Let's see, what was the issue upon which Democracy came into power? The memory need not be very te tentive to say of course it was the tariff issue upon which the Republicans were identified with high protection for our fostered industries, while Democracy appealed to the masses as against the classes, promising reformation of the tailif if elected. Under the circumstances, however, this was much easier promised than fulfiled, since our protected industries have shown themselves stronger than either the Republicans or Democrats in Congress assembled. They whipped out and destroyed the usefulness of the Republican party for any common good for common people, and it begins to look as though they had also won the affections of Democracy. In our humble opinion there is but one power on earth stronger to-day than our fostered and protected industries, and that is the power that kicked

out disobedient Republicans and put in disobedient Democrats. What better can the sovereign power do? I will tell you, gentle reader of the COLUMBIAN, what the sovereign power will do if bo h old parties prove their lieve the chances are ten to one the hypocrisy much longer, they will do as they have done in the past by the help of God who gave us a popular The matter of Senatorial nomina-Government through the sword of tion in Montour county was not quite Washington, they will defeat both old parties, establish a people's party, and thus endeavor to approximate primitive purity of government by the result of a charge of fraud and illegal voting. Gearinger having but two more masses.

### Now Paint Unpainted Houses.

With the passage of the Wilson bill most anybody can soon paint up; for it lowers the duty on white lead one half. To have put white lead on the free list would have been better still. It is said by those in position to know that our white lead industry is one of the most consciousless trusts that protection protects in this country. We have about a dozen manufactories in all this country, and they are said to advertise their products collectively and jointly while they no doubt look after the tariff on white lead individually as well as collectively. Hitherto they have feared no English competition, nor have they had it to any extent

money, a few more Congressional Now, if there should be a corresponding reduction in the price of paint by virtue of a little foreign competition there are many new and old unpainted buildings that will soon stand some chance of being brushed mittee recommend the prosecution of up all over this country, and in conthose who told all they knew about sequence many idle painters will be able to find something to paint that by the different parties. One of the needs it badly, and would have had it long ago, but for the high price of trust contributed from \$250,000 to paint.

### SAFE DEPOSIT FOR WAGE-EARNERS.

Sooner or later, for the safety of the poor man, it is to be hoped this Government may in some way (as foreign goveraments do) arrange to take his hardcarned savings, so that he need not longer leave them in care of our trapping "saving institutions " so called. FOF it is a fact that for years they have been robbing him systematically of his depo-sits. Deposits left for rafe-keeping there only because our Government has as yet made no provision whatever for the security of small depositors. Inter est bearing bonds of all issues are not for him, and their high denominations indicate that such absolute security with interest attaching was never intended for the poor but industrious wage-earner who might make an honest effort through industry and economy to save something against adversity,

Republican Fallacies on Wool.

First, it is quite the thing with them to sucer at free wool in the interest of farmers, in the face of the fact that the McKinley tariff policy has despoiled his home through its wily de lustons and humbug theo jes as to its relations to the interests of the farmer. The American farmer has now reached the day when hard facts speak louder to him than fine spun theories about high or low tariff.

There is excellent Republican authority that free wool a ways has been a bencht to the farming class of this country. If we produced wool as we produce iron and coal the case might be different; but in the face of the fact that we want to buy rather than to sell wool, the benefit of its high protection will never strike the farmer very forcibly.

It is a historical fact that under the tariff of 1857, and up to the out break of the war, the farmer could get about 40 cts, a pound for his wool, while now, after 30 years of high protection, and about four years of the of land situate in township of Briarcreek, Col McKinley kindness, the farmer does well, indeed, to get 25 cts. a pound for point in the new state road in line of land o wool. The United States to day is the only manufacturing country in the world which is so foolish as to to a rence, thence by the same south 7 and impose a duty on a raw material of which she is unable to produce a supply sufficient for her own use. The farmer when he buys his winter clothing, his blankets, his horse covers,

family, has to either take McKinley quality or pay McKinley prices. If farmers understood how they were humbugged and plucked by the protective warp and woof of the wool business, instead of being moderate tariff reformers they would be more apt to be free traders outright.

Should Governor Pattison be instrumental in effecting an amicable adjustment between labor and capital in Pennsylvania, after all the bitter strife that strikes and dismissals have engendered, we think of no more likely or available Democratic candidate
