THE PLANETS.

It is not often that this planet is favored with a richer celestial display of planets than is now afforded to anyone who takes the trouble to turn their eyes heavenward on a clear night. Venus glows and sparkles like an electric light in the Western sky as soon as the sun gives her a chance to display her charms. At the same time Mars rises in the East and is on view throughout the night, having as a companton after midnight the mighty Jupiter, which, however, the red mass of Mars almost rivals in its brightness and brilliancy.

"Of the many preparations before the public for the cure of colds, coughs, bronchitis, and kindred diseases, there is none, within the range of my experi-ence, so reliable as Ayer's Cherry Pic-toral. For years I was subject to colds, followed by terrible coughs. About four years ago, when so afflicted, I was ad-vised to try Ayer's Cherry Pectoral and to any all other romedies aside. I did so, and within a week was well of my cold and cough. Since then I have always kept this preparation in the house, and feel comparatively secure." - Mrs. L. L. Brown, Denmark, Miss.
