Thence they went to Hotel Del Monte at Monterey by Pacific steamer, from whence they started eastward. They have been absent several months.

Bicycles are becoming the rage now. Since the invention of the safety wheels, anybody can ride one. Prof. Welsh, Prof. Butts and W. H. Housel, all of the Normal School, are among the latest additions to the list of riders. It will soon be a very common thing to see young ladies riding them. Several already have them.

When Governor Pattison passed through Berwick last week Tuesday, the Berwick Cornet Band, twenty-four members, hailed him at the depot with some fine music. About five hundred citizens were present, and the Governor made a short speech. Col. A. D. Seeley of his staff, joined him at that point, and it was through the Colonel that the demonstration was made.

The body of Mrs. Sheppard was brought down from Elk Grove over the B. & S. railroad last Saturday evening and taken to Scranton for burial. She received a paralytic stroke, some time ago from which she never recovered. Her son is a member of the firm of Sheppard & Burchard.

A man giving his name as Dr. Nye is traveling over this county representing to be the agent of J. G. Wells. Mr. Wells wishes to announce that he has no agent traveling for him, that he will not trust the delicate work of testing eyes and fitting glasses to any agent, but will attend to all that class of work personally. The public will bear in mind not to be misled into either purchasing glasses or paying bills to any one who represents himself as an agent of J. G. Wells.

It does one's eyes good to look at the stock of J. G. Wells. It embraces cut glass, fine china, watches of all kinds in great variety, solid silver, and a general assortment of plated ware. There is no occasion for any one to send away from home when there is such a stock right here to select from.

Charles Krug, the contractor, has the Phillips building ready for the painters. He has done some rapid work. It is only about four weeks since the work of repairing was commenced, and in two weeks it will be ready to be occupied. With this addition Mrs. Phillips will have a number of fine bed rooms. Nearly all have been rented in advance.

Thomas P. Sparhawk died last week Thursday evening. Services were held in the Presbyterian Church on Friday afternoon, and the remains were taken to Philadelphia on Saturday in charge of a cousin. Swarms of grasshoppers have made their appearance in Bald Eagle Valley, Clinton county, and are doing considerable damage to the crops. Hugh W. Appleman of Buck Horn has invented a valuable machine for the farmers. It is called the Appleman Corn Husker. It will prove very valuable in saving wear on the fingers, hands and clothes and the damage in sitting on the damp ground. Mr. Appleman expects to attend the Farmer's encampment at William's Grove next week, and show the merits of his machine. The machine can be operated either by hand or power.

Although Mr. Bonelli is the youngest star on the American stage playing the rounds of tragic and romantic roles he is unsurpassed—if equalled—by his elders in certain of his characterizations. His Romeo as well as his Claude Melnot are impersonations of a genius that is bound to make itself felt wherever witnessed. His interpretations are all artistic and manly, and imbued with a magnetism that charms. In presenting *The Silver Mask* to his patrons—the public—they will have an opportunity of witnessing his versatility in a remarkably strong and interesting play, and we feel confident that *The Silver Mask* will leave a pleasing impression behind, and our star gain a permanent place in your heart.—Opera House, Bloomsburg Friday evening Aug. 26th.

Reports of the ravages of cholera in Europe are alarming. Every precaution should be taken to prevent its entrance to America, and the officials at the several ports of entry are keeping a sharp lookout on the emigrants that continue to flock here.

Laporte is likely to have a boom before many seasons pass. The Lake Makomo Association recently held a meeting to take action in regard to granting the right of way to the Williamsport and North Branch railroad, through grounds of the association, from Nordmont, the present terminus of the road, to Dohm Summit, a distance of seventeen miles, to make connection there with the Lehigh Valley railroad. The right of way was granted, General Manager Welch agreeing to erect a handsome station at Lake Makomo.

The grove at the east end of the lake at Makomo will be converted into a large picnic ground, and a side track for at least twenty-five cars will be laid.

It is expected that cars will enter Laporte over the above road on Christmas day.

It is rumored that an electric railway will, before many months pass around, connect Lake Makomo with Eagle's Mere also Highland Lake with Eagle's Mere.

Where the Fashions Come From.

Fashion is called a "fickle jade"—and yet nearly every style is designed with some special object in view. Often the manufacturer has created some new material which he intends to place before the merchant; to make the best impression possible he has samples of the new material placed with some of the best modistes whose special designers will study the goods, its color and texture, and its combinations with other colors and materials. While experimenting with the material they create some new style to attract attention; these designs are reproduced in colored plates and sent to all prominent dealers to give them an idea of the value of the new material. If these styles are liked they become the fashion.

Sometimes a dress made for some leading artist, who has to dress as well as act the character in the play, is often so beautiful or unique as to cause a sensation, and it immediately becomes all the rage.

Most large establishments in Paris have special artists who furnish them each month with a certain number of new styles suitable for the season and the new materials. From these the best are selected and the garment made up accordingly.

The reason *La Mode de Paris*, *Paris Album of Fashion* and *La Couturiere* give the earliest styles and those that are reliable is because they are at the very fountain head of Fashion and know just what is going to be popular. When you get a fashion journal get one upon which you can depend for correct ideas of style and material, for remember that if you wish to show correct and good taste yourself you will need to study those styles which are artistic and reliable. If you wish to keep up with the styles we advise you to subscribe for *La Mode de Paris*, \$3.50 per year, or *Paris Album of Fashion*, \$3.50 per year. These are the most artistic fashion journals published. *La Couturiere* is a fine home journal for \$3.00 per year and *La Mode* is only \$1.50 per year.

You can generally get single copies from your newsdealer, but do not allow him to give you some other journal for one of these. You can get them if you write to the publishers, Messrs. A. McDowell & Co., 4 West 14th Street, New York.

A CALIFORNIA LEMON.

Through the kindness of Register and Recorder C. H. Campbell we have on our table a lemon that surpasses in size any that we have ever seen. It measures fourteen inches one way, and twelve inches the other. It was grown in California, and is one of a dozen sent in by Miss Madge Campbell, who for the past year has resided in San-Bernardino. She went there for her health, and we are very glad to hear of her continued improvement. She will remain until next June.

This Man Don't Strike.

There is a man in the employ of Browning, King & Co., the great clothing house, who is paid \$10,000 a year for designing patterns and styles. His career is quite an interesting one and an incentive to all skilled laborers. Apprenticed at an early age to a Liverpool tailor, he ran away intending to come to America but was apprehended by his master and severely punished. Again he tried to escape with no better success, but undaunted he finally accomplished his purpose. Arrived in New York, he was not long content to work for wages but started a shop of his own where his talent secured him fashionable patronage and made him known to Messrs. Browning King & Co., who bought out his store and engaged him at \$10,000. As their sales amount to over \$11,000,000 per year they must have the best designs and styles, regardless of expense.

BILLS.

A mosquito's bills is an elaborate contrivance, and consists of two sharp claws and a lance enclosed in a sheath, which is also employed as a pump. The saws are bony, but flexible, and the teeth are near the end which is pointed. The lance is perhaps the most perfect instrument known in the world of minute things. It is first thrust into the flesh and the opening is enlarged by the saws, which play beside it until the sheath can be inserted. The sawing is what causes the irritation when a mosquito is biting.

There are other bills that cause irritation. Sometimes it is the milliner or dressmaker, or the doctor or the butcher. The only kind of a bill that does not seem to cause any irritation is the printer's bill. Nobody ever seems to pay any attention to it.

KITCHEN'S COAL WAGON.

D. W. Kitchen, always enterprising and pushing, has purchased a new coal wagon with which coal is unloaded by gravity, without any shoveling. It saves time and labor, and avoids dust. The cut below shows how it operates. Turn it around and look at it, and then order some coal of Kitchen.

We would like to publish next week a list of four or five hundred names of contributors. Will you be one of them?
