hibition this year is better than any other that has preceded it, as the menagerie is almost new and boasts every strange and curious zoological specimen, from the gawky camel to the only genuine zebra that has ever basked beneath stars and stripes. There is also in the collection the largest things to be done. W. H. Brooke & Bengal tiger ever seen in America, and he has been from his native jungle less than seven months. The cage of lions has three male specimens, from the face of one of which Sir Alexander Pope made his painting,

which is now on exhibition in the National Gallery of Art in London. Of the circus performance there is also much to be said, and its strongest claim is probably that the performers are all champions. Among the

artists that have been brought over are the most dashing and accon.plishequestriennes ever seen in this country The brilliant harmony of colors and artistic groupings in "Columbus" will cause to recur to the minds of the thousands who witness the show pleas ant memories of the greatest triumph of modern theatrical representations. When it is known that Imre Kiralfy has trained the ballet it will be known that it is better done than any other manager In this country could have

done it. There are crowds of well trained girls and men, presenting every type of beauty, who perform graceful evolutions in the dances. There are costumes that have the look of the

15th century about them and which, high authorities have said, are duplicates of those worn when Columbus was pleading before Ferdinand and Isabella.

The Barnum & Bailey Show has come to be one of America's permanent institutions, and merits more than the smiling reference called out by the ordinary circus. It is worthy of serious thought-not only for itself, but more when one considers what exceptional
