The report of the Department of Agriulture for May leaves much to be desired as to the condition of the crops, and from various causes it seems plain that the yield in all the States, and for nearly all kinds of crops, will be inferior to that of last year. Wheat will be nearly ten per cent. lower, while rye has fallen off four per cent. and barley ten per cent. It is a sombre outlook, but in a country which pro duces more than it can possibly consum there is no such terror in a falling off of
