

VERY IMPRESSIVE FUNERAL SERVICES OVER THE REMAINS OF SECRETARY GRESHAM.

WASHINGTON, May 29.—At 9:30 this morning the body of Secretary Gresham, which had lain in state last evening in the parlor of the apartments in the Arlington annex, was removed from that resting place to the great East room of the White House. It was preceded by such a tribute of flowers as even Washington, the city of flowers, has seldom witnessed. The president and Acting Secretary of State Uhl entered the first carriage to follow the remains, then came Secretary Carlisle and Secretary Lamont, next Attorney General Olney and Postmaster General Wilson, and then Secretaries Herbert, Smith and Morton. The United States troops, headed by the Marine band, formed on Seventeenth street, extending their line to the west gate of the White House. Major General Ruger was in command.

The decorations of the beautiful and spacious East room of the White House, where the funeral services were held, were exceedingly beautiful. The floral offering of the President and Mrs. Cleveland was a large wreath of orchids, white roses, rhododendrons and maiden hair ferns, with a long white silk ribbon attached. The remains reached the executive mansion at 9:40 o'clock. Mrs. Gresham was too ill to accompany them. She fainted repeatedly and was at last removed to her private apartments, where she remained until she left for the railway station. As the casket left the hotel the president and his cabinet formed in double column as a guard of honor on each side. The members of the family who accompanied the cortege to the White House were the dead secretary's only son, Otto Gresham, his sister, Mrs. Andrews, and her husband, and Captain and Mrs. Fuller, the latter being Mrs. Gresham's niece. When the president and cabinet stopped within the portico of the White House they again formed a double line between which the casket, followed by the members of the family, passed. Around the casket were gathered representatives of the foreign nations with which the United States maintains diplomatic relations, nearly all in uniforms of brilliant hue.

Exactly at ten o'clock services began with great impressiveness. Bishop Hurst began the funeral service, which was conducted according to the manner of the Methodist Episcopal Church. When he had concluded, a quartette of male voices rendered "Lead Kindly Light," and then Bishop Hurst concluded the simple ceremonies by reading the prayer for the dead. When he had spoken the last words, he turned toward his audience and invited them to view the remains of the dead secretary.

At eleven o'clock the hearse was driven up to the door. The casket, carried by eight sergeants of marines, was then borne to the hearse. It was strewn with flowers. The president and Mrs. Cleveland and the members of the cabinet, with their ladies, entered carriages which left by the western driveway and took places in the procession along the avenue.

The solemn march down the avenue to the Baltimore and Ohio railroad depot was most impressive. When the head of the procession reached the main entrance to the station the cavalry drew up in line and permitted the carriages to pass between them. It was almost noon when the president and the cabinet reached the depot and embarked. Mr. Cleveland plainly showed the effect of his recent illness. His face was flushed and heated and as he stood with bared head the perspiration streamed down his face. Although nothing had been said about it, it was noticed that Dr. O'Reilly attended the president and went to Chicago with the party. It was given out that this was done on Mrs. Gresham's account, but it is believed that the condition of the president himself has as much to do with the presence of the doctor as anything else. No representatives of the press were permitted on board the train.

Deafness cannot be cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (cause by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. per bottle.

Drug envelopes, Nos. 1, 2 and 3 manilla, white or colored, coin envelopes, and shipping tags, with or without strings, always in stock at this office.

FOR GIRLS.

From Harper's Round Table. The habit of thoroughness in house-keeping leads one to keep rooms in good order and the table beautifully appointed. I know a girl who says that she takes great pains with her room whenever she thinks her aunt Mary is coming to see her, because Aunt Mary's sharp eyes discover every speck of dust, and observe any trifle that is in the least out of order. Aunt Mary is a bit of a critic, and her niece a little afraid of her comments. In other words, the aunt has made a coward of the girl. I do not like the idea of being in bondage to anybody, whether an aunt or a stranger. It would seem to me a far better way to feel that one must answer to one's self, and that one would not feel satisfied unless she could look herself in the glass and say: "There, everything is done in the best possible manner, and you cannot find any fault with me to-day. Try to, if you dare!"

I wonder whether you are particular to write notes of thanks very soon after receiving gifts or acts of courtesy? The value of a note of thanks is greatly increased by its being prompt. If some friend leaves a bunch of violets at your door, and you fail to acknowledge it until the flowers have faded, your thanks, when they do come, are tardy. When flowers are sent to those who are ill, they, of course, cannot repay the courtesy by a little note themselves, but some one in the family should do it for them. Your note of thanks should be very genial, showing that you are really pleased by the kind attention and the happier because of it. Do not be afraid to write warmly and cordially on such occasions. If stiff and formal you are unjust both to your friend and yourself.

A Remarkable Cure.

"My little girl who is now 4 years old has been troubled with her eyes since she was three months old. Last summer she had large boils on her head and when they left her the trouble went to her eyes. I was compelled to keep her in a dark room for two months. She got so bad that she could not hold up her head and we took her to an eye hospital, but the professor gave us no hope. On our way home my wife bought a bottle of Hood's Sarsaparilla. That night she opened one eye for the first time in over a month, the next day she opened it a little more and she continued to gain until now she can see as well as ever. Doctors and others have been surprised by this cure." Robert J. Bell, 922 15th St., Philadelphia, Pa.

Dr. Parkhurst on Woman's Rights.

Certain women are talking a good deal about their rights, writes the Rev. Charles H. Parkhurst, D. D., in a very forcible article defining the position of "Woman Without the Ballot," in the June Ladies' Home Journal. It seems to me that one of their most precious and conspicuous rights is to go in among the down-trodden women of our cities and towns, who have even fewer rights than they, and by the touch of their own womanly vigor create within them the inspiration of a clearer vision and a larger hope. There will be no need of legislation or of amended constitution in order to the extension to them of this opportunity. There are tens of thousands of women in the city of New York who are as ignorant of the true genius of American institutions and of the spirit of American civilization as though they were living in another century and under the pressure of a Russian or Turkish despotism. And these women are sensitive to the touch of ameliorating influence. That was phenomenally demonstrated here last autumn. I am not antagonizing female suffrage, but the fact remains that women have a great many more rights than they are using, and are standing at the threshold of innumerable doors of opportunity into which they have not yet entered. The improvement of social conditions is a very serious and discouraging business. It is to be effected only by the medium of personal agency, and for that kind of ministry one woman is the equivalent of ten men.

"Nothing venture, nothing have."

Rev. John Reid, Jr., of Great Falls, Mon., recommended Ely's Cream Balm to me. I can emphasize his statement. "It is a positive cure for catarrh if used as directed."—Rev. Francis W. Poole, Pastor Central Pres. Church, Helena, Mon.

It is the medicine above all others for catarrh, and is worth its weight in gold. I can use Ely's Cream Balm with safety and it does all that is claimed for it.—B. W. Sperry, Hartford, Conn.

Stock Certificates.

Corporations desiring stock certificates, are invited to call and see samples of lithograph work at THE COLUMBIAN OFFICE. Workmanship and prices are guaranteed to compare favorably with city printing.

Children Cry for Pitcher's Castoria.

Where is the Soul Located?

At different periods in history since men first became imbued with the idea that human beings were possessed of souls, various ideas have been advanced as to the exact spot which that intangible something claims as its seat. Within the past thousand years reputed authorities on psychology have located it in widely separated sections of the brain, as well as in several other organs of the body, such as the heart, liver, spleen and spinal cord. Five or six years ago, in 1889, I believe, Dr. A. H. Stevens gave the world his views on the subject, declaring that he believed it to be situated in that portion of the brain known to the anatomists as the corpus callosum.

More than 1,500 years before the west coast speculative philosopher above mentioned started the world with his announcement of the discovery of the soul's seat, it was believed in Greece, Rome and Egypt that it was located in the pineal gland of the brain. This gland is a little sac containing calcareous grit, and for which the physiologists have not discovered any particular use. The discussion of the subject is an interesting one, but it is plain that it is a matter wholly within the unknowable and undiscoverable.—St. Louis Republic.

SAVED MRS. RENNIE'S LIFE.

Mrs. Jennie Rennie of Virgil, N. Y., had been sick for a year or more with overflow of the gall and ulcers of the stomach. Her physician told her she could not live. Mrs. Rennie's mother had found such benefit from the use of Dr. David Kennedy's Favorite Remedy, that she persuaded her daughter to use it, which she did, with the result that it cured her of these diseases, and she says she was never as well as now.

Saved.

It was a dinner, and there had been chicken, of which the little daughter of the house had partaken with great freedom.

"I want some more chicken," said Frances.

"I think you have had as much as is good for you, dear," replied Frances' mamma.

"I want more." And Frances pouted.

"You can't have more now; but here is a wish-bone that you and mamma can pull. That will be fun. You pull one side, and I'll pull the other; and whoever gets the longer end can have her wish come true. Why, baby, you've got it! What was your wish, Frances?"

"I wish for some more chicken," said Frances, promptly.

She got it this time.—Christian Register.

An Odd Collection.

A man in Colorado has a quaint collection of bottles. It is divided into two sections. Section one is large. Section two is not. Section one contains hundreds of bottles, the contents of which his wife swallowed, hoping to find relief from her physical sufferings. Section two contains a few bottles that once were filled with Dr. Fierce's Favorite Prescription. It was this potent remedy that gave the suffering wife her health again. It cures all irregularities, internal inflammation and ulceration, displacements and kindred troubles. It has done more to relieve the sufferings of women than any other medicine known to science.

Pile tumors, rupture and fistula, radically cured by improved methods. Book, 10 cents in stamps. World's Dispensary Medical Association, Buffalo, N. Y.

A Discovery By Wilkes-Barreans.

Since the decision was made by the attorney general in the Grow county matter Wilkes-Barre has discovered that for eighteen years past Lacka wanna county has been occupying one mile and a half of Luzerne county territory, including a large portion of Old Forge township, the borough of Moosic and a small town named Stark. The territory illegally governed by Lackawanna county has a population of 2,900 and is among its wealthiest possessions.

Nervous People

And those who are all tired out and have that tired feeling or sick headache can be relieved of all these symptoms by taking Hood's Sarsaparilla, which gives nerve, mental and bodily strength and thoroughly purifies the blood. It also creates a good appetite, cures indigestion, heartburn and dyspepsia.

Hood's Pills are easy to take, easy in action and sure in effect. 25c.

A Minister's Experience With Heart Disease.

Rev. L. W. Showers, Elderton, Pa.: "For many years my greatest enemy has been organic heart disease. From uneasiness about the heart, with palpitation, it had developed into thumping, fluttering, and choking sensations. Dr. Agnew's Cure for the Heart gave instant relief. A few bottles have rid me of almost every symptom of heart disease. It is a wonder worker." Sold by Wm. S. Rishton. 6 15 15.

A lot of new judgment exemption notes, with attorney's commission, and waiving everything, just printed at this office. Sold single, or in books of 25 and 50.

A STUDY OF MOLECULES.

Authorities at Variance About Certain Causes.

The modern conception of the universe itself is based on the molecule. This is the smallest mass into which a substance is capable of being subdivided without changing its chemical nature, but in compounds the molecule itself is divisible into the ultimate particles, known as atoms, of the constituent elements. Every material body consists of these molecules, separated often by distances that are vast in comparison with their own magnitudes, and endowed with rapid and ceaseless motion. Molecules must ever remain invisible, if, as Sir William Thomson (Lord Kelvin) calculated some years ago, their sizes are limited between 1-250,000,000 and 1-5,000,000,000th of an inch. Ruled lines somewhat closer than 1-100,000th of an inch have been resolved under the microscope, but much more is not to be expected, as the difficulties with high powers increase to a much greater degree than the minuteness of the objects seen. The motion of molecules in gases is unconfined and easily demonstrated, but in liquids, not to mention solids, the particles are held together by the power of cohesion and appear inert. Yet the motion of fluid molecules has been made perceptible. In 1827 Dr. Robert Brown, looking through a microscope at some pollen grains suspended in water, was astonished to notice a constant motion—oscillatory, rotary and travelling—of the smaller particles; and this motion, known at first as the Brownian movement, and called later Pedesis, has since been found to be common to all minute particles of solid matter. Vermifuge, gamboge and pumicestone are especially active, particles larger than about 1-5000th of an inch remaining inert. The movement is not due to evaporation, as it has been known to continue for years in a small quantity of fluid enclosed in an air-tight case, and it has even been observed in the fluids sealed in quartz of the oldest rocks, where the particles have probably been dancing for aeons. Other causes have been assigned, such as gravitation, currents in the containing fluid, light, heat, electricity, magnetism and the molecular energy of the particles themselves. These causes have been studied by a number of scientific men, the last being Mr. R. Mendel Barthe. This observer finds that all the explanations mentioned may be rejected, and that the phenomenon is one of "water and of water only," being due to molecular motion of the water itself, revealed to the senses, just as the flow of a deep river is made perceptible by a floating log—Invention.

The Genuine Dutch.

Mr. H. H. de Vos is president of the genuine Holland Dutch—the imitation Knickerbocker Dutch—society of New York, and it was a good thing and a true thing that he said at its annual banquet. He has the right to boast, and so has every other genuine Dutchman, that the red, white and blue of the flag of Holland has stood for liberty for centuries. If it had not been so, the red, white and blue of the American flag might have been meaningless. At a time when England and France denied free speech to scientists, liberals and men of progress, when the Tories of all Europe were bent on making a last desperate stand against advancement, Holland was the only refuge of freedom in Europe. It was from Holland that the apostles of progress worked to liberate the world. English books of that time which could not be printed in England have in their typographical errors so characteristically Dutch that any one who does not know history might laugh at them. But those who do know history never see one of them without an inclination to take off their hats to Holland, as the nursery—the home of the first free press that ever existed in the world.

It is because New York was a Dutch settlement that it always showed a spirit of liberality which does not characterize some other sections of America more or less remote from it. And if the descendants of the New York Dutch ever feel inclined to dishonor the traditions of their ancestors let them go to the genuine Holland Dutch and learn better.—New York World.

Putting on New Gloves.

In putting on new gloves, do so carefully, for their after-wear depends very much on the way they are treated from the very beginning. Never put on gloves when you are in a hurry and just going out; rather choose another time, when your hands are cool and you have ten minutes or so to devote to them. Before beginning operations dust a little powder into each glove, for this will cause them to slip on more easily. Work the fingers well on before putting in the thumb; then work that in slowly, gradually smoothing the kid onto the hand. When the glove is carefully put on pull it well down and button the second button, and any others that there are, with the exception of the last, leaving the first button until the last. If the hands are hot, remove the gloves, and then turn them inside out, pulling them in the air for an hour or two before laying them away.

A glove-stretcher will be found of assistance in the preparation of new gloves for wear. It must, however, be used with discretion, since it is quite as annoying to have a glove that is too large as one that is too small. In buying gloves always provide yourself with a spool of sewing silk or linen thread for mending, exactly the color of the gloves.

Result of Practice.

Perhaps, says the Sanitary Plumber, the highest compliment that can be paid a mechanic is to say that he performs difficult work with ease; but it adds that, whatever the work, ease in doing it comes only as a result of long labor that the uninitiated know nothing about. All of which is true and scientific—the deepest practical truth and the highest practical science. The man who thinks habitually when he does not have to think and works habitually when he is not obliged to work is either a genius already or is making himself one as fast as it can be done.

IVORY SOAP - IT FLOATS - FORTY MILLION CAKES YEARLY. THE PROCTER & GAMBLE CO. CHICAGO.

HUMPHREYS' SPECIFICS. Dr. Humphrey's Specifics are scientifically and carefully prepared Remedies, used for years in private practice and for over thirty years by the people with entire success. Every single Specific a special cure for the disease named.

IRON WILL DO. IS NATURE'S OWN TONIC. Stimulates the appetite and produces refreshing sleep. GIVES VITAL STRENGTH TO NURSING MOTHERS.

GILMORE'S IRON TONIC PILLS. Cure all Wasting Diseases and their sequences, BRONCHITIS, CONSUMPTION, &c.

PARKER'S HAIR BALM. Cleanses and beautifies the hair. Promotes a luxuriant growth. Never Falls or Restores Gray Hair to its Youthful Color.

WATER CONSUMPTIVE. The Parker's Ginger Tonic. It cures the worst Cough, Whooping Cough, Indigestion, Pain, Take in time 30 cts.

ELY'S CREAM BALM. Is quickly absorbed. Cleans the Nasal Passages, Alleviates Pain and Inflammation, Heals the Sores, Restores the Sense of Taste and smell.

IT WILL CURE. A particle is applied into each nostril and is absorbable. Price 50 cents at Druggists; by mail registered, 75 cts. ELY BROTHERS, 59 Warren St., N. Y.

MEN. In your vicinity, to solicit orders for our Choice Nursery Stock. We will pay a salary or commission, and furnish an outfit free. We are assisting writers now for Fall of '98. Write to THE GUARANTEE NURSERY CO., GENEVA, N. Y.

Lafayette College. EASTON, PA. SEVEN COURSES IN ARTS, PHILOSOPHY AND SCIENCE. Civil, Mining, Electrical Engineering and Chemistry.

NEW ENGLAND CONSERVATORY OF MUSIC. Send for Prospectus. Giving full information. FRANKLIN S. FRANK W. HALL, General Manager.

Fine PHOTOGRAPHS and CRAYONS at McKillip Bros., Bloomsburg. The best are the cheapest. J. R. SMITH & Co. LIMITED.

MILTON, Pa., PIANOS. By the following well-known makers: Chickering, Knabe, Weber, Hallet & Davis. Can also furnish any of the cheaper makes at manufacturers' prices. Do not buy a piano before getting our prices.

THE KEYSTONE FOUNDRY AND MACHINE COMPANY. IS NOW IN COMPLETE WORKING SHAPE, and is prepared to fill all kinds of planing mill orders, and foundry and machine work. The plant is well equipped, and all orders will be filled promptly. SHOPS ON SIXTH STREET, WEST OF WOOLEN MILL. 10-26-17.

FOR THE SCHOOLROOM. If it's anything needed in a school-room we have it. We are Headquarters for Blackboards, Desks and Seats, Crayons and Erasers, Maps and Globes, Ink and Information. What we tell you, you can depend on. Everything we sell you is guaranteed. We do business on the "money-back" plan, and we do more business than any other house in our line. We want everybody interested in school work to have our catalogue, so we can do still more business. Catalogue free. 65 FIFTH AVE., NEW YORK. Andrews School Furnishing Company.

FRAZER AXLE GREASE. Best in the World! Get the Genuine! Sold Everywhere! 10-19-17.

PEPPER'S NERVIGOR. WHAT PEPPER'S NERVIGOR DID. Basis powerfully and quickly. Cures when all others fail. Young men, young women, lost manhood, old men recover youthful vigor. A banefully guaranteed to cure Nervousness, Lost Vitality, Impotency, Nightly Emissions, Lost Power, either sex, Failing Memory, Wasting Diseases, and all effects of self abuse or excess and indigestion. Wards off insanity and consumption. Don't let druggists impose a worthless substitute on you because it yields a greater profit. Insist on having PEPPER'S NERVIGOR, or send for it. Can be carried in your pocket. Previous plates cost \$1 per box, or 6 for \$5, with a Positive Written Guarantee to Cure or Refund the Money. Pamphlet free. Sold by Druggists. Address PEPPER MEDICAL ASSN., Chicago, Ill. Sold by G. P. RINGLER.

PATENTS. Caveats and Trade Marks obtained, and all Patent business conducted for MODERATE FEES. OUR OFFICE IS OPPOSITE THE U. S. PATENT OFFICE. We have no sub-agents, all business direct, hence can transmit patent business to less than other agents. Less Cost than those who report from Washington. Send model, drawing or photo, with description. We advise if profitable or not, free of charge. A note will be sent if patent is secured. A note will be sent if no patent is secured. Send model, drawing or photo, with description, to actual inventor, or your agent, or to our office. Address: G. A. ... Washington, D. C. (Opposite U. S. Patent Office).
