About forty years ago, at one of the med ical colleges in this country, the students had a trick of hazing every new man who entered the institution. 'They would secure him hand and foot, carry him before a meck tribunal, and there try him for some high crime with which they had charged him-He would be convicted, of course, and sentenced to be led to the block and decapitated. A student named William Patterson came along in time, and was put through the court and sentenced in the usual so emn and impressive manner. He was blindfolded and led to the block, and his neck placed in position. The executioner swung the ax, and buried it in the block allowing it, to be sure, to go nowhere near Patterson's, head. The students laughed when the trick was at an end, but Patterson was dead. He had died from what the medical men call shock. All the students were put under arrest, and the question arose, "Who struck Patterson?" On the trial it was shown that nobody struck him, but the medical students retained the expression, and it has come down through them to the present day. - Dr. Sam Anderson

The following article in reference Frank I. Frayne, who with his company played "Mardo" here last spring, is taken from the Philadelphia Times of Tuesday. It will be remembered that he then carried with him a number of animals, which were introduced into the play, including a large

lion and two hyenas. "I see that Lillian Olcott, the actress, has a pet green snake which she imprisons in a golden harness and suspends from her collar," said a gentleman yesterday. "That reminds me of Frank Frayne. You remember, him, of course; he used to do some wonderful rifle shooting in a play of hi called 'Mardo,' or something of that sort, and accidently shot and killed his young woman assistant at Cincinnati a few years ago. When I was a boy at Danville, Kentucky. Frayne worked in his brother's marble cutting shop there, chiseling out tombstones. We boys used to go to his shop very often to see him play with a green snake which he had. It was about eighteen mches long but very slender, and Frayne would let it coil around his neck and crawl all over him. It was as green as grass, and Frayne used to tell us be caught it in the woods. They say Miss Olcott im-

ported hers from Africa." The ice moved off the Susquebanua river Wednesday of last week, February 22, without causing much damage. The following table, kept by W. A. The following is taken from a comm cation from Rev. W. R. Burrows in The Church News, of Feb. 15, an Episcopal paper published in St. Louis. Mr. and Mrs. Brugler have many relatives here.

"Butler is the county seat of Bates county, and has 5,000 people. Rich Hill is a mining town, and has the same number. St. Mark's has thirty-three members. Under such workers as Mr. and Mrs. Brugler, Misa Lu Lansdown and Miss Buck the Sunday school bas made a splendid progress and now numbers sixty scholars. Through the kindness of Mr. J. K. Brugler a perfect little home of seven rooms on the lot adjoining the church is given to the use of the minister free of rent. I cannot speak of Butler without recording the constant kindness of Mr. and Mrs. J. K. Brugler, and never in my experience have I met such cheerful; tireless Church work

ers. Through them there is a strong centre of Christian influence established in Butler. They have worked zealously for the Church in its sunshine and its storm for eighteen years, and were it not for them the Episcopal church would scarcely be known in that fair town."

Mr. Creasy, director, opened the subject of our materials and work, and is in accord. geography, saying that too often yaluable time is wasted by the teacher in dwelling on minor points, and not bringing out clearly that which is of far more importance to the pupil. Maps should be made so as to give only a bird's eye view, as it were, of the countries.

The subject was further discussed by

Profs. Albert and Cope. The latter claim ing that the way to teach geography is to make it real, live and interesting, and one of the best way of doing this is by moulding. By so doing the relative heights can be given, the courses of the rivers marked out, and the productions peculiar to any part located, thus giving the pupils a bird's eye view, a real living picture, and not merely the bare facts and words. In regard to what should be taught and what should be left untaught, depends upon the tact of the teacher. To require the pupils to memorize all the names of all the rivers, Teach only the most important rivers and cities, a few of the principal points, and use them as a guide by which to locate the

"What We Shall Be." Dr. Waller next addressed the Institute on "Discipline." Among the essentia qualities necessary on the part of a teacher neatness, firmness, gentleness, and even-ness. As we had the privilege of hearing only a part of this address we can not give the substance of it, but know that it was

appreciated by all. The subject of decimal fractions was taken up and developed by Mr. 1. H. Winter, after which Prof. Cope spoke on "Criticism of Language Work," Language to examine all this work?" the Prof. savthat on the principle of the "Child's learning to do by doing," he, and not the teacher, is the one to examine and critisize the work." To show clearly how this may be done he gave a class drill, which was both interesting and instructive.

Singing by a double quartette from root 4. Mr. Hower then opened the subject of reading. "Special attention should be given to thought getting, and teacher should always first ascertain whether pur ils have the thought before allowing ther to read. Pupils should not be held too cfosely to the reading book, but be given a great deal of supplementary reading. Silent reading, oral expression, proper man ner and time of critisizing, &c., were taken up and discussed by different persons. The Institute was then favored with a address by Dr. Kline who, among other things, said that he was glad to see the in terest manifested by not only the teachers but also by the pupils, patrons and directthe front. In speaking of co-operation or the part of patrons the Dr. said: "Since the welfare of the country depends upon the interests taken in the education of the
