What Was the Matter With Senators?

It is only just in this connection to remark that the House has shown itself the superior body of the two, and if the Senate had done equally well there would be less for Republicans to deplore and be ashamed of. What is

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhos and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea-the Mother's Friend.

Castoria.

H. A. ARCHER, M. D.,

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its od effect upon their children." FO DR. G. C. OSOCOD.

Castoria.

Lowell, Mass. " Castoria is the best remedy for children of

which I am acquainted. I hope the day is not far distant when mothers will consider the real rest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by foreing opium, morphine, soothing syrup and other hurtful ts down their throats, thereby sending them to premature graves.

Adirondacks to Be Preserved.

gave an opinion that the land commissioners had no right to grant State lands to railroad corporations, and after the wide boards ; 12, 14, 16, 18 and 20 public meeting to consider the application of the Adirondack and St. Lawrence Railroad Company the board went into secret session and decided to sustain the attorney general. This decision gives great satisfaction to the people who have been so zealously trying to keep the great North Woods (as much almost the pride of the State as Niagara itself) from the inroads of the lumber and railroad vandals. The health giving wilds of the Adirondacks will thus be preserved for the people's use.

How Canadians Get Money.

The Canadian fisheries report gives the total value of the fisheries for 1890 as \$17,-714,902, an increase of \$59,646. The total value of the marine fur fishery in Bering Sea and adjoining waters was \$510,111, showing a total catch of 54,853 seals. The number of fur seal caught by foreign ves-sels and disposed of in Victoria was 8,474, of which all but 294 were caught in Bering Sea. The total value of the Canadian seal catch was increased \$177,861. owing to the advance of \$1 per skin and the increase of 11,181 skins in the catch.

A Real Balsam is Kemp's Balsam

The dictionary says, "A balsam is a thick, pure aromatic substance flowing from trees." Kemp's Balsam for the throat and lungs is the only cough medicine that is a real balsam. Many thin, watery cough remedies are called balsams. but such are not. Look through a bottle of Kemp's Balsam and notice what a pure, thick preparation it is. If you cough use Kemp's Balsam. At all druggists'. Large bottles 50 cents and \$1.

High Explosive From Powder Guns.

While further experiments are to be made with the pneumatic guns of the Vesuvius, many naval officers believe that guns of this type will be entirely supereded in a short time by the development of a system of firing high explosives from a powder gun. The French have been working on that line and claim extraordinary results with their explosive known as melenite, the composition of which is kept as closely secret as the ingredients of their celebrated libel powder. It is claimed for this compound that the French have been able to throw melenite shells from high power guns with veloci-ties as high as 2,000 feet per second, and that 70 pound charges have been repentedly fired from howitzers with a velocity of nearly 1,300 feet per second. The ordinance bureau of the Navy Department has been engaged in similar experiments, and at the Newport Torpedo Station succeeded in firing Emmensite 25 times from a 20 pounder bronze rifle, but on the 25th round the shell exploded in the gun. The explosion was attributed to a defect in the shell. Good results have also been attained with bellite, and other compounds have been experimented with. Improvements are being made in these compounds from time to time, and it is very probable that within the next year or two high explosives will be fired from powder guns with velocities approxig those attained by the ordinary ervice charge of provider.
