No steps have yet been taken by the citizens to break the dead-lock in the Board, and it is possible that matters may be brought to a climax next week, when the first month of school expires, and the teachers ask for their pay. Mr. Hagenbuch is President of the school board, and Mr. Lawall secretary, and in case of their refusal to draw orders for the teachers' salaries the latter may refuse to teach until paid, and that will close the schools, in which case they are not likely to open again without the interfer-

ence of the court. But should the teachers be paid, and the schools continue in operation, they cannot be expected to accomplish what they ought to, without a responsible head. The Directors have failed to appoint a Principal, and it is positively certain that they will never agree on one. We shall therefore have schools without a head, or no schools at all, unless the people take the matter in hand, and the sooner this is done,

Extensive improvements are going on at the fair grounds, anticipating the greatest exhibition in its history. The fair will be held October 12th, 18th, 14th and 15th. Berwick Fair. The exhibition of the northern Columois and Southern Luzerne County Agricultural Society held last week, was a decided success although not what the managers had hoped for. The week began warm and clear, and exhibitors made early applications for space for exhibits so that on Wednesday, the opening day, nearly louble the number of exhibits ever in the history of the association were recorded. Thursday was a fine day, and the exhibitors were early in bringing in their stock in time for the grand cavalcade of stock at 10 o'clock. At eleven o'clock there was free exhibition of performing dogs. This was a grand feature of the programme, and was witnessed by all who could get near the performance. The dogs were the best trained of any ever brought to this section-Friday morning the day dawned with cloudy and threatening weather, while a north wind blew, making people wish for heavy wraps, and feeling more like sitting around the stove than being upon the open each year the box is opened and a snug fair grounds. The first hour of the day, sum realized. If the church has a large after the gates were opened, the tickets were rapidly sold, and the officers were in ingly large. The boxes are called birthday a happy mood, but as the cold north wind lessened, and what should have been the reatest day in the history of the associa bits were far in advance of what they had

been other years. The department of fancy articles was all taken up, and the display showed that the exhibitors had devoted much time and ment of costs. patience to produce such fine designs in

The vegetable products were first-classhe farmers had evidently selected their very best. This department should be much larger in order to accommodate the farmers. Here we found pumpkins, squashes, corn, oats, wheat, potatoes, turnips &c. all of excellent varieties. Among the list of agricultural imple-

ments that deserve special mention were those of Messrs. White, Conner & Sloan, of Orangeville. These gentlemen manufacture most of their own machinery, and have a wide reputation for the good den filling up of the blood vessels by too quality of workmanship and material found sharp activity after waking will in time in their machines. Their name is a suffiproduce relaxation, or possibly rupture, in cient guarantee of a perfect machine. They had on exhibition a 2-horse tread power thresher and cleaner; a 1-horse tread power with thresher; an empire grain and fertilizer drill, a Hurch & Drumgold riding cultivator with corn-plow attachment; a Lansing spring tooth harrow. These same gentlemen expect to have this machinery on exhibition at Benton and Bloomsburg fairs. Appleman Bros. of Benton had on exhibition several wagons among which

was their celebrated farm wagon. Various styles of washers and churos vere represented, but the Perfect Washer, made by Mears & Son, commanded the most

attention.

The live stock was of the very best. Mr G. L. Reagan's lot of thoroughbred Jersey cattle was frequently commented upon Horses, sheep and hogs all had their places. The department of poultry was better than former years, almost every apartment was occupied by a trio of fine fowls.

The boarding tent was under the supe vision of H. M. Hockman who kept it up to the high standard he had raised it in ormer years. The most objectionable feature of the fair was the presence of such great numbers of monte men and wheels of fortune. There was every opportunity for ever

the most wealthy to rid themselves of their surplus. The dia of the finkirs could be heard above everything else on the grounds. The musical department was well rep resented. J. Saltzer, of Bloomsburg, was there with his celebrated Estey organs and the Ivers & Pond pianos, Mr. Thos. Meth erell furnishing music for the occasion Mr. B. F. Driesbach had the Chickerin and Hallet & Davis pianos, the Wilcox & White organ, and the Lawrence uprign organ-this latter was a handsome 7 octave organ and had all the appearance of an upright piano. These same gentlemen also represented the sewing machines. Among the latest is a new parlor cabine made by Wheeler & Wilson. It is certain-

The B. & S. in Operation. Regular trains are now running on the omsburg & Sullivan railroad, the time table going into effect on Monday morning.

The new passenger cars did not arrive in

time for the schedule as announced last

week. Superintendent Leader has been

hard at work arranging the business of the road, and will soon get it down to systenatic order. The first regular passenger train came down from Benton on Monday morning, carrying about forty passengers, and reaching here at 7 o'clock. The train consisted of the new engine "Louise" and two pasenger coaches. John Smith, who has been running the engine on the construction train, is the engineer, Frank McKelyy, conluctor, Arthur A. Clark, baggage master, and Valentine Rutter, brakeman. The

first train north was to have started at 8:45, but owing to unavoidable delays it did not get off until after eleven. Tickets are sold here at the D. L. & W. depot. Stations are in course of erection at Orangeville, Stillwater and Benton. William Stohner is the agent at the latter place. The Benton bridge is completed, and the cars run into the yillage. The time table will be found at the head of the first

Chills and Fever. Malaria "Many cases of fever and ague, dumb ague and congestive chills were promptly arrested and entirely banished by the use of Simmons Liver Regulator. You don't say half enough in regard to the efficacy of his valuable medicine in cases of ague, intermittent fevers, etc. Every case has been arrested immediately. I was a sufferer for years with the liver disease, and only found relief by using the Regulator. Robert J. Weeks, Batavia, Kane Co., Ill.
