The plum and peach are budding rapidly and the buds found to be in a healthy condition. The mild winter has not affected any of the small fruits.

Scrofula, boils, pimples, rheumatism, catarrh, and all other blood diseases. "There can be no question as to the superiority of Ayer's Sarsaparilla over all other blood-purifiers. If this was not the case, the demand for it, instead of increasing yearly, would have ceased long ago, like so many other blood medicines I could name."—F. L. Nickerson, Druggist, 75 Chelsea st., Charlestown, Mass.

"Two years ago I was troubled with salt-rheum. It was all over my body, and nothing the doctors did for me was of any avail. At last I took four bottles of Ayer's Sarsaparilla, and was completely cured. I can sincerely recommend it as a splendid blood-purifier."—J. S. Burt, Upper Keswick, New Brunswick.

"My sister was afflicted with a severe case of

SCROFULA

Our doctor recommended Ayer's Sarsaparilla as being the best blood-purifier within his experience. We gave her this medicine, and a complete cure was the result."—Wm. O. Jenkins, Dewese, Neb.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children." Dr. G. C. Osmond, Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves." Dr. J. F. KINCHLOP, Conway, Ark.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it." Mistakes in the Management of Country Roads.

As a general thing, the country roads on this continent have been so badly located that to build costly pavements upon the present lines, and previous provide elaborate system of drainage, would be a dreadful waste of money. As it is ordinarily beyond the means of the country people to do more than improve the present condition of their roads, this is the task that they should undertake as soon as possible. In beginning such a task, the first step to be taken, in my opinion, is to stop doing that which has generally been the custom in this country—that is, working the roads. Working the roads, as it is usually practised in this country, consists in calling out in each road district a gang of men who "work out" their road tax under an overseer elected by the people. The labor done is worse than thrown away, for it is rare indeed for either the overseer or the men under him to have any clear comprehension of what is needed. Fortunately for the well-being of our roads, these men do not work very hard, but rather choose to regard the few days on the road as a kind of holiday outing, a picnic frolic and a means of getting rid of a certain amount of tax. If they really worked with all their might, they would make the roads almost as unpassable in the summer as they now are in the late winter and early spring. With some kind of a glimmering idea that ditches on each side of a road are good to have, they plough up these ditches, together with the sod that grows down into them, and pile all of this muck in the middle of the road. This material, it may be said, has a most excellent fertilizing value, and if it were put upon the fields instead of in the roads it would amply repay the farmers who carted it away. But in the roads it is a sad and an immediate hindrance to travel. Luckily the friendly spring rains usually wash it back into the ditches, where it stays until there is some more tax to be "worked out." When these rains are not sufficient to wash away these impediments that have been deliberately placed in the roads, the consequences are very dusty roads during all the dry season.

In some neighborhoods a little more ambitious than those generally to be found, they mend the roads by placing gravel and broken stone upon them. Then the overseers say that they are macadamizing the roads. Without thoroughly draining the road-bed, to put either broken stone or gravel upon it is merely a waste of money and labor, and the ambitious neighborhoods so doing prove in the end no wiser than those who cover their roads with muck. But it is within the means of every neighborhood in the United States to materially improve their roads at once—improve them so much that where the traffic is not extremely heavy and continuous, the roads will be in tolerable order nine months in the year, and very much better than at present, even when the frost is coming out of the ground at the beginning of spring. And this can be done in three or four or five years without spending one penny more than is now spent in the hurtful methods mentioned.—Harper's Weekly.
