warner's safe cure is that the physicians do not publicly endorse it. Many of them, we are told, privately prescribe it.

trelieved him of responsibility.

To-day when prominent people are dying (and hundreds of thousands of common people die of the same disease)
we are told that doctors disguise the fact that it is Bright's disease of the kidneys and say that they die of paralysis, of apoplexy, of pneumonia, of consumption, of general debility, of rheumatism, of heart disease, of blood poisoning, or some other of the names of the direct effects of kidney disease. They are not the real disease itself.

We sometimes wonder if they avoid stating the real cause of disease for fear they will drive the public into patronage of the only scientific proprietary specific for kidney diseases and the thousand and one diseases that originate in inactive kidneys. We do not believe every advertise

then learns the fearful tenacity of its grip and the utter powerlessness of the ordinary remedies to give relief.

Probably to no disease have physicians given more study, and none has more completely baffled their efforts to provide a specific; and until Athlophoros was discovered there was no medicine which would surely cure rheumatism, neuralgia and nervous or sick headache. Thousands of testimonials like the following prove beyond question that Athlophoros is the only reliable remedy, and that it will do all that is claimed for it.

I can recommend the Athlophoros to anybody that is in want of it. It has cured my mother who has had neuralgia all her life and also rheumatism. She says she is all free from pain now, and will not be without a bottle for twice the price. I gave a bottle to my brother who had neuralgia in the bowels and it fixed him in a few days.

Two years ago this Summer I was sorely
afflicted with rheumatism in my right knee

friend to try Athlophoros. I used five
bottles, got well, and have been comparatively free from rheumatism since. I have
great faith in it, and have recommended it

have tried it speak its praise.

J. D. McHenry; Supervisors, E. R. Lauderbach, Scott M:Henry; An official test of the steam heating apparatus, as applied by the Milwaukee and St. Paul, was made last week upon that company's short-line train, which runs between St. Paul and Minneapocraft, and St. Paul and Minneapocraft. The device consists of the use of exhaust steam from the dome of the engine, carried through pipes underneath the engine and cars, with a flexible coupling between each car. This ible coupling bet ween each car. This pipe connects in the centre of each car with radiating pipe on each side with a branch under each seat. The pipes are so inclined that water connsed from the steam escapes from the bottom of the car. The test seemed to be perfectly satisfactory, the thermometer registering eighty de-grees within the car, while outside it stood at zero, with a pressure of six pounds to the square inch inside the car. The heat was distributed equit dryness which is ordinarily experienced in day coaches when heated by stoves.
