HOW'S YOUR LIVER ?

Is the oriental salutation, knowing that good health cannot exist without a healthy liver. When the liver is torpid the bowels are sluggish and constipa-ted, the food lies in the stomach undigested, pois-oning the blood; frequent headache ensues; a feeling of lassitude, despondency and nervousness indicate how the whole system is deranged, Simmons Liver Regulator has been the means of restoring more people to health and happiness by giving them a healthy liver than any agency known on earth. It acts with extraordinary power and efficacy.

NEVER BEEN DISAPPOINTED. As a general family remedy for dyspepsis, torpid liver, constitution, etc., I hardly ever use anything else, and have been disappointed in the effect pro-duced; it seems to be almost a perfect oure for all diseases of the stomach and bowels. W. J. McElsoy, Macon, Ga.

SELECT STORY

A MOTHER'S INFLUENCE.

The forge-fire gleamed out in lurid brightness, bringing into fine relief the muscular form of Orrin Elden, the village blacksmith, as he hammered away at a horse shoe, striking out a shower of sparks with each stroke upon its

heated surface.

He was a fine specimen of the hum-an race, with his tall, well-knit figure, his frank sun-browned face, and bright kindly eyes, whose expression was in full harmony with the pleasant curves which softened the firmness of lips ever ready to break into a smile at the sight of a child's face or the sound of a fresh young voice.

His passionate fondness for children was well known among those keen

readers of nature and one or two was always sure to be playing near his smithy.

At the time our story opens, two lads stood near attracted, first by the

glare of the red-hot coals, then amused by watching the motions of the busy workman. They were the children of a widow ed mother, who had been married when scarcely sixteen, and who had followed her dearly-loved young hus-

band to the grave when her youngest boy was but three months old. She had been called the prettiest girl in the village before her marriage, and since her widowhood her sad delicately-tinted face had seemed to gain a more ethernal loveliness. Little Teddy was now six years old, and his brother Villie was two years his elder.

After a while the children grew tired of merely looking on. and a bright idea soon entered into Willie's active mind. Quantities of old, rusty, broken nails lay scattered about, and they would form a splendid stock-in-trade. "Ted," he asked eagerly, "let's play we're blacksmiths. We'll pick up these old nails and carry them home. I will build a bonfire, and we will have great And suiting the action to the word, Master Will commenced to fill his apron with the coveted treasures. Teddy's blue eyes flashed with delight as he followed his brother's example. At last, laden with spoils, the children

Nelly Canlis stood in the doorway of her tiny cottage, watching for the approach of her darlings. She looked almost too girlish to be the mother of the two sturdy lads who rushed towards her, pleased at the thought of

their new project.

Her greeting was a smile and a kiss upon each blooming pair of cheeks.

Then her eyes caught sight of the well filled aprons. Before she had time to question them Willie commenced: "Oh, mamma, such fun! Ted and I are going to have a make-believe forge. I am going to be the 'smith,' and Ted's

going to get his horse shod." "And I am going to blow the bellows for Willie," chimed in Teddy.
"See!" said Willie, proudly display-

From Mr. Elden, mamma." "I hope you were particular to thank im for giving them to you." Will and Teddy looked at each other

in a shamefaced way, as though a new idea had been presented to them. Then Teddy blurted out:
"We took them, mamma!" An expression new to her children rested upon Nelly's face now; and Will shifted from one foot to the other, and l'eddy's rosy lips began to quiver when he mother's voice gave additional

"Well, we were playing a little game of poker, but we are going to stop."

"That is right," said the tall man as watching her master shave himself.

When he was through she retired to a gathered up the cards, ran rapidly through them and selected three, wild beatings.

"I will say no more now, Mrs." Poker is a poor game. You see those that you think it very foolish until you have heard my reasons; then I am sure you will change your mind. My highest ambition for my children is that they may grow up into honest, god-fearing men. I have always tried to impress it upon them that they must

THE PIRST ENGLISHMAN WITO CARRIED

In Queen Anne's time it is mentioned both by Swift and Gay as employed by women, but up to the middle of the eighteenth century it appears never to have been used in England by men, though Wolfe, the future conqueror of Quebec, wrote from Paris in 1752, describing it as in general use in that city, and wondering that so convenient a practice had not yet penetrated to England. Hanway, the famous traveler and philanthropist, who returned eler and philanthropist, who returned to England in 1750, is said to have been the first Englishman who carried an umbrella; and a Scotch footman named John MacDonald, who had traveled with his master in France and ing the sound of his impassioned words cepting an apology from them. When they come to you again, tell them you are glad to see what honest little boys they mean to be, and that you will forgive them. Don't undo the effect of what I have said my making light of it, will you?"

It was not in man's nature to resist such an entreaty, especially when a pair of supplicating blue eyes, which were looking at him through a mist of often was it upon their lips. Then as of fand on at 50 cents a day—that is carried one in the streets of Bristol

Worms That Eat Steel Rails

The existence has just been discovred of a detestable microbe which feeds upon iron. Some time ago the reatest consternation existed among the engineers employed on the railway at Hagen by the accidents occurring always at the same place, proving that some terrible defect must exist either n the material or the construction of the rails. The German Government directed an inquiry to be made, and a commission of surveillance to be formed for the purpose of maintaining con-stant watch at the spot where the acci-

dents-one of them attended with loss of life-had occurred. It was not, however, until after six months had appeared to be corroded, as if by acid, to the extent of 100 yards. The rail was taken up and broken, and it was literally hollowed out by a thin gray worm, to which the qualification of "railoverous" was assigned, and by which name it is to be classed in nat-urul history. The worm is said to be two centimeters in length and of the size of the prong of a silver fork in circumference. It is of a light gray color and on the head carries two little glands filled with a corrosive secretion, which is ejected every ten minutes upon the iron. This liquid renders the iron soft and spongy, and of the color of rust, and then it is greedily devoured by the insect. "There is no exaggera-tion," says the official report of the commission, "in the assertion that this creature, has devoured thirty-six kilogrammes of rail in a fortnight."

Love Letters by Typewriter-

The typewriter will never be a universal favorite. It may be and doubtless is a good thing to grind out an editorial on finance or to flay a man whom you don't like. Likewise a good invention to turn out all sorts of comhis curly head upon his mother's knee. He looked up in her face, and smiled, as she passed her fingers through his brown locks.

He was exceed on a low stook, was the bitterness of their disappointment that they have been deceived, and become blind to much that is good and to be appreciated in Japan. I am not thus disappointment that they have been deceived, and become blind to pen—is still mightier than the type—writer, and ever will be, world without are more proposed by the control of the cont mercial correspondence. But there are end. Fancy a man making love to his sweetheart on a typewriter. And fancy a sweetheart breathing her heart's senret-pouring out her passionate yearnings and fond expressions on a sheet of paper where you have to ring a bell at the end of each line. Love can never get used to any such mechanical apparatus as that. You might as well expect to pound out an opera on a sheet iron boiler with a sledge hammer. Imagine your sending a sentence of this sort to your best girl: "My typewriter fails to express to you the feelings of my heart." What would a bundle of typewriter letters look like tied up in a faded ribbon? Do you think any sensible girl would keep a love letter turned out by a typewriter? Would you? A typewriter letter, to enough for a one-cent stand, but no one ever reads it over. Besides, it is perfeetly useless in a breach of promise suit.—Chicago Herald.

Oughtn't to Bleed on the Carpet-

From the Omaha Herald. Husband-"I can't stand this any onger. You make me desperate."
Wife—"So you have said before."
Husband—"I'm going into the next

room to kill myself. Wife—"The spare room! I guess not. If you want to kill yourself, the wood shed is plenby good enough."

The Editor Takes His Vacation

From the Nashville American.

A Tennessee country editor who went off for his summer vacation left the following note on his office door: "Will be gone for several days and have left matters in charge of the office boy. People who wish to pay subscriptions will see our wife. who have complaints to make will please go to the devil."

It is a mighty easy thing for the government agents to put 1,000,000 trout in a small lake or river, but it is a much harder job for a plain and honest man to pull a single one out on his his fish line.—Detroit Free Press. Creditor-What are you going to
