A New Dress Material.

The invention of a new dress material The invention of a new dress material promises to give rise to a new industry of no insignificant proportions. It is an artificial slik, which is said to be an excel-lent imitation of the natural product and is made of a kind of collodion, to which has been added perchloride of iron and tannie acid. The process of manufacture is somewhat long and complicated, and it remains to be seen whether the material can be produced cheap enough to compete with the work of the silkworm ---Chicago News.

Oil for Lubricating Purposes.

Oll for Lubricating Purposes. The Italian admiralty have recently caused to be carried out a number of ex-periments with a view to testing the comparative merits of castor oil and of olive oil for lubricating purposes on board ship. From the results obtained they have given orders that henceforth all ex-posed parts of machinery are to be lubri-cated exclusively with castor oil, while mineral oils are to be used for cylinder and similar lubrication.—Scientific Ameri-can.

STRIKING PICTURE-A REVIVAL OF OLD TIME SIMPLICITIES.

In one of Harper's issues is given a very fine illustration of Roberts' celebrated painting, known as "Doctoring Old Time," It represents a typical old-timer, with his belows, blowing the dust from an ancient clock, with its cords and weights carefully secured. One of these clocks in this gen-cartion is any residued only as a farm rolle

secured. One of these clocks in this gen-eration is appreciated only as a rare relic. The suggestive name, "Doctoring Old Time," brings to our mind another version of the title, used for another purpose,— "Old Time Doctoring." We learn, through a reliable source, that one of the enterprising propriotary medi-cal firms of the country, has been for years investigating the formulas and medical preparations used in the beginning of this century, and even before, with a view of ascertaining why people in our greatgrandcentury, and even before, with a view of ascertaining why people in our greatgrand-fathers' time enjoyed a health and physical vigor so seldom found in the present gen-eration. They now think they have secur-ed the secret of secrets. They find that the prevailing opinion that then existed, that "Nature has a remedy for every exist-ing dwarder" was true and acting under ing disorder," was true, and acting under this belief, our grandparents used the com-mon herbs and plants. Continual trespass upon the forest domain, has made these herbs less abundant and has driven them further from civilization, until they have been discarded, as remedial agents be-cause of the difficulty of obtaining them.

been discarded, as remedial agents be-cause of the difficulty of obtaining them. H. H. Warner, proprietor of Warner's safe cure and founder of the Warner ob, servatory, Röchester, N. Y., has been pressing investigations in this direction, into the annals of ola family histories, un-til he has secured some very valuable for-mulas, from which his firm is now prepar-ing medicines, to be sold by all druggists. They will, we learn, be known under the general title of 'Warner's Log Cabin Rem-edies." Among these medicines will be a "sarsaparilla," for the blood and liver. ''Log Cabin hops and buchu remedy," for the stomach, etc., Log Cabin cough and consumption remedy," 'Log Cabin hair tone, "Log Cabin extract." for internal and external use, and an old valuable dis-covery for extarth, called "Log Cabin Tose eream." Among the list is also a 'Log Cabin plaster," and a "Log Cabin liver pill."

Cabin plaster," and a "Log Cabin liver pil." From the number of remedies, it will be seen that they do not propose to cure all diseases with one preparation. It is be-lieved by many that with these remedies a new era is to dawn upon suffering human-ity and that the close of the ninetcenth century will see these roots and herbs, as compounded under the title of Warner's Log Cabin remedies, as popular as they were at its begining. Although they come in the form of proprietary medicines yet how will be none the less welcome, for suffering humanity has become fired of modern doctoring and the public has great contidence in any remedicis put up by the firm of which H. H. Warner is the head. The people have become suspicious of the strength of the instructure of poisenous drugs. Few realize the infutious effects following the prescriptions of many modern physi-ateraly prominent, will become more pro-nounced in coming generations. There-fore we can cordially wish the old-fashion-ed new remedies the best of success.
