"Nasal Voices, Catarrh and Faise Teeth."

A prominent English woman says the American women all have high, shrill, nasal voices and false teeth. Americans don't like the constant twitting they get about this nasal twang, and yet it is a fact caused by our dry stimulating atmosphere, and the universal presence of catarrh diffi-culties

the universal presence of catarrh diffi-culties. But why should so many of our women have false teeth? That is more of a poser to the Eng-lish. It is quite impossible to account for it except on the theory of derang-ed stomach action caused by imprud-ence in eating and by want of regular exception. exercise. Doth conditions are unnaturel.

Cattarrhal troubles everywhere prevail and end in cough and consump tion, which are promoted by mal-nutri-tion induced by deranged stomach ac-tion. The condition is a modern one, one unknown to our ancestors who pre-vented the cattarh, cold cough and consumption by abundant and regular use of what is now known as Warner's Log Cabin cough and consumption remedy and Log Cabin sarsaparilla, two old fashioned standard remedies handed down from our ancestors, and

now exclusively put forth under the strongest guarantees of purity and efficacy by the world-famed makers of Warner's safe cure. These two reme-

Comrade Eli Fisher, of Salem, Henry Co., Iowa, served four years in the late war and contracted a disease called consumption by the doctors. He had frequent hemorrhages. After Warner's Log Cabin cough and con-sumption remedy, he says, under date of Jan. 19th, 1888: "I do not bleed at the timber or bark upon said unseated lands, and that commissioners may see all such lands bought by them every two years instead of five as was prothe lungs any more, my cough does not bother me, and I do not have any

Coffee Drinking and Bindness.

THE EXPERIENCE OF ONE WHO HAS DROL PED THE HABIT-AN UN-PLEASANT THEORY.

Rev. Gance, brother of Presiding Elder Gance of this district, preached I am satisfied that defective vision and blindness will pretty soon be a and binduces will pretty soon be a prominent characteristic among the American people, the same as rotten teeth have been during the last 200 years. I make this assertion without having seen any statistics whatever on the subject of blindness.
