A Plain View of the Situatio

All parties profess fidelity to the in-terests of labor, but both can't be right, and labor must decide between One of the most gratifying facts presented in this political campaign, is the universal admission by candid men in all parties that Grover Cleveland's them, for the votes of the industrial people of the land will surely control the verdict. administration has been wise, conser-vative, efficient and punctiliously hon-

The wheels of government have moved smoothly, and consequently the larger business enterprises have met their expectations and the people generally have prospered. Even the financial stringency of 1897, a direct result of the enormons accumulation of surplus in the national treasury, and which for a time assumed threatening associe was so easily brached away The industrial voters are four-fifths of the voters of the country. They pay the taxes; it is their \$80,000,000 of needless taxes that are extorted from the people to swell the surplus in the treasury; it is upon them that war taxes upon the necessaries of life fall most heavily, and it is for them to say

The Sackville Letter.

The effort to secure a democratic Burchard in the person of Lord Sack-ville West, English minister to this country, has proven a flat failure. A person representing himself as a naturalized Englishman wrote to Sackville asking for instructions how to vote for President. To this Sackville replied asking for instructions how to vote for President. To this Sackville replied by letter saying : "I am in receipt of your letter of the 4th inst, and beg to say that I fully appreciate the difficulty in which you find yourself in casting your vote. You are probably aware that any political party which openly favored the mother country at the present momeat would lose popularity, and that the party in power is fully aware of this fact. The party, however, is, I believe, still desirous of maintaining friendly relations with Great Britain, and is still as desirous of settling all questions with Canada, which have been unfortunately reopened since the retraction of the treaty by the Republican majority in the Senate, and by the President's message to which you allude. All al-lowances must, therefore, be made for the political situation as regards the presidential election thus created. It is, however, impossible to predict the course which President Cleveland may pursue in the matter of retaliation should he be elected; but there is every reason to believe that, while upholding the position he has taken, he will mani fest a spirit of conciliation in dealing with the question involved in his message.

court, the republican rditors of the country would all be calling it revolu-tion, but now they hardly refer to the decisions, except as items of news. Senator Morgan, who, as the leading democratic member of the Senate committee on foreign relations, has been perfectly familiar with the ideas of Mr. Cleveland on the fisherics and other Canadian questions, says of the retalistion message: "There was no thought of gaining party advantage by it. It was inspired by the highest motives that ever enter a statesman's heart. Whoever attributes other motives to him, does Mr. Cleveland a gross ininstice. In that message he expressed what was strongest in his mind, and it was in perfect accord with his attitude from first to last. He did not doubt for a moment that Congress would grant him the power asked for, and he expected to exercise it at once. If he were not a candidate for re election, or if his defeat were assured, he would

It is remarkable how party organ will distort the truth. The Philadel-phia Press of Suaday Oct. 28th in commenting on the result of the interviews savs:

VIEWS SAYS: THE New York World has interviewed 2038 voters in New York and Erockiyn on the presidency in the hast week, perhaps as large and avstematic a straw vote test as has ever been carried out by a newspaper. Like all such, it is open to great er-ror, and it is never safe to place much reliance on the conclusions reached by a haphazard poll of this description. But it is noticeable that in this case a poll is inder ot changes from the vote of the last presidential circulon. In all the World Inter-views there are ninetr-sight changes from Hainet to Cleveland and 1% from Cleveland to Harrison. For New York this would be a net change of 3400 votes and for the state of 18,700 in favor of Harri-son."

The New York World of the same date (Sunday Oct. 28), that should know how many interviews they ob-tained says as follows :

Thousands Must Lose Their Votes.

NOT ENOUGH POLLING PLACES OWING TO THE BIG REGISTRATION.

The police Commissioners are in serious dilemma over the heavily in creased registration in many sections of N. Y. city. How to poll the entire vote within the legally prescribed hours is a puzzle. They added forty-four election districts this year, making 856, agains, 812 in 1867; but the addition of voters has been so excessive as to prevent a poll of the vote on election day. In the Seventeenth election dis of the Twenty-third Assembly District, 546 names were enrolled dur ing the first three days of registration. and in the Thirty-second District of the Twenty second Assembly District, 728 voters were registered, with a strong probability that the grand total will reach 900. This excess exists in all the tenement districts and in the newly bailt sections of the city.

The law prescribes that the polls A. M. to 4 P. M. During that time, if voting is carried on without delays, one man can cast his ballot each min-night by a telegram from New York shall be kept open ten hours, or from 6 ute, so that only 600 votes could be received in the ten hours. The heaviest balloting on record was in a Harlem precinct, where 690 ballots were cast the average not exceeding 500. Allowing the largest possible latitude, m the Twenty third Assembly District referred to above, fully three hundred voters will be dis ranchised solely be-
