THE TURF

The report that August Belmont is go ag to retire from the turf is premature. Brown Hal, the pacer, is said to be mov-ing quarters at an amazing gait, and Johnston's record is said to be in danger. Another shattered turf idel like Tenny, he Suburban Inverte, was Surefeet, the nottest English Derby favorite on record. Pierre Lorillard will buy racing stock om the Duke of Portland's stud under be condition that he is not to race in

The very people that last year were de-claring Isaac Murphy could not ride a little bit are those who, since he rode Sal-rator in the Suburban and the match with Tenny, are saying that he is the greatest living artist in the pigakin.

According to the Australian papers the fastest mile ever trotted in that country was 9,80%, by the classimit stallon Hopsey, by Friam. Honesty had a record of the first in America. He was disposed of at a late sale in Sydney for \$3,100.

George Taylor has been for some time a more or less popular jockey, but if he rides as many winning mounts as he has lately he will become the popular favorite, vice Bergen, Hamilton and some others. The public is even more fickle in this than in

There seems to be a inmentable want of harmony in action between the custern and western racing associations as regards the enforcement of the sentences on delinguish jockeys. It creates an exceedingly bad precedent to ignore the rulings of any more track of good standing and may lead to serious complications in the future.

Within a radius of five miles of Nash-ville, \$3,000,000 would not cover the value of the horses and the means for taking care of them. Among the prominent breeding establishments are Belle Meade, Harnitage Stud, Meirose, Morrowdale, Maplewood, Whitlands, Two Rivers, Clif-ton, Oak Hill. Springbrook, Ewing, Hays-view and Heart of Oaks.

That Axtel and Sunol will meet in one race and possibly three before the close of the season is almost an assured fact. The champion stallion will not be in condition before September, although Doble finds that he still possesses his wonderful burst of speed, while Marvin gave the public a line on Sunol recently when he sent her a quarter in 31 1-5 seconds.

THEATRICAL NOTES.

The Park theatre, Brooklyn, has been decorated at an expenditure of \$50,000. Clara Morris has given the play "Helene" back to its author, Martha Morton, and decided not to use it any more.

The fourth year of "The Old Homestead" at the Academy of Music, which begins in October, will be marked by the introduction of a revolving scene. Other new and attractive features will also distinguish the production.

An Italian version of Balfe's "Bohemian Gri" is announced for next season at the Sannaszaro theatre in Naples, where re-vivals of Mozart's "Flauto Magico" and Picqini's "Cechina" are also promised as specimens of the old style of opera.

FASHIONS FOR MEN.

A rough straw hat of fine quality, both in white and black, is the latest novelty in

There are a number of excellent stand up tab collars, such as the "Mingo," "Spo-tane" and others.

In the most recent Ascots and DeJoin-rilles the patterns are in similar designs to those of the outing flannels and cloths, be-ing of soft silk texture and in varying sidths of stripes upon a white background. This is a detail that should be noted in the purchase of a neglige shirt: A skimpy collar on a neglige shirt, one that is not cut so as to show well above the outing cost, will produce a very sorry and inade-quate effect.

With the colored shirts a quiet, solid color in cravate is most effective. But there is agreet multiplicity of patterns and color-ings to choose from. They are not to be worn with the neglige shirt.

The unexpected acceptation of the cravat is but another indication of the growing demand for tisable goods. The cravats have indeed quite superseded the buckle madeup goods. The reigning widths are from 1% to 1% inches.

A good fingermark of the turndown tendency is the fact that a number of the tendency is the fact that a number of the custom made shirts, with collars attached, have recently been ordered with turndown collars, and these, concurrently, were cut especially high in the neck.

FACTS ABOUT AMBER. Under the stratum of trees is found pyrites, sulphate of iron and coarse sands in which are rounded masses of amber. The largest amber mines in the world today are along the Baltic, between Ko-nigsberg and Memel, on the Prussian

The Romans discovered the true nature of amber, that it is a feasilized vegetable gum, and therefore gave it the name of succinum, or gum stone. Amber is sparingly cast on the Swedish and Danish coasts, and occasionally pieces are picked up along the shores of Norfolk, Essex and Sussex in England.

The great source of the supply of in all ages appears to have been the Baltic coast, from which the supplies of com-merce still continue to be drawn. Amber was regarded by the ancients

with superstitious reverence because of its unknown origin and on account of the electrical phenomena which it exhibited. Large quantities of amber are thrown up from the sea on the Baltic and Prussian coasts, and obtaining amber from the sea is a regular industry, giving employment

to large numbers of people. The most beautiful specimens of amber are said to be those found at Catania, which show a beautiful play of color shad-ing to purple. Amber has also been found in different spots in Siberia and Greenland. The trees from which the amber gum ex-uded stood in forests of past epochs, as many ages are necessary for the transfor-mation of the substance, and are now form-

During the reign of Nero an expedition was sent from Rome to explore the amber producing country, and so successful was the search that 13,000 pounds of amber were brought to the emperor, including one piece weighing thirteen pounds. Amber has been found in various parts of the green sand formation of the United States, either embedded in the soil or in beds of mari and lignite. The principal localities are at Amboy, N. J.; at Gay Head, on Martha's Vineyard, and at Cape Bable.

The philosopher Thales, of Miletus, 600 B. C., noticed that amber when rubbed attracted light bodies to itself, and this observation was the foundation of the wonderful science of electricity, which was named from electron, the Greek word for amber.

It is not altogether certain what trees exude the amber gum, though one species of fir, pinetes succinifer, has been accepted, somewhat provisionally, as the amber yielding tree; but noted botanists have shown that the exudation may have proceeded from other reselved from other reselved.
