

HOUSEHOLD ACCIDENTS.

The Proper Treatment of Slight Wounds and Scratches.

A slight cut or abrasion of the hand, or a slight burn, may become a serious matter if it is totally neglected. Where the skin is torn or cut, it is desirable in the first place that the wound should bleed freely. Cases of lockjaw are of rare occurrence where this is the case, and a very slight wound of the hand or foot has been known to produce this dangerous malady where bleeding did not follow.

One of the greatest dangers lies in a wound of a kitchen knife, which may have held impure matter, and even from the scratch of a pin, and fatal cases of blood-poisoning have frequently resulted from so simple a cause. Absolute cleanliness, therefore, is necessary in the treatment of such a wound. After the wound has bled a little it should be washed with perfectly clean water. That which has been boiled is best for the purpose, and there is no harm in using a little carbolic acid in the proportion of a drop or two to a quart of water.

Do not attempt to staunch bleeding by the use of cobwebs, which are naturally dirty and full of impure germs, but use a little lint and a clean cotton or linen cloth. These should be always kept in the houses for use in case of such accidents. A trustworthy druggist will always supply some preparation of carbolic acid, properly weakened for household use. Even household ammonia, though it is painful at first, is recommended as a mild way of cauterizing a simple wound. A thick paste of equal parts of common baking-soda and flour, wet to a paste with cold water, is the best remedy for a burn. It is better than lime-water because lime-water is liable to become incrustated, while the paste of soda and flour is cooling to the surface and can easily be removed. The object of treating a burn is to cover the extremities of the nerves which have been injured and give them opportunity to heal. While such a paste is being prepared, cover the wound for the moment with common flour and wrap it up in clean cotton.

A simple healing plaster which may be prepared in the household calls for half a pound of resin, an ounce each of mutton tallow, camphor-gum and beeswax, half an ounce each of British oil, cedar oil, gum myrrh and linseed oil. Melt the resin, mutton tallow, camphor-gum, beeswax and gum myrrh together and add the oils. This plaster should be spread on cotton when needed and applied to the wound.—N. Y. Tribune.

PHOTOGRAPH CASES.

A Novelty Which is Easily Made and Very Pretty.

What shall be done with the photographs which are yearly on the increase?

There have been albums and photograph frames and bags, both small and great, in which to deposit them, and still they accumulate.

A pretty idea for a photograph case is to take a piece of cardboard of any size desired, and cover plainly with pink silk. Cover another piece slightly smaller, as in drawing, joining this to the first, and still another piece

EASILY MADE AND PRETTY.

slightly smaller than the second. Embroider delicate maidenhair ferns in natural shades in corner four, tacking this to the third piece of covered board. Or this corner may be made of white or ecru leather. Fasten the outside edges together, leaving spaces between each card for the photographs, and finish the case with a bow of pale green ribbon to match the ferns.

For amateur photographers another suggestion is to make an album of water color paper, in which the unmounted "snap shots" are to be pasted and each photograph outlined with splashes of gilt. The outside of the album is of heavy pasteboard covered with linen and decorated with lettering suggestive of contents. This classifies the photographs and gives one's friends the pleasure of a camera's sketch book.—N. Y. Herald.

HOUSEHOLD HINTS.

To keep ice in the sick-room over night set the pitcher in a newspaper, gather up the ends, twist them tight and snap on a rubber band.

Pretty cushions are made of parchment satin, so called on account of its color. Finish with a frill of silk and decorate with flower designs.

Covers for cups and glasses used in a sick room can be made of cardboard and covered with a crocheted cover of either white silk, wool or cotton, as preferred, a small loop being put in the middle of the top to lift it by.

The English way of serving pineapples is to take the fruit out from the rind in a solid cone. This, with its prickly stem attached, is left intact. The pine is then sliced and piled in its natural shape and the rind fitted on. It is thus sent to the table and served.

A pretty tea cloth may be made of a very large dinner napkin or a piece of table linen of suitable size. Select a pretty pattern and outline the design with wash silks. Old gold, deep rose or dark blue is pretty. Another is of fine linen with an inch wide border, hemstitched, then a row of drawn work, then a wide border of cross-stitching worked in wash silks.

The cardinal rule in a kitchen is to clean up as you go, and if attended to this saves half the labor and fatigue cooks suffer from who pursue the old method of having a grand and comprehensive "clean up."
