NATIONAL.

GROVER CLEVELAND, of New York.

ALLEN G. THURMAN,

STATE.

J. B. McCOLLUM, of Susquebanna County.

Gen. Sheridan is slowly improving. Mahone and Wise of Virginia quarreled publicly in the Chicago convention, and a duel is expected.

It looks now as though Harrison or Gresham, or Alger, or Depew, or Sher-man, or Fitler, or Allison, or McKinty, or somebody will be nominated at

The republican national convention is in session this week at Chicago. It is utterly impossible to tell who may be nominated. A great effort was made by Blaine's friends to force him into the field, and it may succeed.

Grover Cleveland was nominated at St. Louis by the unanimous voice of the Democratic party. At Chicago there are a dozen or more factions eac with a candidate, and somebody is sure to go home with a sore head.

Charles G. Barkley is a candidate for the office of President Judge of the several courts of this (26th) Judicial district. It will be proper for the next Democratic County Convention to appoint Conferees to meet Conferees from Montour county, relative to nam-ing a candidate for this office.

From this time forth until the election, every time a steel mill, a nail factory, a furnace or any kindred estabent closes for repairs, we shall be told that the stoppage is on account of stagnation in the iron trade as the result of pending tariff legislation." dispatch in the Sunday Philadelphia Press stated that the Pennsylvania Steel Works would shut down on the 30 inst. for this reason. The truth is the works will be closed for two weeks for repairs, as it has been their custom for years past at this season. We may look for monopolist, to force the wage of their men down so as to induce a strike, in order that they may ascribe the trouble to "tariff legislation."

The sort of "American Labor" that the millionaire manufacturers are so anxious to protect is shown by statistics of the nationality of the operatives in the Amory Cotton Mills at Manchest-er, N. H. Of the 800 "one-third are French-Canadians and the rest of various nationalities, only eighty, or one tenth of the whole, being native Americans." And the Protectionist paper as has been predicated in this correst pondence. There will be probably be two reports made to the House, the return of this company is also substan French-Canadians and the rest of vartially true of all the great manufactur-ing companies in New England." This is the result of high tariffs on goods that all the people use and free trade in the "pauper labor" that produ-ces them.-- World.

The New York Weekly Post, in re ply to a letter from a subscriber charging it with consistency in supporting Cleveland on a tariff issue, in spite of his failure to fulfil all his civil-ser vice reform promises—the principal ba-sis on which the Post supported his first candidacy—thus defines its position: "If we saw the smallest chance of Cleveland's being opposed by any one who would carry out the pledges Cleveland made in 1884, we should not be prevented by any concern for the tariff from supporting him, because we know well that tariff reform is not within the President's reach, while civil-reform is. But we see no prospect of anything of the kind. In the present condition of the Republican party we see no possibility of it. It the Republican Convention nominates a fit man it will be with the intention of 'knifing' him; if it nominates a bad one, it will be with the view of using at St. Louis. his clothes to disguise the well known features of James G. Blaine."

The President is Pleased

WITH THE ATTITUDE OF THE DEMOCRA-

TIC PARTY.

The following is a Washington special in the New York Herald. A New York democrat, who represents this country at a European court, and who is a warm personal friend of the president, had a lengthy interview with Mr. Cleveland. The conversation was unreserved as to the policy of the administration and the prospects for reelection. Your correspondent was un able to gather from the reticent minister a few of the topics discussed in the informal talk. The president expressed himself as entirely pleased with the attitude of the democratic party upon the tariff question. He maintains that the canvass before the people will show that the deciocrats have the popular side. The country will not much longer endure an excessive system of taxation that creates such a dangerous surplus in the treasury, and the good sense of the people demands that the taxes upon the necessities shall be the first to be reduced. The republicans, forced to do something, may seek to abolish the internal revenue taxes, but the people, the president feels assured, will emphatically declare for cheaper clothing rather than cheaper whisky. The complaints of the civil service re formers that he has not earnestly, and, so far as was possible, faithfully enfor ged the civil service law, the presi deut regards as a prevish display of gross ignorance or worse ingratitude upon their part. He recalled with considerable feeling the fierce opposition he encountered in the first years of his administration because of his determined efforts to preserve, with the strictest fidelity the pledges of his letter of acceptance for the reform of the civil service. "And," added Mr. Cleveland, "despite the storm of protests and the first great wave of opposition, I held firmly to my pledges. The law has been executed, as is clear-

tection of the civil service daw, gener-

> Dubois Destroyed. THOUSANDS HOMELESS.

The most destructive conflagratio in the history of Western Pennsylva-nia occured at Dubois last Monday Shortly after 4 o'clock in the afternoon fire was seen issuing from windows in the Baker House, near the Buffalo, Rochester and Pittsburg Railroad de pot. The Fire Department was called out, but the flames had gained considerable headway before the arrival of the firemen and it was impossible to get it under control. The fire spread rapidly in a weaternly direction, its progress being greatly augmented by a stiff breeze, and at nine o'clock all that remained of the beautiful and thriving ittle city of ten thous ands inhabitants, containing costly and substantial busiress blocks and haudsome residences,

was a mass of smouldering ruins. The victims are said to be in the neighborhood of thirty, of whom twenty are men, four are women and the rest children. A sick woman in a house on Courtney street was burned o crisp before she could be rescued.

The scenes in and around the unforunate town were beyond description. Terrified wives and mothers, half craz ed husbands and fathers and friendess and homeless little ones mingled in heart-broken groups around the spots where their happy homes stood but a ew hours before

The stars and stripes belong to the whole people of the United States, and not to any one particular party. The attempt being made by the republicans to use the country's flag as a political emblem to farther party success is an insult to the intelligence and patriotism of the American people. There are many good and patriotic men in the ranks of the republican party, and they have an undoubted right to march unifornia, that they will carry the State of New York next November. Uned to do so but they should do it as American citizens and not as partisans. less some very unexpected change shall take place in the sentiments of the people, Mr. Campbell's chance for picking up \$5,000 may be considered the flag of their country in the mire of party politics, we will mention a few facts to show that the credit of sus-taining the red, white and blue emblem

It was under the wise and patriotic administration of Thomas Jefferson, a democrat, and later on under another cured that vast domain reaching from It was a democratic administration that carried the flag successfully through the war of 1812-14, in spite of the protests of this same g. o. p. who from oress and pulpit denounced it as an un-just and unholy war, even going so far as to invoke divine vengeance upon the heads of Mr. Madison and the heroes of that war. Who were they? Andrew Jackson, a democrat, won a great victory at New Orleans at which upwards of 3,000 British red coats bit e dust and he was fined \$1,000 by a federalist judge for trying to uphold the honor of the flag. General John E. Wool and General William J. Worth, both of whom were consistent demo crats, carried the old flag to victory. Let us kindly suggest that you suppress your partisan patriotism sufficiently to prevent the fool killer from getting in his work.—Patriot.

A Navy in Sight.

The naval appropriation bill will contain an item of \$6,000,000 for the beginning of additional war vessels, \$4,000,000 for construction and \$2,000, 000 for armament. Four new ships are to be begun, two of which are to be unarmored cruisers of 3,000 tons each, with a guaranted speed of nineteen knots. These will be of the same The third of the new vessels is to be an unarmored cruiser of 5,300 tons displaced and a guaranteed speed of twenty knots. The fourth will be an armored battle-ship of 7,000 tons and of a speed of not less than seventeen knots.

This makes twenty-six new vess that Congress has authorized, of which only the Atlantic and Delphin, both unarmored cruisers, have made cruises at sea. During the coming year it is expected that the Boston, the sister ship to the Atlantic, the Chicago, the Baltimore; the monitors Miantonomah, Puritan and Monadnoch, the Stilleto. and the dynamite cruiser Vesuyins, will be added, increasing the number of new vessels to ten. The additional ressels already authorized by Congress are two monitors, four gunboats, two unarmored and one armored cruisers and three armored battle ships. To this is to be added a torpedo vessel or two, whose business it will be to blow the natives of hostile countries to atoms-if they can. It will be observed that the number of new vessels does not really increase the total number b-longing to are completed. Every new vessel add

ed is a gain in efficacy, however, the old vessels having been of no real value as an offensive or defensive armament since the close of the rebellion.

Aside from the satisfaction of possessing a navy that can either fight or rune a distinct gain has accrued to the country in building it from the erection of a plant that makes us independent of foreign nations for a supply of the heavy castings and forgings required for the longest range modern guns. In other words, we are prepared now not for the longest range modern guns. In other words, we are prepared now not only to build the swiftest and most inulnerable ships known to modern warfare, but to arm them from our own forges and foundries and no thanks to anybody else. For this achievement he country is quite as much to be congra'ulated as for the possession of the

A CLOUD BURSTS, MOVING AND FLOODING HOUSES AND WASHING BRIDGES

Trrusyn.r., June 19.—A terrible storm of wind and rain struck this city earty this morning doing enormous damage in the Southern part of the city. Two runs are overflowed, and many splendid gardens are completely dug out and ruined. In many places the water rose to three feet in the low er rooms of houses. The inhabitants were forced to seek safety in the upper floors.

Both the high and low pressure natural gas mains are broken where they cross the runs, and the consumer have no fuel. The refineries are forced to shut down for the same cause. The storm came up at a moment's notice. A cloud burst on the hill at the runs' source. Buildings standing over or near the runs were moved down stream and smashed. All the bridges are

A Woman's Shrewdness

Who was it said that no woman ever invented anything? It was untrue. anyhow. A woman can be ingenious when it seems to her worth while. But what perceive, Messieurs Republicans, how was it that a Bowery woman did when unwarranted is your assumption of sole her husband told her of the trick? ried in Pictsburg. When Tilden was the Democratic ominee for the presidency Wilmot bet \$75,000 on his election. The bet was drawn and the money returned. Soon after his wife died and left him alone. The \$75,000 was soon squandered and Wilmot became a poor man. Previous to his serious losses he had invented a machine for crimping boots, and out of this bad made a handsome fortune. To prove his assertion he exhibited his original letters patent. The old man is becoming very weak and is almost deaf.
