A Great Game.

After a whole summer of victories the comsburg base-ball nine has at last suffered a bad defeat at the hands of the Watsomown club. Last Saturday a good-sized the Spring with a few fish about six inches crowd gathered at Athletic Park to witness the game between these two nines, and an exciting game was expected, as the Wat sontown club has a good reputation, and the home nine has been playing so well all summer. However, the spectators were destined to be disappointed.

GRORGE A. CLARK, P. M. The first inning, the opposing nine "got batting, which considerably rattled our boys. This would not have been done if Heist had been pitching his ordinary game. However, Bloom succeeded in scoring two runs this inning. The whole game through the playing of the nine in the field was simply horrible, error upon error being made; Shaffer, of Bloomsburg, introduced Carp spectators turned their heads away and into his ponds a few years ago, and is so groaned, while some left the grounds in dis-gust. The Watsontown nine played a fairly clearing the pond of all other fish, and will and secured enough funds to meet all ex- good game, but there is no doubt that if our nine had played their usual game, they would have defeated the Watsontowners. the Report of the Commissioners of Fishwhole indebtedness provided for. The services Sunday afternoon were conducted playing on the part of our boys were litterested in raising these fine fish, or who checks, obscure checks, mixed Also full lines of plush coats, wraps and by Rev. Mr. Baumgardner of Danville. A | Hagenbuch's three bagger, Shaffer, Sylvis, choir of mostly female voices came down and Housel's two baggers, and the flies from Light Street to assist in the music, caught by Boice and Winner. Boice also knocked several good flies, but was unluckily caught out. Have was the only exception to the rule of general poor playing. He played a splendid game, from first to last, but it was useless while enclose the building with a suitable fence. the rest played so poorly. It was, without exception, the worst game of ball we ever had the misfortune to witness.

The score by innings stood as follows, only five innings being played, as the Watsontowners had to take the 4.18 train

The boys had better redeem themselves the next game they play, or they will lose

the good reputation they have gained this Deficate persons, and all whose systems have become debilitated, should bear in mind that Simmons Liver Regulator is not a drastic, purging medicine, does not weaken or deplete the system as other purgatives do, but acts gently. It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will promote digestion, dissipate headache, and generally tone up the system.

Which it seeks in the mud Although not carcivorous, it is by no means an epicure in its tastes, being easily satisfied with the refuse of the kitchen and dairy.

The peculiar habits of the Carp are worthy of mention in this connection. In the latitudes of Pennsylvania, they generally, at the beginning of the cold season, resort to the deeper portions of the waters they inhabit, where, if the bottom is muddy, they spend the Winter; if not in a torpid state, at least far from being as active as in Summer.

As soon as the Carp leaves its Winter quarters it begins an earnest quest for food.

Hon. Alex. H. Stephens, of Ga., says: Simmons Liver Regulator is mild and suits me better than more active remedies."

The Milton Fair. GREAT PREPARATIONS MAKING FOR A FINE

The Third annual exhibition of the Mi ton Driving Park and Fair Association will open on Wednesday, Sep. 28th and continue four days. The management are putting forth every effort to make it a grand success in every respect. The premium list has been revised and enlarged, many additions having been made thereto. New features have been adopted and in addition to the exhibits of agricultural, horticultural and mechanical products, a number of choice attractions, including the world-renowned Myrtie Peek Combination with their matchless running horses, have been secured. The sum total of premiums announced aggregates seven thousand dollars, of which fully \$1850 will be paid for trials of speed. Already many noted horse-men have signified their intention of being present to enter the contest, and some fine trials of speed may be expected. Taken all in all, the coming exhibition promises not only to be the largest but the finest and grandest ever held in this part of the State. Excursion rates over all ratiroads running to Milton. The trains

of the Pennsylvania railroad stop at the grounds.

An Extraordinary Arenic Display. One would think that a complete and enjoyable Circus and Menagerie embracing a full company of performers of recogniz ed merit and a comprehensive Menagerie, exhibited for only Ten and Twenty Cents Admission, would be beyond the range of possibilities. Yet Miller, Stowe & Freeman are giving such a show and are doing it every day. In their posters and circulars they explain how it is done and their exnations are convincing to the most skeptical. James Robinson, the champlor bare back rider of the world, and the only James Stowe, the great hurdle and four horse rider, are with this circus. Their

A tew years ago public notice was difood fish which were fast being driven out of our fresh waters. The building of dams across our streams and polluting the water with sewers and refuse from the mines has driven all the native fish into other sections. treams were stocked with bass and brook rout, but there are so many fishermen who have no regard for the laws enacted for the protection of fish that the stocking of the streams has not reached the purpose intended. Another difficulty is that the bass, trout and pike are destructive fish and will destroy the small fish and thus retard propagation. They also inhabit running water, and therefore it is with difficulty they can be kept in one location. It therefore became necessary for our Fish Commissioners to look about and see if a fish could be obtained that would overcome these objections. At last the German Carp was discovered and a few brought to this country for experiment. The experiment proved a valuable one and soon the Commissioners began distributing them in various states. They seemed to thrive everywhere and the farmers attention was d a-cted to raising these valuable fish. They are rapid growers and have reached as high as twenty-five pounds. Farmers soon learned that they could raise these fish with less outlay of labor and capital and with greater profit than they could raise poultry or pigs. The fish inhabits pools or ponds and do not like running streams They thrive the best in ponds with deep muddy bottoms, they are not a destructive fish and are rapid growers. These fish are sent out in a limited number to any who will manifest enough Interest to put them in a pond. The Secretary, H. H. Derr, Wilkes-Barre, or Corresponding Secretary, A. M. Spangler, 329 Commerce street, Phil adelphia, will cheerfully give any information on the subject. During 1885 and 188 nearly 15,000 fish were sent out from the Fisheries and have been placed in nearly every county in the state. At Numidia, Locust township, Mr. Bame has large ponds, where he supplies the farmers with whatever size they may want, from two inches up as high as two feet. It is said that he has one that will weigh about 15 pounds. His ponds are but a few years old, and show how rapidly the fish grow. Careful estimates place the number of fish in his pond at over one million. In Mifflin township Adam Miller was the first to se cure any fish, but he placed them in with other fish and he has not been so success ful. Mr. D. C. Bond stocked a pond is long and he thinks they will now weigh nearly three pounds and are over a foot long. In the early Spring Mr. William an old pond and placed in it one Carp abou six inches long and over one hundred abou two inches long-the smaller ones are nov about six inches long and the large on on" to Heist's pitching and did some heavy over a foot. He has also built two more ponds which he expects to stock this Fall He will put in over one thousand of the

same fish. With this addition he thinks that the natural growth will be more than the ponds can accommodate and that be will have many carp for sale. Mathias

only raise the Carp in the future. The following information is taken from

"The Carp is partial to quiet, and ever stagnant waters. If they have not an ab-solute aversion to running waters, it has been satisfactorily demonstrated that where the option is given them they prefer still ponds. They like a loamy, muddy bottom, where the water is deep, and where vege-tation is plentiful. That they will multiply and thrive in streams as rapid as the Schuylkill and Delaware, abundant evidence is found in the large Carp which from time to time have been taken in those rivers. Besides, it is well known that it inhabits nearly all the small and large rivers of

urope. It must not be understood, that because Carp is able to live in water that would e deadly to most other fish, that pools an be deadly to most other fish, that pools and bays of that kind are to be preferred for them; neither must it be inferred that first-class fish can be produced in ponds where the water is not pure. The Carp is a vege-table feeder mainly, although it will cat worms and the larve of aquatic insects, which it seeks in the mud. Although not which it seeks in the mud Although no

quarters it begins an earnest quest for food. By the first of March—the time varying with the latitude and temperature—the eggs have become considerably developed, and a few weeks of bright sunshine serve to bring about the spawning season, which, a few weeks of bright sunshine serve to bring about the spawning season, which, beginning in May, ends about the latter part of June, though in some localities ex-tending far into July. The spawning is not always continuous; that is, it is not be-gun and completed without interruption. A month may pass from the depositing of the first eggs before the last one is spawned, though this is not common. hough this is not common.

though this is not common.

There are few more proific fish than the C<sub>P</sub>rp. The number of eggs contained in a fish that will weigh from three to four pounds will range from 300,000 to 500,000. This is a moderate estimate, but is sufficiently large to explain the wonderful prolificness of this fish in its natural waters.

No death many aventure form collarates lifeness of this fish in its natural waters.

No doubt many amateur Carp culturists have been surprised to find their ponds bare of young fish, although they had the most convincing evidence that the spawning process had gone on regularly. The cause of that barrenness is readily explained, and is easily remedied. While the Carp is not regarded as a carnivorous fish, it will cat worms and the larvæ of insects when it is afforded a chance to do so, and the experience of Mr. Creveling, the and the experience of Mr. Creveling, th superintendent of the eastern hatchery a Allentown, as well as of other excellent au thorities, establishes beyond the preadver ture of a doubt, the fact that the old Car will at times cat the spawn of the youn Carp. The simple remedy is to place sma brush in the ponds before the spawnin season comes on. The eggs of Carp, as a culturists know, are adhesive, adhering i lumps to the object upon which they have fallen. It is also well known that the mother fish generally seeks some object on which to cast her spawn, as the eggs which have no such support are sure to blost. Hence, if there be a "water grass or other vegetable growth in the pond, the spawing fish is certain to seek them out and deposit her eggs so that they will clin to such growth. But that does not remove to such growth. But that does not remove them from unnatural males who will con-sume the spawn or the young fish indis-criminately. The female, finding brush scattered on the pond, casts her eggs on the small branches, which should then be removed to an adjoining pond where there are no large fish. By pursuing this plan at the eastern hatchery, the crop of young fish was all saved. In about six to ten days, in favorable weather, the embryo fish will break through its egg covering: in three or break through its egg covering; in three of four days its yelk is absorbed, and it ther seeks its own food."

I had kidney disorder and say for the good of others that Dr. Kennedy's Favor. Ite remedy cured me. Rev. S. C. Chandler, Lebanon Springs, N. Y. I had stone in the bladder and gravel in the kidneys. I used Dr. Kennedy's Favorite Remedy and am now well.—E. D. Parsons, Rochester, N. Y. Price \$1. Send 2-cent stamp to Dr. Kennedy, Rondout, N. Y., for a book on kidney, liver and blood disorders. Men. Kennedy, Rondout, N. Y., for a book on kidney, liver and blood disorders. Men. Kennedy, Rondout, N. Y. Sept. 19th.

Show is announced to exhibit nere on size day, Sept. 19th.

This difficulty has been overcome in Scott's Emulsion of Cod Liver Oil with Hypophosphites. It being as palatable as milk, and the most valuable remedy known for the treatment of consumption, scrofula and broughtits. Physicians report our little &c. Mourning goods a specialty. Prices to suit all at Miss E. Barkley's. Many people refuse to take Cod Liver the treatment of consumption, scrofula and cents; 61/2 x81/2 50 cents.

In the case of the Locust Mountain Coal rected in this country to the raising of the German carp to take the place of other the Poor of the township of Conyngham and Borough of Centralis, in equity, Judge Elwell filed an opinion on Wednesday re-straining the Directors by an injunction from expanding the funds of the district by affording outdoor relief to any person no physically unable to be removed to the poor house. Holding, that, as to such persons the law incorporating the district was, in this respect, prohibitory, and that it is no excuse for disregarding its provisions by the directors, that in their judgment it is jess expensive to maintain such persons by partial relief outside, than to comply with the mandate of the law.

PHILADRIPHIA, Monday, Sept. 12, 1887 For Ladies' Costumes. The finest imported Broad loths-Nellessen's of course. What wit in the weaving and in the finish. But the wit began before that. Wool of the inest; carding and spinning of the carefulest. Every point must be looked to to bring out the perfect, uniform fabric, Any let up would be fatal. There is no let up. Not a scrimp anywhere. Not how cheap, but how good, is the try. And such dyeing! Coloring as delicate as if Nature spread the tint-blues, greens, browns, garnets, silver-gray, stone, drab, and scores of variations. All the new shades for Fall. 54

inches wide, \$3. But there are other over-sea makers whose goods are of rare excellence. Here is a handsomely finished 54-inch I. W. Hartman & Son's.

cloth, in 28 shades, at \$2.75. Another 54-inch cloth, a little

without extra charge.

Medium priced Dress Goods More of the new things. Stuffs that promise much and do more than they promise Quiet ef- All No's. Mme. Warren's dress form corfects. Good for early and late: for cold or warm -so it isn't an extreme. A very little money will buy any woman a stylish,

servicable costume. Cloth Checks. Some silkchecks, in about 30 colorings. 50 cents.

Pin-head Checks. All-wool. Gray, brown and various mixtures-perhaps 10. Feel the weight and the quality. A touch is enough. Some of the pat on sight and like better and bet- used. ter the more you know it. 50

cents. Tricots? Certainly. They are stand-bys. The new ones have every virtue of the old, and are in all the latest shades, 3 browns, 3 steels, and plum among the mixed; green, blue, plum, garnet, steel, red, olive, and gendarme in the plain.

50 cents. 6 pieces left of the 42-inch Camels'-hair, with contrasting side bands. Gray only. How it has been grabbed for ! 371/2 c.

Some of our cheaper Dress Goods:

Plaids on grounds of green, brown, navy, garnet, blue May be 40 styles; serviceable and handsome. 25 cents.

Beiges, Brocades, Cashmeres in all the Fall tints. 121/2

BOOK NEWS is full of clews to current books. Tells their drift, weighs their worth, gives their fair price-not often the publishers'. If you watch our New Book Table and note the figures on the fly leaves, Book News may lose some of its value to you. If you don't or can't, its like a once-a-month rummage among the newest volumes to get Book News. In

The two new all-silk Satin and Gros Grain Ribbons are to your mind. A better assortment of shades than you are likely to find in goods of that grade. Rich effects; in every way desirable. Known only by our special names :

Photographic Views of Philadelphia Landmarks, modern and ancient. Cabinet size, 15

BUSINESS NOTICES.

Impurities of the blood often cause gres annoyance at this season; Hood's Sarsaperilla purifies the blood, and cures all suc

To PRESERVE NATURAL FLOWERS .- Dithe flowers in melted paraffine, withdrawing them quickly. The liquid should be only just hot enough to maintain its fluidity and the flowers should be dipped one at a time, held by the stocks and moved about for an instant to get rid of air bubbles. Fresh cut flowers, free from moisture, make excellent specimens in this way. If you would preserve your health and invitorant your entire system use Postricts. vigorate your entire system use Pewine's Pure Barley Malt Whiskey. For sale by C. B. Robbins, Bloomsburg, Pa. [cow.

When Baby was nick, we gave her Castoria When she was a Child, she cried for Castoria When she became Miss, she clung to Castoria, When she had Children, she gave them Castoria.

GIVE THEN A CHANCE !- That is to say your lungs. Also all your breathing ma-chinery. Very wonderful machinery it is. Not only the larger air pussages, but the thousands of little tubes and cavities lead-

volumes to get Book News. In any case, it will tell you the notable goings on in the book world, whether they concern authors, publishers, or dealers. 5 cents, 50 cents a year. In the September number (portrait of John Burroughs), Maurice Thompson writes critically of Count Tolstoi's works. nd upon this for certain.

Vigor and vitality are quickly given to every part of the body by Hood's Sarsapa-rilla. That tired feeling is entirely over-come. The blood is purified, enriched and come. The blood is purified, enriched and vitalized, and carries health instead of discase to every organ. The stomach is toned and strengthened, the appetite restored. The kidneys and liver are roused and invigorated. The brain is refreshed, the mind made clear and ready for work.

DEUNERNESS OR LIQUOR HABIT POSITIVELY CURED BY ADMINISTERING DR. HAIRES' GOLDEN SPECIFIC —It can be given in a cup of coffee or tea without the knowledge of the person taking it is absolutely harmless and will effect a permanent and speedy cure, whether the patient is a moderate drinker or an alcobolic wreck. Thousands of drunkards have been made temperate men who have taken Golden Specific in their coffee without their knowledge, and tree will. IT NEVER FAILS. system once impregnated with the Specific it becomes an utter impossibility for the liquor habit to exist. For full particulars address Golden Specific Co., 185 Race St., Cincinnatt, Ohio. dec 3 86 1y.

Schupler's Bardware.

PAPER PLATES

AND NAPKINS Just the thing for picnics and private parties, neat clean and cheap; avoids the annoyance of broken and lost dishes and napkins; no weight to carry. These paper plates are largely used for pie baking, and overcome the objection some people have to pies because the under crust is oggy; the greatest degree of heat will not scorch them and by greasing them a pie may be baked on them better than on tin or earthen ware; the under crust will be found perfectly hard and crisp similar to the top. Napkins are soft and pliable as linen and will not fade unless

## Builders' Hardware.

We carry the most complete line of Builders' materials in the Country. Iron, Steel and Wire Nails, Locks in endless variety, Door Butts, plain or ornamental, Catches and Latches, White Lead Mixed Paints and Colors, Linseed Oil, Turpentine, Varnish Oil Finish, French and American Window Glass, Putty, Building Paper, all of which we can sell at prices that will make it to

## your interest to deal with us.

We have taken the agency for . A. Sheppard's Paragon Coach Varnish, patented in 1884 and wish to call the attention of consumers to its merits. It is made solely from hard gum, has a very heavy body and dries hard in 24 hours in Summer or Winter, one gallon covers 450 sq. feet of new work first coat and 600 ft. second coat, it is warranted not to crack, spot, blister or turn white, and to outwear any English or American varnish, is especially suitable for carriages or outdoor work where exposed to the weather, it is warranted to rub down in oil or water, and pumice stone in from 36 to 48 hours without sweating out and can be brought to a dead finish. For the interior finish of fine residences, public buildings, bath-rooms, it has no equal; hot or cold water, soap or grease will not affect its lustre or spot or stain its surface; wiping with a sponge or damp towel will keep it looking fresh and new. If you are especially desirous of a handsome and permanent finish, specify Sheppards Paragon Coach Varnish to your painter and take no other; put up in 1 and one gallon cans at \$3.00 per gallon.

Very Resp. J. R. SCHUYLER & Co., Bloomsburg, Pa.
