### A LETTER AND ITS ANSWER.

STILLWATER, JUNE 26.

REV. MR. HOUTZ.  
Dear Sir:—There are several persons in the vicinity who desire to hear you and Elder Singer discuss the question as to whether sprinkling is Baptism. Mr. Singer will affirm, that immersion is the baptism commanded by Our Lord and Saviour Jesus Christ. Will you deny it?

Will you affirm that sprinkling water on the person in the name of the Father and of the Son and of the Holy Ghost is Scriptural Baptism? Mr. Singer will deny it.

Two persons have agreed to give you \$10.00, to do so. Your own members requested me to write this. Name your time and place.

Yours Truly,  
W. L. McHENRY.

### REPLY.

Dear Sir:—While I personally cherish the most kindly feelings toward you and your father's family, I must confess that you have been inveigled into a most ungainly muddle and delusion. You say, several persons in this vicinity desire to hear Elder Singer and I discuss the subject of baptism and that you wrote your letter at the request of my members. Why did not those "several persons" or "my members" (?) themselves speak to me or write to me about the matter, as they had every opportunity? They undoubtedly felt the impropriety of such a course I would advise you as a young man hereafter to let the originators of a project like this assume the responsibility themselves.

Your letter undoubtedly was intended to be a challenge. It has been boastfully so declared. But it is not a challenge. To be this it must come direct from Elder Singer. Had he just coming into the community sent an unprovoked challenge to me a resident pastor and a perfect stranger to him, I should have regarded him devoid of the sense of honor and propriety. But your letter however innocent it may appear to you, knowing the inducement as I do, was instigated by a morbid desire for contention which is so characteristic of some people and of one church in particular. Last February I delivered at the St. James and the Zion Church, being less than two miles from Stillwater, a lengthy discourse on the subject, sprinkling the true mode of Baptism. I announced this discourse two weeks in advance. The church was filled, many of your own church people were there among whom was Elder MacNamara who listened with gentlemanly patience to the discourse.

This discussion was highly satisfactory to my people and myself, as well as the public generally. Now what more do you need? Do you want more light on the subject or more fight? I am inclined that you want more of the latter. In these public discussions, the disputed questions are not absolutely settled. Cutting things are said, animosities are engendered, and the cause of Christ dishonored. If I thought any real good would come out of another public discussion I certainly would enter the field with any man you would place there, providing he is in good standing with his own church which I have been informed is not the case with Mr. Singer. My advice to you and your people is to cultivate peace among your own church membership and with your neighbors.

Respectfully Yours,  
A. HOUTZ.

### A Real Balsam is Kemp's Balsam

The dictionary says, "A balsam is a thick, pure aromatic substance flowing from trees." Kemp's Balsam for the throat and lungs is the only cough medicine that is a real balsam. Many thin, watery cough remedies are called balsams, but such are not. Look through a bottle of Kemp's Balsam and notice what a pure, thick preparation it is. If you cough use Kemp's Balsam. At all druggists'. Large bottles 50 cents and \$1.

### POULTRY NOTES.

NO. 21.  
Filt means disease—death.  
Have you put coal oil on the roosting poles?

Feed corn occasionally to chicks, as soon as they will eat it, as grain of any kind, especially the larger sort has a tendency to keep gaps in check.

An occasional feed of meat of some kind will increase the growth of your young chick wonderfully.

If the wing feathers grow too fast and become too heavy, so they droop, take a pair of scissors and clip them off.

The breeds that feather quickly require more nourishment than these that feather more slowly. Give them plenty of meat, and raw egg, mixed with bread.

When a fowl of any kind dies, do not throw it over the fence, but bury it, as it is liable to transmit the disease to others of the flock, and there is danger of the family catching some contagious disease from the stench arising from it.

W. B. GERMAN.

**LORD PALMERSTON SAID**  
To a committee complaining of the health of London: "Belly is not God of the shuffles; look to your sewers." So when men complain of rheumatism, gout, neuralgia, dyspepsia, skin diseases, boils, liver and kidney troubles, help yourselves—purify your blood. Cactus Blood Cure will neutralize and eliminate any blood impurity in your system. Don't be shiftless.

### WALLER.

A number of people of this community attended Children's service at Wesley Chapel on Sunday.

Mr. and Mrs. Shortiss are visiting Rev. S. I. Shortiss.

Mrs. Paul Klingler is lying dangerously ill, with hopes of recovery.

Mr. and Mrs. H. E. Yorks of Nippenose Valley are visiting the Messrs. Yorks this week.

Rev. Albertson occupied the pulpit last Sunday evening. Mr. Albertson is a young man who has just begun the work as a minister and we wish him success in his well chosen work.

At an early hour Saturday morning the people began to arrive at the picnic grounds in "Kitchen's Grove" and by noon the tables were so nicely arranged that all seemed anxious to hear the bugle call them to partake of the rich viands. In the evening a festival was held for the benefit of "Pine Grove Sunday School."

We are once more pained to record the terrible accident that cost the life of Mr. John Andrews formerly of this place but who has for some time been working at the "Hub Factory" in Jamison City. While Mr. Andrews was rolling logs along the side of the mountain he saw that he was in danger of being crushed by the logs breaking loose above him and seeing a stump by which he hoped to find a place of safety, he took the opposite side from the log, but the place was not secure, the log struck the stump and breaking it off, killed him instantly.

### The Trials of Winter.

Winter is a trying period, even to those who have strong constitutions, but it is doubly trying to those who are weak and delicate, or who have a tendency to the various diseases that are bred and fostered in the stagnant atmosphere of closed and heated houses. The system should be kept strengthened and toned up with a liberal course of S. S. S., the great blood tonic and purifier. It acts like a charm. It increases the appetite, soothes the nerves, and beautifies the complexion—in short, it makes life well worth living.

### TWO AGED PERSONS.

Mrs. Wm. Creasy, aged eighty-one years and three days, and Mrs. Moyher aged ninety years, were both buried by Rev. Neiman, at Catawissa Sunday afternoon. Both funerals met at one graveyard. Rev. Neiman first attended to the funeral of one, and after the funeral services were held for that one, turned to the second. When both bodies were interred, all parties rejoined at the church where a sermon was preached by the pastor.

A large party consisting of Mr. and Mrs. Richard Oswald, Mr. and Mrs. S. F. Peacock, Mr. and Mrs. W. L. Rishton, Miss Moody, of Sunbury, Lilla Sloan, Vida Miller, Messrs. Wilson, Pursel, and Hanley, are camping out at Lilly Lake.

"A Day of National Rejoicing," is the subject to be discussed at the Young Men's Christian Association next Sunday afternoon at 2:30. The Rev. Wm. C. Leverett will make the address.

A hearty welcome to the men of this community.

### A Daring Project.

One of the features of the coming electrical exhibition at Frankfurt-on-the-Main will be the transmission of power on a scale hitherto never attempted. When it was announced some months ago that it was proposed to transmit 10 horse power from Laufen-on-the-Neckar to Frankfurt, a distance of more than one hundred miles, the statement was received with smiles of incredulity, but now it seems quite probable that not only will the experiment be tried, but that it will succeed, in spite of the engineering difficulties that have to be surmounted.

The government has been asked to supply line for the purpose, and on the part used the expense will not necessarily be at all severe, for the use of very high potential alternating currents is the feature of the scheme as at present planned. The alternating generator will supply step-up transformer, that in turn will transmit its secondary current at an enormously high potential along the line to be re-transformed by a step-down transformer at Frankfurt to a potential practicable for an alternating motor.

A series of experiments carried out recently at Oerlikon involve the use of currents as high as 33,000 volts on the line. At such a potential the current transmitted becomes so small that the heat's a relatively small factor in the losses incurred, even though it be of the extreme length proposed. Nothing can better illustrate the characteristic advantages of the alternating system than the beautiful process of generating and utilizing currents at a moderate potential and transmitting them from station to station at a pressure so enormous that the losses in transit become insignificant.—Electrical World.

### Sounded Like a Cyclone.

Two young men of the city are said to have gone out walking a day or two since, when they chanced to stroll into the old pond place above the upper factory. They heard something like a cyclone and were very much alarmed until they approached the old dam, under which was a square hole which was originally left to draw off the pond occasionally. In this was seen five large serpents which were standing upright and hissing most vigorously.—Athens (Ga.) Leader.

### W. RADAM'S MICROBE KILLER

## CURES ALL DISEASES.

It is conceded beyond a doubt that fermentation (microbes) is the cause of all disease, and we claim that no medicine can cure disease unless it has the combined qualities of a BLOOD PURIFIER, ANTISEPTIC and TONIC. This powerful combination stops fermentation and arrests decay, thereby assisting nature to cure. We will mail you circulars free, explaining the germ theory of disease.
