# The White Caps.

THREATENING MISSIVES SENT TO MANY PEOPLE IN NEW JEBSEY.

New Jersey is suffering from an attack of White Cap fever. The first appearance of these terrorizers was looked upon as the uprising of a few young men with an exagg rated idea of humor. Several persons in Code of Several persons in Cumberland county, however, have good remons to believe that it was not all humor as their exper ences were pain-fully serious and realistic. Within the last two or three weeks many per-sons in and around Bridgeton have received warning notices headed by the usual skull and cross bones signed "White Caps, Local Branch 79, of New Jersey." Lettle attention will be pai Jersey." to most of them, but in one or two cases the recipionts armed themselves in anticipation of personal contact with he writers.

A few nights ago "Doc" Briant, wel known about town, was walking on th out-k ris of the First word when b was contronted by three masked m-They sad not a word, but two of them level-d their pistols at his face whill the third flori-hed a cowhide. Brian quickly whipped out his own revolv nd invited the young men to disappear They said they guessed a mistake ha-been made, and he was not the mu-they wanted. They then vanishe Bri mt says he has no idea who th were, and he firmly elieves that if he had not been armed the men woul have attacked him. That same even ing near midnight a prominent ma driving from Fairton to Bridgeton wastopped just on side of the city limit by masked men, taken out of his car riage, severely whipped, and told t change some of his tactics. The city authorities now think the matter has assumed a serious aspect, and they will make strenuous efforts to ferrel out the perpetrators of this Western species of atrage'

## A Raulroad Project.

A project is on foot to extend the Williamsport & North Branch Rail-road from Eaglesmere to Bernice, thu-giving the Reading s new connection with the Lehigh Vall-y. Some capi talists in the northern part of the state are interested in property in Laporte, which they propose to turn into a sum mer resort, and promise substantia aid to the railroad company in build ing a road to that point. It is only in few miles on to Bernice, the souther terminus of the State Line & Sullvan Railroad, which connects at the north-eastern end, at Towanda, with the Le high Valley. ## Boracie Acid as a Preservative.

Boracio Acid as a Preservative. Boracio acid only acts when present in large quantity. It prevents the growth and multiplication of germs, but does not kill them even in a 1 per cent. solution. Experiments with milk gave very unsat-isfactory results, as an addition of 4 per cent. boracio acid only preserved the milk for four days. Horseflesh may be preserved for six weeks by the use of 8 per cent, of the acid. Boracic acid is supposed to be harmless, but recent in-vestigators, including the author, prove it to be dangerous, as it strongly asts upon the nuccus membrane of the large intestine. A dose of four grammes killed a large rabbit, two grammes made a dog very sick.

that such protection might be gained by inoculation. The yellow fever germ probably gains entrance into the body by the respir-atory or alimentary tracts, or through the surface of the body, or it is possible that it multiplies in insanitary localities and develops a volatile poison which contaminates the air. The former hypo-thesis, that it enters the body and mul-tiplies within it, is, he thinks, the more probable. Hitherto the germ has not been found in the blood and tissues of those attacked, for Dr. Sternberg does not confirm the alleged discovery made by Dr. Domingos Freire. Nor is there, in Dr. Sternberg's opinion, any satisfac-tory evidence that the method of inocu-lation practiced by Dr. Domingos Freire has any prophylactio value, and the same applies to the claims put forward by Dr. Carmona y Valle, of Maxico.— Lancet.
