Vegetable Salads.

Vegetable salads are among the most acceptable dishes that can be prepared for a spring or summer repast; they tempt the appetite and impart a flavor to the rest of the meal. While the art of making and serving them is very simple, care should be taken in their preparation. The dressing for a variety of vegetable salads is the same, yet different flavors may be delicately added, always being careful that one does not predominate over another. It is very important to have only the best ingredients, as wilted vegetables and inferior seasoning will not make good salads. The quantity of oil to be used is rather difficult to decide, but two table-spoonfuls to one of vinegar is the usual proportion for plain dressings, while more is required for mayonnaise.

Lettuce salad should be dressed only with oil, vinegar, pepper, and salt.

Salads are rendered much more attractive when prettily garnished with fresh green leaves, vegetable blossoms, rings of hard boiled eggs, sliced lemons, and fancy designs cut out of radishes, beets, or turnips.

The dressing should never be added to the prepared vegetable until ready to serve, when the salad should be stirred as little as possible in order to retain its freshness.

The vegetables best suited for salads are lettuce, asparagus, dandelion, celery, cauliflower, water cress, beets, string beans, cabbage, potatoes, cucumbers, and tomatoes.—Harper's Bazar.

A dispatch from Havre-de-Grace, Md., says: The outlook for the fishermen on the Susquehanna is very discouraging, the recent storms having interfered with operations. The high rise in the river occurring so near the close of the spawning season will back the fish into the bay and practically end operations. From careful estimates it is believed that the herring pack of the present season is scarcely more than one-half that of 1892. The packers here look for good prices for the stock in hand and it is reported that some effort is being made toward a combination to control it.

Johnstown since the flood has been growing with surprising rapidity. In 1887 the then borough had a population of 9592, with seven wards, now the city has 24,544, with seventeen wards. No matter how many candidates announce for the various positions to be filled, the people should select only the very best. And if not suited with the material in the field, they should draw on material not in the field, and thus exemplify the principle that the office should hunt the man and not the man the office, and teach place-hunters that a "public office is a public trust," and not a trophy of spoils to be appropriated to the sole benefit of the successful candidate and his friends. The people have a right to expect to be faithfully served for their benefit by public officials who are only public servants and not public masters, and who should be as humble and courteous after election as they are before.

The Legislature; well what is it? A dispenser of salaries? Of laws in the interest of sportsmen, or a sponge to absorb the substance of the people? Why not dispense with it altogether?

ORANGEVILLE NEWS.

The heavy rains of last week caused our local waters to assume an unusually angry mood. Fishingcreek was up to within a few feet of the W. & W. SATURDAY HAIR-CUTS.

One of the aggravating things of life is to sit in a barber shop on a Saturday night and wait until some jay with Buffalo Bill hair gets his hair cut. The barber doesn't like to cut hair on Saturday night, and his patrons do not like to be compelled to wait for a shave in the closing hours of a week—the busiest hours of all. It is so the country over, and has gotten to be such an annoyance that societies are being formed for its suppression. The Philadelphia Record speaking on this subject, says:

"A novel organization is about to be perfected in this city in the Society for the suppression of Saturday Hair Cuts. The society will appeal to every man who loves himself as he loves his neighbor. The object of the proposed society, as stated in the prospectus issued by the Organization Committee, is simply to 'compel barbers to confine their labors on Saturdays to shaving. It is proposed to boycott all barbers who persist in the nefarious custom of forcing a shopful of customers to wait while some gentle chap is indulging in the luxury of a hair cut, often supplemented by a shampoo or a singe.'"

Outside of places where there are professional gardeners, the forcing of vegetables is very little known in this country. People in general are content with "things in their season," and do not trouble themselves to force or retard. Perhaps the easiest vegetable to force is rhubarb, and by taking a little trouble, material for pies and sauce may be had some weeks in advance of the supply from the open ground. The things needed are clumps of rhubarb roots, soil, and a dark, warm place. The roots should be dug before the ground freezes. As fine rhubarb as we ever saw was forced in a barrel or cask; the roots, packed in a layer of soil and surrounded by it, the cask covered tight, and set near the furnace in the cellar. A box to hold the roots, and set in a cupboard or closet in the kitchen will answer; or a box or barrel may be placed in the kitchen. Keep moderately warm, and see that the roots are sufficiently moist. A few roots will give an astonishingly abundant supply, much more tender and crisp and violently sour than the out-door crop.—American Agriculturist.

Bad complexion indicates and unhealthy state of the system. DeWitt's Little Early Risers are pills that will correct this condition. They act on the liver, they act on the stomach, they act on the bowels. W. S. Rishton, Druggist. 10-14-15.

LOOK THIS WAY!

TO Farmer's and the PUBLIC -in- General.

We wish to say that we are still manufacturing and dealing in Agricultural implements at Orangeville, Pa., and certainly from long experience we should know the wants of the Farmers and public in general. And, in this connection we wish to say that all machinery we manufacture or handle is equal to any on the market, and sold at lowest prices.

We make a good cast head Land Roller, which every Farmer should have. Also Plows, Scotch Harrows, Cultivators, Wood Saws, Corn Shellers, and Feed Cutters, and a specialty of Horse Power Threshing Machinery. Then we handle the 'Empire' Fertilizer, Grain Drill and Hay Rake, 'Hench's' Walking and Riding wheel Cultivators, 'Woods' Harvesting machinery etc. Lastly we wish to show up the New Deertield Lever Harrow the only one that has a separate adjustment for each tooth independent of the levers. The only four lever Harrow on the market whereby the two centre sections can be let down in a dead furrow, or any one or more of the four sections can be raised and the balance of the teeth kept at work, frame at all times being level. It has a self coupling hinge, no bolts or pieces to lose, with circular steel eveners to equalize draft while turning corners. This Harrow is no experiment with us, and will be put out on their merits same as any other goods.

We also make and carry a large stock of Plow repairs, also an endless variety of other implement repairs. We are also prepared to do almost any kind of saw or grist mill repairing (having recently put in new Iron Lathe and boring machinery etc. We also carry a full line of dressed building lumber. We appreciate the patronage of the public in the past and covet a continuance of the same in the future and will be glad to have any one call to see us, or answer their inquiries for anything in our line and will quote lowest prices.
