is fashlonably valued. Eastport people ought to keep cool the year round. For the past twentyone years the average temperature during the summer months has been fifty-eight degrees.-Augusta

(Me.) Journal. The official report of the German commissioner of education at the World's Fair says: "In their school system the Americans are in every way superior to the Germans, most notably in teaching languages, drawing and modelling. It is surprising what a command of language American children have."

A medical journal says that in the continued use of the eyes in such work as sewing, bookeeping, reading and studying the saving point lies in glancing up from such work at short intervals. Practiced every ten or ffteen minutes it affords a relief to the muscular tension, rests the eyes and makes the blood supply much better.

In the time of Edward VI. much of the lands of St. Peter's at Westmin-ister were seized by his Majesty's ministers and courtiers, but in order to reconcile the people to that robbery, they allowed a portion of the lands to be appropriated toward the repairs of St. Paul's church; hence the phrase "Robbing Peter to pay Paul."

That will be a novel feature which it is announced Miss Sloan will introduce at her coming wedding. Two of the housemaids, wearing simplymade gowns of white silk, with befrilled caps and aprons of white mousseline de sole, will be detailed to escort the guests to the library and morning rooms where the presents are displayed.-New York Times.

The City of Mexico has discovered that a most salutary measure in the matter of sanitation would be to secure a more rapid flow of its sewage Accordingly, some twenty-five windmilis are to be built in different parts of the city, at a cost of \$25,000, which will rotate paddle wheels in the sewers, and thus accomplish the desired

The celebrated Dr. Dumoulin, being surrounded in his last moments by many of his fellow-physicians, who deplored their loss, said to them, "Gentlemen, I leave behind me three great physicians." Every one, thinking himself to be one of the three, pressed him to name them, upon which he replied, "Cleanliness, exercise and moderation in eating."

A Toronto saloon-keeper is reported as saying that the introduction of electric cars in that city has greatly diminished the sales in saloons, as workmen who previously walked home in companies of from five to twenty, and stopped at the saloons on the way for a social drink, now ride home, and once there, spend the evenings with their families.

Scientifically the Indian is thus described: Skin, brown or cinnamon hued; iris, dark; hair, long, black and straight; beard, scanty; eyes, deep-seated; nose, broad and promin-ent; lips, full and rounded; face, broad across the cheeks; head, square; back of head flattened; forehead, low and broad; jaws, powerful; facial angle, about seventy-five.

Probably not many women know where the powder-puffs with which alabaster brows and blushing cheeks are produced come from. There is a place in Chicago where some nimblefingered girls are engaged all the year round in making them. The material is the soft, fluffy down from cygnets or young swans, and it comes largely from the islands of the Baltic Sea .-Chicago Record.

Berlin is anxious that the Industrial Exposition which will be held in that city in 1896 shall be attractive to all interested in the study of modern city government. Accordingly, a sep-arate pavilion, covering about 1,200 square meters of ground, will be erectd, at a cost of about 150,000 marks. Here will be shown the details of the management of the educational, hospital and benevolent institutions; the sewerage, gas and water systems; the bridges, public buildings, markets and public baths. These will be full illustrated by molels and drawings and by full statistics. A ...

CURRENT TOPICS. 1-4

The "dumb" plane is a new invention on which young ladies can learn music without making any sound.

Paris has a fat men's club, membership in which is acquired by tip-ping the beam at 100 kilogrammmes, or 220 pounds.

It is said that the Indian Government intends to reward all those who took part in the Chitral campaign with six months extra pay.

The milk of the reindeer and its cheese product are said to be most excellent for all lung diseases. The natives, who live largely on the same, are remarkably free from all forms of disease and among the hardlest and most robust people in the world.

Lovers of birds and their songs must have noticed that the robin's note has changed. The bird is now sounding his high love-note. The cry is simple, and would scarcely attract atten-tion, but it is full of meaning, and possesses a rare sweetness and rich-

ness. Backed by Lord Roseberry, an expedition will soon be undertaken into the entirely unknown country between Tripoli and Alexandria. Here were once the gardens of the Hesperides, and here flourished the Greek city and colony of Cyrene, the rulns of which

are now about to be excavated. The imperial marquee, where Emperor William will entertain his 1,200 guests at the grand banquet in honor of the inauguration of the Baltic canal, is constructed or wood, in the shape of a man-of-war. It is an exact reproduction of the German training frigate Niobe, which has been seen in New York waters, and is fully rigged. Judging from the solidity of its construction, it is believed that it will eventually be utilized as a pays!

school.

LATEST DEVICE IN SULKIES.

Connecticut Inventor Has a Novel Vehicle for Harness Racing.

Yankee ingenuity has already been prime factor in the progress of the light-harness horse toward the twominute gait. Scarcely had the turf-tien of the West made a great improvement in tracks, notably the one at Independence, where the pacing record was lowered to 2:06 in 1891, than a Boston breeder brought out the bicycle sulky. The application of the afety wheel has by the records aided the trotters to the extent of five secands. Experts like John A. Goldsmith are of the opinion that Maud S. was a faster mare than Alix, and others teclare that Johnston and Direct had more speed and could carry it as far

is Robert J. has ever done. The inventors are not satisfied that the limit of mechanical aid to the haruess racer has been reached and a Connecticut man has recently designed a new style of sulky, as the result of a year's study. Henry Small, who has contrived this latest thing in 'bikes," is a contractor and builder of Hartford. He set out to devise a vehicle that would relieve the horse of draught and also give him the greatest possible freedom to use his legs. Mr. Small's idea is to have the running gear beside the animal. This

the flyer. As the wheels are a little in adrance of the reinsman, the weight of the dirver becomes a propelling power and the horse has practically no load o draw. There is a strap from the

places the driver above the horse, the

seat being directly over the hips of

The Proposed New Sulky leather pocket to go over the point, to keep the sulky from going forward so fast as to interfere with the stride of the trotter. The only harness required is composed of the sureingle breaststrap and bridle, which the inventor thinks will be of great benefit in permitting freer use of the shoulders and chest. A still more important advantage is the saving of distance at the turns, since the new sulky can be driven over any course close to the rail without danger of an In case the horse rears, the upset. wheels cannot run forward, as they do with the vehicle now in use, and Mr. Small says that the driver will have more control of the animal from the novel position of the seat. stirrups are on the shafts, and there is an attachment for securing the sheck rein, which does away with the water hook, so that in case of accident the driver will be in no danger from that appliance.

The notion of putting the wheels beside the horse is not entirely new, for a sulky on that plan was built a few years ago, and was exhibited in New York. That was before the small wheel had come into use for harness racing, and the contrivance seemed to be so clumsy, with the driver perched high in the air, that it attracted no attention. The vehicle was taken to Parkville Farm, on the Coney Island Boulevard, and the inventor has evidently abandoned the idea of placing it on the market, as he has left this odd-looking device remain there ever since.

Strawberry Planting

If there is a reader of this paper who has a bit of land and has no strawberry patch thereon, let him remedy that omission the coming season. If he has had no experience, the questions he will naturally ask are as follows: How and when shall I plant them? What varieties shall I plant? How many shall I plant to furnish a generous supply for a family of six?

Taking all things into consideration the best time for planting is as early in the spring as the ground can be worked, though they may be successfully planted all through the spring summer and early autumn. Plant them in the spring. Plant them in rows three and one-half or four feet apart, the latter preferable, and about fifteen inches apart in the rows. The ground should have received a generous supply of fertilizer in some form and should be thoroughly and deeply worked. Keep the cultivator running occasionally between the rows to keep the weeds down and use the hoe and the hand for the same purpose in the rows. The runners will soon begin to grow and in the autumn you will have a solid matted row of plants, leaving a narrow strip between the rows for convenience in working and picking. When the ground has frozen solidly in the winter, give them a mulch of coarse stable manure, straw or refuse of any kind, to protect them from the frequent freezing and thawing which will otherwise take place. Uncover them in the spring, leaving the mulch between the rows where it will, before the season is over, become incorporated in the soil.

Bedding Plants. All bedding plants flower the better when decayed blossoms are removed. The rhododendrons and azaleas should have this attention, otherwise the ripening of the soeds tends to check the plant's growth. If the spriaes burmaira is thus watched, with its flat heads of rosy pink flowers, which are so perfect about the last of June, the bush will seldom be without some display from June until October.

Dairy Schools. Reports from the several stations where dairy schools have been estab-lished show that the number of applicants exceeds the capacity of the schools. This is very encouraging, and is the strongest evidence that can be given in favor of the fact that farmers are progressive and that they are endeavoring to give their sons a

FACTS IN FEW WORDS.

The Atlantic takes its name from Mt. Atlas.

Middletown, Md., has a cat which has adopted a young rat, and is rearing it with care.

Tamales," a Mexican dish derived from the Aztecs, are croquettes of beef or chicken boiled in corn-husks.

The deepest well on our Atlantic coast is that at the slik works near Northampton, Mass., depth 3,700 feet. Many Chinese women do not bind their feet at all. Thousands of the peasant class have good walking feet, A codfish weighing 126 pounds was

brought into Vinalhaven, Me., recently. The circumference of the head was four feet three inches.

The Pascagonia, in Mississippi, was named from what the Indians called the Pascagonias, or "the bread-making the heat of the body. It is stated as an interesting so-

ciological fact, that in London out of 100 widowers who marry again twelve marry their housekeepers. According to Prof. Tyndall, if the sun's influence were entirely with-

drawn, universal death would ensue within a period of three days or less. Naples is to build permanent sea baths to accommodate 43,000 persons, and to enable them to have hot and cold baths at all seasons of the year.

Germany has adopted the system of separating the bright pupils from the stupid ones in the public schools. The sorting is to be done not by the teachers but by medical men.

The recent discovery of several as-teroids calls to mind the fact that Ceres was the first of the miniature planets to be discovered, and it was found on the first day of the present century. A mummy, on which were inscrip-

tions that are said to have proved it have been one of the Pharaohs, was unwound in Egypt recently, and ex-perts have decided that he was in life afflicted with gout. In their native haunts tigers are

divided into three classes—the game killer, the cattle lifter, and the man The latter is almost always an aged beast, whose teeth and claws are no longer serviceable.

A new religious sect has broken out in Missouri, its central magnet for the allurement of worshippers being an 'angel" who makes periodical flights to heaven and returns with messages for the faithful believers.

Fresh butter has been transported from Australia to England, and sold at profit for twenty-five cents a pound, The freight amount to two cents a pound. The next Australian experiment will be with poultry. During the summer there will be

no less than four great conventions in Boston. The estimated attendance is as follows: Christian Endeavorers, 50,-000 to 75,000; Knight Templars, 50,000 to 75,000; Young People's Christian Union, 2,000 to 4,000; Good Templars, 5.000. Many of the great men of history

have been of short stature. Canute the Great was a singularly small man; Napoleon, too, was little; Nelson had no height to boast of; and the great Conde was short enough. Hildebrand, Gregory the Seventh, was quite a diminutive person.

All the writers on Japan mention the Japanese love of nature. In the spring they form parties to go into the country to see the fresh foliage, in the autumn to enjoy its brilliant tints, and in the winter to survey the landscape clothed with snow.

PERSONAL MENTION.

George Gould is said to have aspira-Senate.

Arthur Balfour, becoming tired of golf, and has taken to the bicycle, The British Parliament, it is said, is watching Mr. Balfour's experiments in wheeling with deep interest.

Franz Defregger, the famous German artist, passed his sixtleth birthday in his villa near Bozen a few days ago. He is now at work on a great altar piece-St. Joseph-for a new church of Bozen.

"Uncle Dick" Oglesby, the Illinois ex-Governor, who told a visitor the other day that he was "an old piece of household furniture, old-fashioned and worn-out," is past seventy, but hearty.

It is thirty years since Gen. Buckner surrendered to Grant at Fort Donelson. The veteran soldier walks about Louisville, nowadays, corncob pipe in mouth, waiting for a summons to represent Kentucky in the Senate. -New York World.

On her way back from Cape Martin to Farnborough the ex-Empress Eugenie stayed for a time in Paris. She drove through the Tulleries Gardens, and visited again the site of what was once the royal abode where she entertained nearly every sovereign in Europe.

Queen Victoria's elderly cousin, the Duke of Cambride, has inexorably refused to permit any bicycling to be indulged in Hyde Park, of which he is the Ranger. The Government had granted the necessary authorization wigthout counting on Duke George. who never until now has made use of the authority conferred by the office of Ranger, which everybody regarded as a mere sinecure.

Dr. von Behber, a German meteorologist, has determined how hot are the clothes we wear. When the outside temperature is 50 degrees Fahrenheit the temperature on the coat 71.2 degrees, that between the coat and the waistcoat 73.6 degrees, be-tween the waistcoat and the shirt 75.9 degrees, between shirt and undershirt 77.4 degrees, and between the woolen undershirt and the skin 90.9 degrees,

"Meriden is proud of having among her veterans a man who helped to defend Fort Sumter," says the Hartford Times. "He is John Doran, who in 1860, was working in Southington, and who, in company with another man, went on a pleasure trip to Charleston. Of the Trave Sumter defenders only seven are living, including the Meriden man. Two of them, named Costelle and Johnson, accentific knowledge of dairying ... live at Washington."

An Assignment for Him.

" I have an assignment for you, Mr. Graffik," said the editor to the new reporter. " Are you married?"

" No. sir." "I thought not. Get married instantly and let me have a three-column article on how to manage a wife .- From Judge.

Urging Her On.

"Roberta," said the emancipated woman to her daughter, "I can see a thing or two. You are in love with Charles Wetherill."

" Well, mamma, suppose I am?" "Then why don't you pluck up enough courage to propose before some other woman gets him? He's the very best cook in the town and he has money in his own right."-From Judge.

Hood's Sarsaparilla gives great bodily, nerve, mental and digestive strength, simply because it purifies. vitalizes and enriches the blood.

Controversy by Shovel.

Wife-Don't I hear some one beat-

ing a carpet? Husband-No, I hired an Irishman and an Italian to put away the coal, and they are arguing .- From

CONSULTATION FREE.

Many years' experience has taught him that nearly all allments can be cured or greatly helped. The diseases he treats are Consumption, all Bronchial Affections, Loss of Manhood, Crooked Limbs, Wry Necks, Barrenness, Scrotials, Sait Rheum. Syphilis, Eye and Ear Diseases, Skin Diseases, Neuralgia, Bright's Diseases, Killosiases, Neuralgia, Bright's Diseases, Vilcers and Old Sores of every description, Rheumatism, either acute or chronic, Sick Headache, Epilepsy, Gastritis, Congestion, Canker, Tonsilitis, Deafness, St. Vilus' Dance, Impediment of Speech, Loss of Voice, Stuttering, Cancer of the Stomach, Piles Jaundiec, Constipation, Billousness, Dysentery, Chronic Diarrhosa, Chilis and Fever, Fistula, Billous Colle, Paralysis, Heart Disease, Intestinal Worms and Liver Compilaties.

However, it must be remembered that he will not undertake to treat all cases, but only those which he is positive can be cured or greatly reflected, and will tell you at only specialist this side of New York, Philadelphia and Buffalo, who makes an exclusive specialty of treating Chronic Cases and the Disease of Women. Those who have been suffering for years should call at once and learn whether their aliment can be cured or not. No cases received unless they can be cured or greatly helped.

What Dr. MacTaggart

HAS DONE AND IS DOING.

The Doctor wishes the public to understand that he is not soliciting the ordinary run of cases, but desires just such discusses to treat that other physicians cannot succeed with or at least tail to cure. When you suffer from such consult him (consultation is tree), have him thoroughly diagnose your case, and then what he tells you can be relied upon as a fact beyond refutation. Some may say, "why go to Dr. MacTaggart when we have as good doctors here as anywhere?" Yes, 80 you have in their line of practice, but not in those specialities that Dr. MacTaggart is schooled and practiced in. In support of this unqualitied assertion read his testimonials—not only read them, but investigate the truthfulness of them. Where are the physicians who can remove caheers without pain and cure it beyond peralventure? He does it. Where can you find another physician in Fenosylvania who can remove tumors of even 50 pounds weight without he use of the knife, without pain, and without leaving a sear? Dr. MacTaggart does it. What physician can cure fistulas without cutting or causing the least pain or soreness during treatment? Dr. MacTaggart does it successfully. These are golden truths—polden because it proves beyond dispute that the science of medicine in specialities particularly, is advancing with rapid strides far in the lead of the regular practioner. HAS DONE AND IS DOING.
