LAND ALARAMARK

tion, and think it is of a ci Russia. San Francisco can probably locate the town.

A hundred people or more were shown the photograph yesterday. Some regarded the whole thing as a fraud, while others believed it the genuine photographic result of a mirage. One man related his experience with a mirage in Death Valley, in San Bernardine county. Going down the mountain side into the valley one sees a mirage representing a luxuriant garden with lakes, rivers, waterfalls and rich vegetation. Upon reaching the base of the moun-tain a barren, sandy desert is found in the valley

The expert photographer employed at Tabor's art rooms examined the photo-graph critically and said: "I never eard of a city represented in a mirage before. I have seen islands and land scapes, but never a city. The photo-graph is the result of a badly exposed plate. I regard it as a trick. Such a re patter. I regard it as a trica. Such a re-sult could be obtained in making a copy from a similar photograph by long ex-posure on a bright moonlight night, say an hour's exposure. But the figure of a human being, like those of the children in the foreground of this picture, would not show at all in the representation of a mirage. This photograph was taken by a rapid exposure, about two or three see onds in duration, either in a bad light or a poor exposure.'

Mirages, as a general rule, represent scenes in the immediate vicinity, not over a few aundred miles away at the best. At first the city of Victoria was suggested, but an old resident of that city denied the likeness. Victoria is fully 900 miles from Glacier bay, where the alleged photograph was made. A score of persons ventured an opinion as to the location of "The Silent City." However, no one could be found who recognized the scene. At Tabor's and other photo graphic establishments it was thought the picture was that of a city in France picture was that of a city in France or Germany. A dozen persons agreed that it resembled Montreal or Quebec possibly Halifax. The agents of the Ca-nadian Pacific, who are well acquainted with Canadian cities, stated that it could not be Toronto, Ottawa or Quebec. They were divided in opinion as to Halifax and Montreal. In the latter city there is a cathedral building resembling the one in the photograph. As a final result of yesterday's investigation Montreal appears to be the most likely city repre-sented in the wonderful mirage picture of "The Silent City,"-San Francisco Chronicle.

A Literary Hermit.

Delaware mountain, near Middletown, N. Y., boasts the possession of a literary hermit in the person of Judson Ellis. He lives in a one room hut built by his own hand, and scantily furnished. His sole companions are the goats, upon whose meat and milk he lives, and a large colony of cats. Mr. Ellis is 66 years of age, and in his early manhood was a reporter on The Tribune, then under Horace Greeley's editorship. He now employs his time in writing short stories for a newspaper syndicate.-Harper's Bazar. Sharks Pass Through the Canal.

Before the Isthmus of Sucz was pierced by the canal there were almost no sbarks in the Mediterranean, the passage through the Straits of Gibraltar not being to their liking. Now, however they come in by way of the canal, and in such numbers that in more than one watering place, and especially on the Adriatic, the sign has gone up, "Beware of Sharks."--Chicago Tribune.

Tardy Downing Street.

It has recently been discovered in Downing street that steamer passage money on the coast of China includes food while on board; and instructions have accordingly been sent out that British officials, while traveling teamer on duty, are to refund \$2.50 for every day they are on board, in order to cover the cost of the food supplied them. The practice of supplying food to travelers by ocean steamers has existed since the invention of steamers; but the knowledge seems to have only just reached Downing street, with the consequences here stated .- Once a Week.
