An Old Industry.

BARS NEWBOURS - ----

THAT WILL SOON AGAIN FORGE TO THE FRON -A FEW PARTICULARS.

The plant of the Catawissa Fibre Com pany is to be improved. The scheme pro posed by the Company has met with such whose record is not under 2:48. Purse favor as to warrant them in going ahead with the proposed improvements. A meet-

ing of the subscribers will be held some time this week to perfect an organization and inside of two weeks work will be com menced upon the new buildings. Thes will be of brick, and will consist of an extension of the mill towards the bridge 40 x D. Lowenbergs. 60 feet, and a further extension of that building in the same direction 50 x 126

Card of Thanks. feet. The first named will be for the machin ery used in preparing the wood pulp and fibre for the paper machine, and are called engines. Two of these are for washing the material, and are known as washing

engines. These the company have on hand, being a part of the old mill plant. Two new engines, called beating engines will be purchased to complete the complement of machinery for the engine room. The 50x125 building will accommodate the

paper machine, an 86-inch Fourdrinier, upon which the pulp will be manufactured into manifla paper. The building will be built large enough to accommodate two manot vary five degrees from the temperature we saw-that it is a very busy hive of In- chines, the other a 96-inch machine, but the business will be started with but one The product of the paper machine goes indicates the approach of a sudden and de- giance was only possible at what was to the bag department, about one hunbeing done there. The largest wheel in dred yards distant. Here are now four

known to the trade as the fist-bottom bag. for the 24 hours commencing at 1 n. m. These predictions are telegraphed to Signal about two feet wide, cogs fully two inches Service stations, rairoads, post-offices, &c. in depth, and thickness, and steel shaft 18 is known as the square bag runs out

Many smaller towns obtain them from to 20 inches in diameter and 20 to 24 feet which will be in December next, attachments will be put upon two of these machines to make square bags, Two additional machines, for making what is call The cold-wave warnings are telegraphed steel apparently 4 inches in diameter, ex- ed the satchel-bottom bag, will be placed in this room, each with a capacity of 100, 000 bags per day. This will make the capacity of the bag plant over a half million

> When finished the plant will be the most complete in the United States. It will virtually be taking in hemlock slabs and turning out paper bags. The present capacity dug to allow it space for the mechanism of of the pulp mill is eight tons of chemical

fibre per day. The capacity of the paper tual cost will be \$75,000. Other gearing mill will be seven tons per day, and the and attachments nescessary for the motive bag works will use nearly all the paper power of this marvelous engine of labor product. But the excess of both the pulp

and paper mills will allow the Company to the same shop. This powerful machinery take part in that trade, and they can make all the profit there is in the three departments. If pulp mills make money selling their product to paper manufacturers, and paper mills can buy the pulp and manufacture it into paper at a profit, and paper bag manufacturers can go into the market and buy the paper to make their bags, and sell the bags at a profit, we fail to see why the Catawissa Fibre Company wouldn't come the enterprise of our people and with the pipe reaches the river a distance of about ter-workmen who constructed it. It has in for all three profits-on their pulp, on

are also required to publish by 'posting hand bills, either printed or written, in at least five public places within their respective townships or boroughs, an itemized annual statement of the receipts and ex- tried all the antics of the trick mule, but penditures of the borough councils, road the grip of a railroad man is next to death commissioners, supervisors, overseers of itself, as the finny monster soon found.

poor, and school directors for the year Mr. Poust tightened his grip and the fish preceding the annur1 settlement of their respective districts."

Dr. I. W. Willits fell into the culver ear Fifth street, under the B. & S. R. R. in 1 riday evening, and was considerably

bruised. He had been to visit a patient and as it was very dark he thought he could walk better between the two tracks than on the ties, when suddenly he fell

about six feet into two feet of water and between two stone walls. After much effort he succeeded in getting out. His ankle was sprained, his left wrist and right hand skinned, his mouth cut and his face and arms bruised. Had he struck his

head against the wall and lost conscious ness, there was enough water to have drowned him. He has been able to attend to business, though feeling pretty sore.

> Dr. Peebles of Philadelphia, Pa. who has been lecturing the present week in the Opera House upon anatomy, physiology, health and how to "live a century" may

be consulted free of charge at the Exchange Hotel until Sunday night. Dr. Peebles treats all chronic complaints.
