The Hawaiian Situation.

For ways that are dark and tricks that are vain the Hawaiian policy of the United States is peculiar. A litte further light was shed upon the situation by the apparently surreptitious publication of an abstract of the Blount report, which goes to show that the Provisional Government was the creature of a conspiracy in which the United States Minister bore the leading part, and to which United States marines contributed the back bone. As to this phase of the matter the evidence is so contradictory that it cannot be explained upon any other theory than that of deliberate lying either upon the part of the supporters of the Queen or of the detenders of the Provisional Government.

But if it be granied that a mistake was made by landing United States marines to help turn out the Queen and instal her successors, why should another mistake be made by the forcible turning out of the Provisional Government to instal the Queen? It has been conceded that the present Government of the islands is the best they ever had. In the exercise of its dominating influence over the fortunes of the islanders, whatever form of rule they may establish for themselves, the United States Government is bound to first consult the public welfare. As long as this Government shall insist that the independence of Hawaii must be respected by all other Powers it will continue to exercise a qualified protectorate which will be none the less real because it is not a matter of stipulation. The United States would not be justified in ousting the present authority in the islands to set up a worse one. They would not be justified in undertaking to right one wrong by committing another. If Liliuokalani has been aggrieved, she has herself suggested the proper method of reparation by offering for a monetary consideration a quit claim of her monarchy. The United States, by refusing to annex the islands, have refused to take advantage of the opportunity brought

about by the change of Government. Happily, the failure of the original plan to overturn the existing Government of the Sandwich Islands by a sudden stroke of diplomacy has opened the way for a rectification of the policy of the Administration, if the Administration be wise enough to see it. To upset the present equitable rule and turn the islands over to the joint con-
