There were two prominent individuals in the movementtheir common good first assumed defi-nite form before the public of this country in 1881, when Mr. Blaine then BURNS, the socialist, who was the acknowledged leader and Cardinal MANnio, whose intelligence, quiet persistance, and moral authority finally affected the settlement. Great meetings were held during the strike but withated with Simon Bolivar, that great out disturbance of any kind. Thus it showed the intimate relation between all of them, from the importer to the "casual them, from the importer to the "casual gress passed a bill directing the Presi-dentto invite representatives of the Spanlaborer." Besides this, it had the general effect of demonstrating to the publie mind in the most impressive manner that a strike may have the best reason. It dissipated the notion that a strike is necessarily a wanton and foolish outbreak of an attempted un reasonable compulsion. Another of the excellent conse quences of this strike is the proof which it has afforded to the striking element in society that every move ment of the kind is not prejudged as causeless, but is estimated upon its merits. This truth has been demonstrated also in some of the more notable strikes in New York, where public sympathy has not been withheld from the strikers so long as they respected the conditions upon which alone an equitable adjustment can be reached. When public order is disturbed the condition of the advance of every good cause is the restoration of order. If the strike in London had resorted to violence, it would have been impossi ble to ascertain the facts and rights of the case, and Cardinal MANNING might have met the fate of Archbishop of Georgia, and two others. TO EAT. Fattening slaves in a park and feed-ing rhem up like animals destined for the table, and then leading them to a shambles where they are slaughtered like oxen, cut into pieces and shared by bits to hungry cannibals—such is the practice which is permitted, ac-cording to Mr. Fondese, a French ex-plorer, in some of the French, Belgiau and Portuguese and even British terr tories in Übanghi. M. Fondese was ent out three years ago by the French Government to discover the sources of the Niarguillon, and, having returned after the successful accomplishment of his task, he hastens to tell his countrymen all about the terrible things he

has seen in his travels. "The "fattening parks" or paddocks are, he says, to be seen in each village and contain men and women who have been taken in war. The poor wretches take their doom philosophi-cally, and some of them to whom Mr. Fondese offered freedom actually refused it. They eat, drink, dance and sing until the head "fetishman" comes around, accompanied by an orchestra of tom tom and tin-kettie players, selects a sufficiently fat specimen, carries him or her to the market place of the village and splits his or her head with a hatchet or scythe-like kuife. ### "REFUSING" NEWSPAPERS.

O de in a while every newspaper office receives a copy of their paper marked "refused." Nine cases out of tes the party returning it is indebted to the office for subscription. It will be interesting to such to learn that the .test postal laws are such that newsmper publishers can arrest any one for fraud who takes a paper and refuses to pay for it. Under this law the man the allows his subscription to run along for some time unpaid and theu or ler it discontinued, or tells th : postmaster to mark it "refused" and have postal card sent notifying the publisher can arrest and fine, the same as for heft, etc. Ali the Difference in the World .

"And will you not be mine?" He

asked tenderly, as he took her hand. "No, Percy," she replied, "I can never marry a horse doctor; but the moment you become a veterinary sur-geon 1 am yours." — Judge.

A Hint on the Use of Words-

"You should be polite to the gentler sex, my boy," said old Parrot in the street car; "get up and give that lady YOUT FERL. "Gentle sex!" retorted the bold,

bad, urchin. "It's a long time, Mister, I guess, since you felt a slipper!"-Munsey's Weekly.

#### CATARRH, Catarrhal Deafness and Hay Fever,

## A NEW HOME TREATMENT.

A NEW HOME TREATMENT. Sufferers are not generally aware that these diseases are contagious, or that they are the to the presence of living parasites in the lining membrane of the nose and cus-tachian libes. Microscopic research, how-ever, has proved this to be a fact and the result is that a simple remedy has been for-mulated whereby catarrh, catarrhal deafness and hay fever are permanently cured in from one to three simple applications made at home by the patient once in two weeks. N. B.-For catarrhal discharges peculiar to females (whites) this remedy is a specific. A pamphlet explaining this new treatment is sent on receipt of ten cents by A. H. DIXON & SON, 304 West King St., Toronto, Canada - Scientific American.
