Would you rather buy lamp chimneys, one a week the year round, or one that lasts till some accident breaks it?

Common glass may break or not the minute you light your lamp; if not, the first draft may break it; if not, it may break from a mere whim.

Tough glass chimneys, Macbeth's "Pearl-top" or "Pearl-glass," almost never break from heat, not one in a hundred.

Where can you get it? and what does it cost?

Your dealer knows where and how much. It costs more than common glass; and may be, he thinks tough glass isn't good for his business.

Some one has said that a bargain is an article sold under its real value. Some advertisers are not believers in this theory or are as economical of the truth as they are with their bargains.

But "an honest tale speeds best being plainly told." This is our purpose in offering Wall paper bargains. They are bargains because they are as we represent them, full length, full weight, bona-fide goods.

We know one instance of a bargain in wall paper which after it was on the walls lead pencil marks showed through. Whose was the bargain? Come and see us before buying elsewhere.

EAST BENTON.

The Turbotville Lime company, known as the firm of Hughes and McHenry of Cambra, and Low of Orangeville, ship a superior quality of land lime, at low rates, to the farmers within railroad range, equal to the capacity of their present number of lime kilns. Their shipping averages about 1,400 bushels daily. Their lime exceeds in quality the expectation of the general public.

Personal acquaintance with the Cambra portion of the firm justifies the prediction that a large and profitable trade will be built up by them, if energy, perseverance and honesty are taken into consideration.

Canned Fruit from Pompeii

Do you know that we are indebted to the old Pompeians, who lived in the first century Christian era, for our knowledge of how to can fruit? Perhaps not, but it is a fact, nevertheless. Years ago, when excavations were first being made on the site of the old lava-covered city, a party from America found a jar of figs; not only one, but several. Upon opening one of them the contents were found to be as fresh and perfect as when first put into the jar nineteen centuries before! Investigations instituted on the spot proved that the fruit had been put into the jars in a highly heated state, and that an aperture for the escape of steam had been left in the lid, which, when it had served its purpose, was sealed over with wax. Yankee ingenuity caught the idea at once and the next year canning factories were erected all over the United States.
