Rev. E. E. Davidson,

In *The Examiner* of Jan. 26, 1893, we find this word relating to the work of Evangelist Davidson in Pottsville R. I.

Early last spring the Protestant pastors of this city and Central Falls formed a fraternal union. Out of this union has grown the beginnings of what promises to be an exceedingly gracious work. Twelve of these pastors have with great wisdom and skill united the force of their churches in a grand evangelistic effort, carefully planned, and now in happy progress. Music Hall, the largest assembly-room in the city, was secured; the Rev. E. E. Davidson, of Massachusetts, engaged to conduct the services; twelve union prayer-meetings held in preparation; a printed invitation placed in every family in the city and neighborhood, and the 8th inst. the meetings were begun.

Two thousand three hundred persons attended the first night in Music Hall and the two overflow meetings. On the fourth evening Mr. Davidson began to preach directly to the unconverted, and seven persons expressed themselves desirous of entering it to fellowship with Christ. From this point the work has grown steadily. The hall is packed every night, afternoon meetings are held every day, and hundreds of inquirers are coming forward for prayer and instruction. Mr. Davidson's spirit is unexceptionable and his method admirable. The Lord is moving among all classes of society, and many are saying, like the Greeks in the temple, "We would see Jesus."

Mr. Davidson will hold his first meeting in Bloomsburg next Sunday afternoon at three o'clock, in the Opera House. He desires that this meeting shall be especially for the young people of Bloomsburg, though he does not limit the age and will welcome all who wish to come.

Dairy-men and stock raisers all buy Bull's-Head Horse and Cattle Powder. For distemper, hidebound, and loss of appetite, it is without a peer in the market. Price 25 cents per package.

Algernon Charles Frederick Sartoris, who married Nellie Grant, died Friday at Capri, Italy.

The married life of Mr. and Mrs. Sartoris was not a happy one, owing to the husband's habits. The wedding, which occurred in the East room of the White House, on May 21, 1874, was a most brilliant one, but soon after Mr. and Mrs. Sartoris had taken up their life at his home, in England, rumors of their incompatibility came to this side, which were finally followed by the separation of husband and wife, through no fault of hers. Mr. Sartoris' father who was a wealthy Englishman, so respected his son's wife that in his will he left his fortune to her, and only an annuity for his son. It was provided, however, that the children should be educated in England.

### THE STATE AT THE WORLD'S FAIR.

THE EXHIBITS WILL BE CREDITABLE AND NO MONEY WILL BE WASTED.

Executive Commissioner Farquhar said recently concerning the statements that the Pennsylvania World's Fair fund was practically exhausted: "There seems to have been some misunderstanding about my statement that we had a reserve to come and go on of about \$1,000. But it must be borne in mind that no final reserve is necessary since in each department of the work we have calculated a sufficient margin to come and go on." "For instance, there was allotted to the department of agriculture \$12,000. We expect to get through the work there for \$2,000 less than that sum and to save as much from the allotment to the department of horticulture, after paying all expenses of transportation, installation, attendance, return of goods to owners, etc. The department of live stock would require about \$15,000 if we paid the expenses of transportation and maintenance, hence our idea has only been to pay a premium for the best cows, etc., rendering such general assistance as might come in our way, but we may have \$10,000 left to assist in the live stock exhibit.

"The Fishery Commission agreed originally to make the display for the sum allotted, not to exceed \$3,000, but at that time they did not anticipate furnishing the aquaria, etc. When we came to look into the matter we found that this exhibit could not be made satisfactorily for less than \$6,000, but it will be a credit to the State, and one of the most interesting Pennsylvania exhibits. Twenty thousand dollars were allotted to mines, mining and metallurgy. More than that will be expended, but Mr. McLeod, of the Reading Railroad, gives us the breaker and the coal.

### HOW SOME WHISKY IS MADE.

Monday's session of the sub-committee of the House judiciary committee of Congress investigating the Whisky Trust, was devoted to watching experiments by Mr. Veazey in producing liquors by adulteration. By the use of essential oil, essences and coloring matter he produced in a few minutes whiskies, rums and gins similar to those that were placed on the market and sold as pure goods.

The basis of this product was an odorless and colorless liquid known to the trade as spirits. It was worth about \$1.30 per gallon. By the use of compounds worth about 1 1/2 cents he produced a gallon of liquor that would sell as high as \$4. The production of adulterated goods represented one-half the liquor business of the country.

By misrepresentation these goods were worked upon the entire trade of the country. Mr. Veazey urged that certain witnesses (no names given) be called as soon as possible, as some of them would find it more convenient to be in Europe than before the committee if they were given time.

### Theatre Hats and Bonnets.

One feels tempted to leave to the industrious protest of the daily press the question of high hats and bonnets worn in the parquet of a theatre, writes Mrs. Burton Harrison in the fourth paper of her series "The Well Bred Girl in Society" in the February *Ladies' Home Journal*. But in this season of extraordinary wings and rampant bows, the nuisance has sprung up with redoubled force. A distinguished actor recently remarked that, during the first act of a play New York was flocking to see in its first week, he was so transfixed by a bonnet that appeared in the seats behind the orchestra as to well nigh forget his part. To illustrate, he took possession of the folding fan of the lady with whom he was talking, and held it at full width upon his head. "I give you my word," he added, "the bow on top of her head was about this size and shape." A little, a very little, consideration among women on this score would bring about reform. To leave off a bunch of ribbons here, a cluster of flowers there, surely would not impair the brightness of the eyes and cheeks beneath the headgear. And the consciousness of having won the gratitude of scores of seat-holders, ought, in any case, to console the wearer of the milliner's night-mare so abbreviated.

# It Tastes Good

One reason why *Scott's Emulsion* of Pure Norwegian Cod Liver Oil and Hypophosphites of Lime and Soda has had such a large sale is because it is "Almost as palatable as milk;" but the best reason is that its curative properties are unequalled. # Rupture

J. A. SHERMAN, HERNIA SPECIALIST, respectfully notifies the public, especially the many who have called at his New York office during his absence that he has returned from his European office, London, England, where his successful treatment and the marvelous cures resulting from it, received the approbation of the most eminent Surgeons of Europe. His fame soon spread, crowding the London office with the victims of Hernia anxious for relief. Patients who had endured long years of suffering came to consult him from India, Russia, Germany, Belgium, France and other countries. The remarkable cures made in London of chronic cases of patients, who had been at the various hospitals and under the care of the most eminent English Surgeons without obtaining relief, consulted J. A. Sherman, and were at once relieved and eventually restored to a state of soundness through his method to the astonishment of the eminent Surgeons who had formerly treated them. In the case of Mr. Henry James who had been a great sufferer for over 20 years, his wonderful and complete cure was certified to by that distinguished surgeon and operator on ruptures at Kings College, John Wood, F. R. C. S., F. R. C. E., also Dr. Edward Bellamy, Fellow of the Royal College of Surgeons, Surgeon to Charing Cross Hospital, etc., Sir Henry Thompson, Surgeon at University College, London, and others. J. A. Sherman's extensive practice in the treatment of Hernia in its various forms with a success unparalleled in all previous ages, is of the highest value to those who are afflicted with rupture and hope to be once more sound. In J. A. Sherman's treatment there is no operation or restriction from labor, while there is relief from the torment and injury of wearing trusses and security from that terrible condition known as strangulated rupture, to which every victim of Hernia is daily subject. His Book of information and indisputable proofs is mailed to those who send 10 cents. His Book of photographic likeness, showing the condition of patients before and after treatment and cure, is sent by express on receipt of 25 cents. Call on or address.
