The figures are taken from the official records of the Treasury De-partment and are thoroughly reliable. The following are the receipts from customs for the fiscal years ending June 30, 1885, 1886 and 1887; the year ending June 30, 1885 being the last year of the Arthur administration :

It is these substantial and beneficent results of administering the govern ment on business principles, instead of wasting the taxes of the people in par-ty plunder, which make Cleveland strong with the people and compel politicians who are ever on the hant for spoils to support the policy of the President even against their own in-clinations. The one inflexible rule now in torce in all public departments is that every official must perform his duty with the same fidelity that would be demanded in any business employ-ment, and that is the kind of govern ment the great mass of people of all

It is an established fact that Hood's Bar-maparille has proven an invaluable remedy in many severe cases of rheumatism, effect-ing remarkable cures by its powerful action is the cause of the disease, and purifying and enriching the vital fluid. It is certainly fair to assume that what Hood's Barsaparille has done for others it will do for you. Therefore, if you suffer the pains and aches of rheumatism, give this potent remedy a fair trial.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances. E. G. Lovz, Ph.D."

"It is a scientific fact that the Royal Baking Powder is absolutely pure. "It A. Morr, Ph.D."

"I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terrs alba, or any other injurious sub-stance. Haway Monrow, Ph.D., President of Stevens Institute of Technology."

"I have analyzed a package of Royal Baking Powder. The materials of which a composed are pure and wholesome. S. Dava Havas, State Assayer, Mass."

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Pairs throughout the country. No other article of human food has ever received such high, emphatic, and uni-versal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world.

Norm-The above Diaonam illustrates the comparative worth of various Baking Fowders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Fowder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advant-age of better work. A single trial of the Royal Baking Fowder will convince any fair minded person of these facts.

* While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicat-ing that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.

WASHINGTON LETTER

our Regular Corres WASHINGTON, D. C., Oct. 3, 1887.

Perhaps I could not better begin this letter than by giving a brief de-scription of the elegantly appointed and equipped train that is bearing the Presidential party on their great West-ern and Southern tour, about which so much has been said and written. The train consists of three Pullman cars, connected in such a way that one can walk from one end to the other with out opening a door or being exposed to the weather or other discomfort, and the coaches are richly and fashionably furnished and upholstered — among the articles being a beautiful bed-room, centre-table, inlaid writing desk, sofas, rocking chairs, barber chairs, and several large mirrors to say nothing of a bathroom and smoking compartment, and to cap the climax, the cars are heated by steam from the locomotive and furnished with electric lights from the same source. Washington has certainly never before seen such a splendidly outfitted train. Geo. M. Pullman cave his nercoul attention to Pullman gave his personal attention to the details, and the outlay is said to represent a capital of \$200,000, and it is further stated that the President will be at an expense of \$10,000 for the trip. The party consisted of the Pre-sident and Mrs. Cleveland, Private Secretary Lamont, two or three per-sonal friends of Mr. Cleveland, and three representatives of the press. A great crowd assembled at the Balti-more and Potomac depot to see the distinguished travelers depart. Secre-taries Bayard, Endicott and Whitney being of the number. The floral fav ors to Mrs. Cleveland were lavish and

rarely beautiful. An important act of the President before leaving was the appointment of Secretary Bayard and Messrs Wm. L. Putnam of Maine, and Jas. B. Angell, of Michigan, to act as Commissioners in the adjustment of the question of the fisheries troubles with our north-ern neighbors. All of these gentlemen have had sufficient diplomatic training in positions of public trust to warrant the belief, that if a satisfactory settlement of the international controversy is possible, the country may confident-ly expect such a result at their bands onsummation devoutly to be wished.

At the last Cabinet meeting the financial situation was exhaustively discussed, with the purpose to provide against a possible recurrence of the recent stringency in the commercial world, and a decided difference of opin ion was developed regarding the authority of the Secretary of the Treas-ury to parchase bonds not required for the sinking fund _the result being that it was determined to refer the matter to the decision of the Attorney General, in case there should apparently arise the necessity of such action on the part of the Secretary, to relieve the noney market. It appears that the monetary alarm

and spouting a specialty. timates furnished. was more a matter of imagination than reality, generally speaking, for the very simple reason that the volume of H. G. Eshleman currency was increased seventy-five million dollars last year, which goes to show that the business interests of the country are in a healthy condition.

the Government has saved in interest by the prepayment of bonds under the sum of \$3,200,000 — not to mention the probable immense fluancial losses it prevented individuals from suffering. The naval board has concluded to
