THE COLUMBIAN, Bloomsburg, Pa.

FRIDAY, MARCH 31, 1893.

WASHINGTON LETTER

WASHINGTON, March 27, 1893. Economy is the watchword in every department of the government and it will not be changed as long as democrats are in control. One of the very first things that President Cleveland impressed upon the minds of the members of his cabinet was that each of them should be liberal in the use of the pruning knife in cutting off sine cures and uscless employes under them. Something has already been done in the cutting off line, but what has been done is as nothing when compared with what will be done. President Cleveland wishes the head of the department to anticipate the findings of the Congressional joint commission, which has already organized, for the purpose of investigating the work of the government departments, with a view to a reduction in the number of employes and an improvement in the present slow and in many instances cumbersome methods of transacting business, wherever possible. To change the methods will in many cases require a change in the law, but to compel every employe of the government to render an honest equivalent for the salary received, and to dismiss all tile drones and shirks is within the power of the heads of the departments under present laws, unless somebody weakens it is going to be done. I heard of a case the other day which indicates that there is one Secretary who will not weaken, no matter what influence may be behind the shirker. By accident Secretary Carlisle learned that an \$1,800 clerk -a woman-had only been on duty about half the time during the last 12

Mrs Cleveland has not indicated whether she intends holding any public receptions this spring, but all who desire to meet her can do so by writ ing and requesting that privilege, as she sets aside an hour twice a weekon Tuesdays and Fridays-to receive those who have in this way obtained her permission to call on her.

months. He sent for her chief and

asked why this had been allowed. "Be-

cause she is backed by Congressman

-(naming one of the most influential

members of the House)" "That is no

excuse at all," said the Secretary;

"dismiss her at once, and understand

that all the clerks in this department

have got to work for their salaries or

Almost as many misstatements have been made concerning the status of the extra session of the Senate as about the intentions of President Cleveland. Long stories have baen written, and editors who knew no better have printed them, about the Senate remaining in session against the wishes of the President, and about the annoyance it was causing him. As a matter of fact, the extra session only continues at the pleasure of the Presi dent, and as soon as he shall notify the Senate that he has no further communication to make to it, adjournment will follow, unless precedents are all set aside. So powerful is precedent that at this writing it seems probable that the democratic officers of the Senate will not be elected at the extra session, although they have been nominated by the caucus and a resolution adopted to proceed to elect them. The republicans entered a protest against this proceeding on the ground that it would be a violation of precedent, and the indications are that the democratic Senators will not act against that protest.

Democrats who are here after office do not as a rule take kindly to the order closing the offices of the members of the cabinet to the public on Tuesdays and Fridays-cabinet days-but it is really in their interest, for it will give the heads of the department an opportunity to go over the papers filed with them and make selections for appointments.

The reports for and against the seating of the appointed Senators from Montana, Washington and Wyoming, were presented to day. It is expected that the debate will begin at once and be one of the most interesting exhibits that the Senate will hold daily sessions in the great show. until a vote is reached. The result is

still very much in doubt. England and France having raised their ministers to the dignity of Ambassadors the new democratic representatives of the United States to those countries will, in accordance cluded. The exhibit occupies the with a law enacted by the last Congress be Ambassadors, instead of ministers plenioptentiary, as heretofore. This will, of course, add no honor to our ministers in the eyes of Americans, but every one at all familiar with the but every one at all familiar with the arranged inside the pavilion to accom-customs and usages of European capi- modate 700 plates of fruit. The shelves

tals knows that it will add much their prestige abroad.

Secretary Hoke Smith's first land decision was against the Southern Pacific Railroad's right to a large tract of land which it has claimed and kept from being opened to settlement. This decision not only opens this land to settlement, but it is a refutation of the silly republican charge that it was corporation influences which put Sec. Smith into the cabinet.

The breaking up of the winter is the sign for the breaking up of the system. Nature is opening up the pores and throwing off refuse. De Witts's Sarsaparilla is of unquestionable assistance in this operation. W. S. Rishton, Druggist. 10-14-IYT.

OUR WORLD'S FAIR LETTER.

CRYSTAL CAVE OF THE BLACK HILLS RE PRODUCED AT JACKSON PARK. A THOROUGH BREAD MAKING EXHIBIT TO BE AT THE WORLD'S FAIR, HON-OLULU'S EXHIBIT IN THE MID-WAY PLAISANCE, WILD WEST SCENES REPRODUCED IN PLASTER, MINNESOTA'S FRUIT EXHIBIT.

(From our Special Correspondent.)

Chicago, March 25, 1893. South Dakota will have a novel and instructive exhibit in the Horticultural Hall. A reproduction of Crystal Cave is being built directly under the great dome of the Horticultural building. The last of the 200,000 pounds of crystal arrived two days ago, and the proprietors of the cave, Keith and Allbough, of Deadwood, have a large force of men putting the big blocks into snape. The exhibit will be in underground passage ways consisting of seven apartments, the largest being 30 by 40 feet. In one corner will be a miniature lake, and at certain places the water will be dripping from stalactites just as it does in the original cave.

Each room will be made of a different form of crystalization, there being over sixty specimens of the most beautiful calcite ever found before. The crystals vary in color, some being white, others blue, red, pink and yellow. The entire interior will sparkle like a cave full of polished diamonds. Another feature will be some plants which have never seen the sunlight. These will be placed in the case, as will also the night-blooming cereus which has been donated by John Thorpe. The admission will be free.

The National Columbian House holders' Economical Association is to be the name of the Columbian Housekeepers' organization for the future. This society is intended for the improvement in domestic economy. A wonderful interest is being taken by the ladies in every locality where a local union has been formed in this new work. The association is only about eighteen months old, and there are over three hundred members. Mrs. John Wilkinson, its president, said today, when asked what they intended to exhibit at the Fair. "We have forty square feet assigned us in the women's department, and this entire space will be used to demonstrate the proper rating room where it is placed in a large circular machine, under time great joy I began to realize that I had found a medicine that was doing me will be practically illustrated. This will be a continous object lesson during the Fair. Artists will be at work all the time on each part of making good oread, so that any one can easily see and understand how to make the best and most healthful bread."

A lifelike representation of the volcano Kulanea on Hawaii Island will be the exhibit from Honolulu. It will not be a government exhibit, but it is managed by private parties. This will be an interesting sight to those who have never had the opportunity to travel and see real volcanoes. In fact almost all the exhibits from abroad will be excellent object lessons to the young people who are in school. Object lessons are fast becoming recognized as the only true method of teaching the young. And surely the Col-umbian Exposition will be one continuous object lesson to every beholder. Every parent ought to ap-preciate the great benefit to his child ren that can be derived from a week's

visit to the World's Fair next summer. Near the centre of the Manufacturers' Building will be placed a group of figures by which will be illustrated the native Indians of this country. There will be seventy of these figures ranged in groups representing natural and characteristic positions. Thus, for example, there is one group that shows a number of Zuni Indians at work manufacturing pottery, and another representing them in a religious ceremony. The figures are all dressed in genuine garments that were secured from the Indians by the field agents of the ethnological bureau and other ways. These figures promise to

Over 500 square feet have been assigned to Minnesota for its pomological exhibit. An appropriation of \$5-000 was made by the Minnesota Legislature for the exhibit. Every variety of fruit grown in the State will be incentral portion of the horticultural building, and from the unique manner of its arrangement will be one of the most attractive displays in the section devoted to pomology. Shelves will be

England's fine art exhibit reached Jackson Park yesterday afternoon in cars of such unusual width that they could not be switched to the Fine Arts Building.

The Ohio building is now practically complete. It is a handsome and commodious structure. A vast number of people can pass through its broad door and spacious corridors without causing any jam.

There are eight hundred men unloading the exhibits for the manufactures building. All repairs on this building will be completed by Mon-

Bad complexion indicates and unhealty state of the system. DeWitt's Little Early Risers are pills that will correct this condition. They act on the liver, they act on the stomach, they act on the bowels. W. S. Rishon Druggist. 10-14-1y.

Our Paper Money.

It is wonderful what precaution is taken by the United States Government to prevent counterfeiting of our paper money. The building in which the first processes are taken in its manufacture is situated apart from any other building in the south western part of Washington City. No one of the engravers are permitted to make a plate for an entire bill; but each one has a particular part to perform so that they may become experts-the parts are then placed together forming the entire bill and a duplicate made from it. With this duplicate the money is printed and the original retained. The printing requires three operations before the number and seal are placed upon them. The paper is counted before any printing is done and re-counted with every impression, afterwards several experts count it again, and throw out any defective sheets. At the close of each day all the money that has been made and once counted is enclosed in a large fire-proof vault, with time lock. Immense cuests made of cold steel are used in transporting the noney from the building of en-graving and printing to the Treasury Department and in return more paper is sent back to be printed. Guards always accompany the transportation. At the treasury department the numbers and seal are p aced upon the bills and after counting and re-counting until they pass through fifty-two hands, the money is put into packets, securely bound and ready for use

The most interesting and astonish-ing department in the Treasury building is that of the redemption office where old or torn money is received and new exchanged for it. When the old is received four holes are punched through as cancelling marks; to 68 pounds. By accident 1 heard the money is then taken to the mace-of Dr. Kennedy's Favorite Remedy Mar. 8, 18, 19, pata Mrs. Cary poor person results from the money is then taken to the mace-of Dr. Kennedy's Favorite Remedy Mar. 8, 18, 10, 10, 12 oaths.

A Popular Clergyman's Opinion Indigestion, Skin Disease - Perma-

The following statement is from a well known clergyman, and it will be read with interest by his thousands of friends throughout Pennsylvania, and also in New Jersey, and Kansas, where he spent twelve years of his life as a pastor, and took very active part in the great temperance work there as well as in G. A. R. matters. He served in the war in Co. B, 6th New Jersey Regiment, and is past chaplain of the 2d New Jersey Brigade association, and now a member of Lafayette Post G. A. R., 217, of Easton, Pa.

"During three years' service in the army I nent Benefit.

"During three years' service in the army I contracted indigestion and disease of the liver that caused me great distress and resulted in varicose veins in my legs, and a skin disease that made my limbs and hands running sores. I have for many years tried various remedies and some excellent treatment from physicians, but of the medicines I have ever taken Hood's

Sarsaparilla excels them all for indigestion and Hood's Sarsaparilla Cures

skin disease. I have been greatly, and I think permanently, benefited by it." E. H. STEWART, Pastor of the Baptist Church, New Milford, Pa. Mood's Pills are purely vegetable, and do not purgs, pain or gripe. Sold by all druggists.

will be backed by mirrors which will locks, a separate key being used by reflect light upon the fruit, thereby three of the officials, and the receptaheightening their colors and producing cle only opened after all three locks an illusion as to the number of speci- are open. The machine then grinds mens on each plate. To Minnesota and macerates until the money is is due the credit and praise of being made into paper pulp and sold to the first exhibitor in the section of po- the paper manufacturer. It is said mology to build a structure for exhibit. that from \$350,000 to \$500,000 is thus destroyed every day. When we consider how much mutilated money is destroyed every day we do not wonder that it requires over five hundred skilled laborers in the manufacture of our paper money.

In the Treasury building is found the largest vault in the world being 57 feet wide, 89 feet long, and 12 feet high and contains at this time over \$94,000,000 of silver. A similar vault for the gold contains over \$83,000,

The plain truth is good enough for Hood's Sarsaparilla. No need of embellishment or sensationalism. Hood's

Applicants for positions under the mail routes, who held similar positions under President Cleveland must submit to a re-examination under the Civil Service rules before they are eligible to the place, and most of them wait their turn until a vacancy exists. There are many wno supposed their former examinations would suffice, but the Civil Service rules are rigid in this particular and the administration seems to have decided that the rules must be observed.

Pennsylvania People Benefitted.

MRS. CARRIE BOUTON GAINED IN FLESH 68 LBS. TO 121 1-2 LBS. BY THE USE OF A SIMPLE REMEDY.

MEN AND WOMEN INTERESTED.

"It is astonishing," said one of our physicians the other evening, "how many of the ordinary diseases people suffer from come from the one cause -excess of uric acid in the blood. To discover a medicine that would dissolve this acid has puzzled thousands of the best men of the medical profession, until Dr. David Kennedy, of Rondout, N. Y., produced what is known the world over as Dr. Kennedy's Favorite Remedy. The great value we place in Favorite Remedy comes from the fact that it is the only medicine that will effectually dissolve this acid thus curing rheumatism, dyspep cine that will effectually dissolve this acid thus curing rheumatism, dyspep sia, kidney, liver and urinary troubles and the sicknesses women suffer from. These and many more troubles all come from the one cause, as I said before, this death dealing uric acid."

Perhaps there has been no one person in Wyoming Co., Pa., that leas suffered more than Mrs. Carrie Bouton, formerly of Schottville, but now of Harvey's Lake, Luzerne Co. Mrs. Bouton, in relating her restoration to health, said: "From a growing girl I suffered from female trouble or weakness peculiar to my sex. Several phy sicians prescribed for me but I found good. I think I had used five bottles when I found that I weighed 1211 To amt. due from 1891...... \$ 321 pounds and was better in health than I ever was before.

Inquiry among Mrs. Bouton's neighbors shows that she states nothing but the facts in regard to her case. Many other instances of the kind are widely talked of in Scottsville, Tunkhannock, Wilkesbarre and other places where Dr. Kennedy's Favorite Remedy has effected many cures after physicians had given up hope.

"But," says one of our prominent druggists, "Favorite Remedy is equally efficacious in other diseases, as talks with people I have sold Favorite Remedy to affirm. To my knowledge right in our town Favorite Remedy has cured people suffering from rheumatism, dyspepsia, kidney, liver and urinary troubles."

Since the publication in one of the New York medical journals of the case of Mr. E. P. Tayer, of East Nassau, N. Y., Dr. Kennedy's Favorite Remedy has been increasing in sale. Mr. Tayer had suffered for fifteen years with inflammatory rheumatism. His case was practically abandoned by his physicians. Favorite Remedy was brought to his notice and in less than three months after its use he was a well man.

In commenting on this case Dr. W. H. Morse, of New York City, says: The great good in Favorite Remedy lies in its power to dissolve this dead-ly uric acid. In cases of dyspepsia, eczema, scrofula or any urinary diseases I have never known it to fail, when taken according to directions. Dr. Kennedy's Favorite Remedy is not only used by physicians now but can be found on sale by every medi-cine dealer. — Wilkesbarre (Pa.) der.
