Against a Physician.

The papers in a suit for \$10,000 damages, brought by G. F. Houser, against Dr. J. J. Myers, a physician of Nescopeck, were filed in the prothonotary's office Tuesday. The plaintiff was a brakeman of the Pennsylvania Railroad and was thrown from a car on Feb. 7, 1890, and had a foot so lacerated that amputation became necessary. The defendant, assisted by Dr. J. C. Carpenter, of Pottsville, performed the amputation. The plaintiff alleges that this was done with carelessness and lack of skill, that the arteries remained exposed and the bone was not given sufficient covering of flesh, and the exposure of the bone makes the amputated part so sensitive that it is impossible for him to wear a cork leg or other artificial limb, and that after-treatment was so careless as to result in constitutional ill health, and that the present condition of the leg is such that reamputation becomes necessary. He has retained as counsel Swartz Bros.—W. B. Record.

A BURGLAR CAPTURED.

A burglar, who gave his name as John Comprotski, was captured Monday morning in a novel manner. Mr. and Mrs. Andrew Politsney, of 65 Chestnut street, retired at the usual time and slept soundly until after midnight when Mrs. Politsney was awakened by a noise at the window. Looking over the footboard of the bed she saw a man climbing in. She quietly awakened her husband, who sprang out of bed and grasped the burglar by the neck when he was about half through the window. He choked him into submission and then called a policeman. The fellow was locked up and after a short hearing the Mayor sent him to jail. Politsney's house was burglarized a short time ago and \$60 stolen. The crime of burglary being one contemplating murder, if need be to escape, should, we think, be punished in such a way that the culprit would never have the second chance to enter a room by stealth.

Rainmaking.

This has been a very propitious season for the scientific rainmaker and yet the drought prevails. Out in Kansas it has been very dry also. Here Rainmaker Mathews undertook to moisten things by bombarding the heavens for rain. He wanted \$400 for doing just once what the Almighty has been doing for Kansas for nothing for thousands of years. His proposition was accepted and his bombs exploded and the rain came not; but on the other hand the drought continues to prevail in Kansas, where the lands are parched and the corn withered. Mr. Mathews claims with some show of truth that the conditions were unfavorable for moisture; but we think he lies when he says that his "rain all turned to ice in the clouds." If the latter assertion be true of course when the ice melts the rain will fall in Kansas—that is if his ice clouds are stationary, and we hope they are.

Commercial.

Buffalo, N. Y.—Jobbers in dry goods, groceries, &c., report volume of trade fair, on the "hand to month" plan. Collections about the average.

Providence, R. I.—Manufacturers of cotton cloth still keep mills running. The threatened cut down of wages not made.

Boston—There is a quiet tone in general merchandise, and business ventures are close and short.

Philadelphia.—Wool active, and supply scarce; prices advanced. Business slow but sure.

Kansas, Mo.—Trade from fair to middling. No particular booms as yet in business.

St. Louis.—Volume of business in all lines continues to increase, and a more hopeful feeling prevails.

Chicago.—Trade has already made fair gains in a quiet substantial way. The drought in the west has made retailers slow in buying goods, and purchases are confined to small lots. While some fall orders are received there is as yet no rush in stocking up.

Baltimore.—Business quiet, with a slight falling off among retailers.

Omaha, Neb.—Jobbing now suffering from uncertainty as to outcome of western crops. All goods selling at close prices.

Charleston.—Business fair among wholesalers and jobbers.

New Orleans.—Money quiet, with slight increase in demand for accommodation, but still greatly under expectations for the season. Rice continues in good demand.

Jacksonville, Fla.—General business is dull.

San Francisco.—Improvement is noted in most lines.

"Times are looking up and merchants are compelled by the rush of orders to take goods out of bond," says the *Mercantile Times*.

The new tariff is not expected to make much change in prices for fall and winter goods, and it is doubted if it will affect prices next spring. Cotton goods will not be affected at all, as this country is manufacturing largely its own material.

Steam Versus Lightening.

It is said that a locomotive will stand fifteen years service and earn about \$300,000. When electric roads have all the privileges that are now granted to steam railroads, locomotives will last longer and earn less. But the electric roads will have those to fight who believe in high protection for steam before they can ever hope to pocket any part of the \$300,000 that each locomotive now earns. Rich and selfish railroaders who have gone to our State Legislatures and secured high protection for steam power are not going to surrender to little trolleys until they have to, don't you see? Still we have no doubt that steam railroad stock will be cheaper in the near future than it has been in the far past, because of the audacity and pertinacity of lightning now utilized, and which seems to have come from the heavens for our common good and relief from extortionate steam charges. If high dividends are in consequence lowered the electric roads will pocket the difference. Let lightning have a chance, too, we say, in the leveling process and popular struggle for freer trade. When the elements of heaven come to the rescue of the masses it is time to rejoice. To equal the occasion the people have only to send lightning representatives to the legislatures who are imbued with enough honesty to not sell out to steam power. Can it be done? That's the only question in the way of the success of lightning.

Heathen Meat.

The kind of dogs that Chinese eat are a species that never bark, and, like our high-bred Jersey cattle, they have a bluish-black tongue. It is said that they eat over four millions of these edible dogs annually. As for a higher class of meat than dog meat, that is generally reserved for the higher class of people in heathendom. Evidently Christian customs are a consummation devoutly to be sought through peace if possible, but through war if need be.
