"LA GRIPPE" MAKES ITS APPEARANCE I THIS PART OF THE STATE.

A new disease known as the "Rus-sian Influenza" or "La Grippe," corn-monly called the "grip," is afflicting persons of all ages sex or condition in this and the old country. It is caused by the air and is not contagious, as the rich and poor of all nationalities are equally liable to catch it. It is describ-ed as a mixture of "malaria and hay fever," the attack lasting about a week. While the disease has not proven fatal in this country, still we reprint the fol-Resolved, that we the teachers. A new disease known as the "Rus-

This Hemedy is the perscription of one of the leading physicians of Paria, France, and was used by him with unparalleled success for over thirty years, it was first given to the public as a proprie-tary medicine in 1818. Since which time it has found its way into aimost every county on the race of the globe, and become a favorite remedy with thousands of the leading physiciana. Medical societies have discussed its marrelous success at their annual conventions, and after their o dicial chemists have analyzed it and found that it con-tained so optates, bronides or other harmful in-gredients placed it among their standard reme-dices. THOS. B. SHANNON C. H. REYNOLDS ANNA S. KURTZ FRANCIS BECKER M. ELLA ANDREWS Prof. Chapin read a very interesting and instructive paper on Chemistry in the Grammar grades and made it practical by series of carefully arrang-

of the case in some epidemics there is considerable general weakness, even marked depression, of the vital powers. The pulse becomes small and weak, the mind gloomy, and restlessness ensues. There is little disposition to exertion at any time, and mental heb-etude coincides with physical depres-tion. not a few pass by easy transition into obronic bronchitis, emphysema, asthma etc. The secretion of the urine is generally unaffected, except by those simple changes belonging to a mild febrile attack; but in not a few the urine becomes albuminbus and scanty and anuria is added to the other morbid conditions and symptoms. Obviously a catarrhal process so extensive and severe may contribute immen-County .- Sunbury News. ely to chronic disease of the middle ear Eustachian tube, nose and throat, and thus permanently damage the parts.

It seems to one that the best manner of securing immunity is by the inhal-tion of sulphurous acid gas daily when the approach of the epidemic renders it of salicylate or cinchonidine three at a salicylate or cinchonidine three times a day, and by so living as to avoid taking cold. When the attack has begun, it seems to me desirable to give one or two grains of calomel at ught, inhale some sulphurous acid gas, and have the natient sit in a room where steam containing eucalyptol can be in-haled in large quantity. Local applications are useful as f im-

ished in gases, in vapors, and in powdered solids by the method known as insufflation.

Of the gases, sulphurous acid is one the more efficient against such or the more encient against such troubles as tuberculosis where a con-clusion is reached by test of culturus, To give this; burn some sulphur in an appartment. The amount of Gas to be inhaled depends on the person and his ndition. To determine these points, trials are necessary. Ordinarily, some construction of the throat and a pronowed metallic taste-"brassy"-indiate the limit. The frequenzy may be wice or thrice a day. Peroxide drogen, oxygen, or ozone will oubt act well in suitable cases.
