BREATHING IS A FAD.

Hovel Health Idea. Among New York's Fash-

The latest social fad in the metropolis is "deep breathing." It has fol-lowed in the wake of the bicycle, and, just as we hear of people being killed by undue indulgence in the latter, I dare say we will soon be reading accounts of those who exploded in the sweet, fresh dawn of day from inspiring too great quantities of ozone at one time. The modus operandi may be gleaned from my first experience early days connected with every sort of popular fad or fancy, especially if it were of an intellectual turn. Her daughter has now taken her place of

were of an intellectual turn. Her daughter has now taken her place of chief fadiet in society, while she sits in the background and enjoys the fun.

"You're not healthy; you're too shender," she said storpally to me on blee occasion of a call.

"You're not healthy; you're too shender," she said storpally to me on the occasion of a call.

"You can to healthy in the store of the st blessing, as it would be impossible to make good teachers out of all the students who went into these schools, but the large majority did enter the profession, and the wonderful progress made by the public schools of Pennsylvania during the past 25 years is due largely to the benefits the teachers derived from the terms spent at the State normal schools. These schools do not pretend to turn out classical scholars, but they do furnish a thorough common-sense, practical education that well fits their graduates for the

Since the first normal school was taken under the wing of the Commonwealth millions of dollars have been appropriated to their use and the use of those who enrolled as students, and the good results obtained have been well worth the expenditure. That they have been very successful is again evident from the fact that their graduates fill the best positions in the best schools not only of Pennsylvania, but all over the country. At the present time nearly 7,000 young men and women are enrolled at the 13 normal schools, and next year will bring out a larger number, the attendance having steadily increased from the beginning. The next few years will see the necessity of additions to the number of schools, and we cannot take too much interest in their welfare. Every dollar appropriated to the State normal schools is only invested, the public getting the principal and interest back in the higher education now obtainable in the common schools .- Pittsburg Times .

hard work in the common schools.

A Word or Two

to those suffering from catarrh or the thousands subject to severe attacks of cold in the head, will not be amiss if a sure remedy can be offered. Ely's Cream Balm has become a favorite in all sections of the United States, because of its effectiveness. Your cold in the head will be quickly relieved by it, and the severest attack of catarrh will yield to, and be perfectly cured by a thorough treatment. Catarrh is not a blood disease, but an inflammation of the passages of the nose and throat, due to climatic changes.

A NEW INDIAN PROPERT.

His Fredictions Falled, lint Be Created a Lot of Excitement.

The growth of sects and heresies under our tolerant rule in India is more frequent than is generally known, for Hinduism is clastic enough quickly to absorb them, and they are still more short-lived when their leaders have been Christians. It is when the religious imposter heads a movement which threatens the peace of the country that we learn the curious details.

The latest event of this kind has occurred in the Bengal division of Chota Nagpore, the aboriginal tribes of which have joined the Christian church. Anglican, Lutheran and Scottish Presbyterian by the thousand. Birsa, a lad of twenty, who had lapsed from Christianity, was in the jungle with a companion, when a flash of lightning for a moment iransigured his face, and his friend saluted him as a god. Birsa returned to his village, Chaikad, and proclaimed himself an incarnation who could work miracles of healing.

His first case was that of a baby, who was perfectly well; he breathed upon it, declared he had cured it, and his fame brought thousands of the sim-ple demon-worshipers to his feet. Over every case of siokness he pronounced a charm, consisting of such headlines of an English primer as he had read in the Lutheran school at Chaibasa. "Stul, store, stare, stale," was the favorite divocation. He admitted that Christianity was good but for two evils-the offertory in church, and the permission to wear boots when at

He soon proclaimed the end of the world for a fixed day and hour; all were to be destroyed by fire and brim-stone except those who found refuge with him. Money was therefore usetheir all at once on clothes, with the result that the Hindu dealers could not west would not be wanted; the cattle accordingly were turned into the crops.

When thousands waited at high noon on the fixed day for doom, and nothing occurred, Birsa tied a string between two trees and declared that the end would not come till that broke. The nearest English missionary who had tried to open the eyes of the deluded multitude, and feared a famine, then informed the British deputy commissloner at Ranchl, the county town. He sent a constable to arrest the impostor, but the crowd was too great. A whole posse of native constables followed, and had to fice. He then went out himself, and by night arrested the prophet, who was sleeping in the midst of his chosen followers.
But by that time there was the be-

ginning of a rebellion such as, in Lord Dalhousie's time, caused the Santel war in the neighboring hills. As Birsa went to jail he prophesied his return in four days, and 7,000 men, whom he had ordered to arm themselves with axes, walted in vain. Now, afraid of the military police under the white man, they are flock. g to the chapels, enger to be rerognized as Christians; but of these the maj-rity are expected to change their mind when their terror and delusion have disappeared with Birsa's long imprisonment in a distant place. A similar imposter caused what is known as "the war of the axe" among the Kaffirs of South Africa -Edinburgh Scotsman.

To Save the Lagoon of Ventce-

A great engineering work of immense importance to the city of Venice has just been completed. Fifty-eight years ago, in order to prevent the damage caused by the occasional overflowing of the River Brenta, the Austrian Govcelebrated engineer, Paleocapa, carried out certain works by which the mouths of that river were carried into the of their original outlet. Since then the alluvium brought down by the river has threatened to convert a portion of Chioggia Lagoon into a fever-breeding swamp, and also to cause serious damage to the whole Venice Lagoon by silting.

It was accordingly decided to construct a new channel for the Brenta, sixteen kilometers in length, giving the river a direct outlet to the sea near Brondolo, still further south. The scheme, which was estimated to cost 8,000,000 lire, and was begun in 1884, has now been brought to a successful conclusion. The new channel, by means of subsidiary canals, also provides, a fresh outlet for the Bacchiglione and other rivers formerly flowing into the Venice Lagoon. - London Standard.

Force of Habit in a Soldier.

'After the war, a young man who had served through the great contest in a Western regiment, became insane and was confined in an asylum. Previous to this he had been much attached to the Governor of the State where he lived, but during his insanity he conceived a great dislike for his former friend, so much so that he declared his purpose of killing the Governor whenever he should meet him. One day he escaped from confinement and by some means procured a musket with bayonet attached. Passing along the street he met the Governor, and at once bringing his musket to the "charge" was about to rush upon him. The Governor, however, fortunately did not lose his presence of mind, but in a commanding tone gave the order "Halt." The former soldier from mere force of habit, which was stronger than even his insanity, instantly stopped. "Shoulder arms," continued the Governor. "Right about face." "Forward, march," and each order was promptly obeyed, and the lunatic was marched back to his place of confine-

Uses of Sawdust.

A growing industry in this city is the sawdust business. Forty years ago the lumber mills were glad to have sawdust carted away; twenty-five years ago it could be bought for fifty cents a load; now it brings \$3.50 a load. It is used in hotels, saloons, groceries and other business houses for the absorption of dirt when sweeping. Plumbers use it a great deal about pipes and walls to deaded sound. Soda water mer and packers of glass and small articles of every kind use it, as well as in the manufacture of dolls. - Philadelphia

Edward B. Harper, Founder. Frederick A. Burnham, President.

FIFTEEN YEARS COMPLETED-

-ANNUAL MEETING AND REPORT. The Largest and Strongest Hatural Premium Life Insurance Companies in the World.

1895 SHOWS—AN INCREASE IN GROSS ASSETS, AN INCREASE IN NET SURPLUS, AN INCREASE IN INCOME, AN INCREASE IN BUSINESS IN FORCE, OVER 105,800 MEMBERS INTERESTED.

The Annual Meeting of the Mutual Reserve Fund Life Association was held in the Association's Building, corner Broadway & Duane St., New York City, on Wednesday, January 22nd, and was attended by a large and representative gathering of policy holders who listened with keen interest to the masterly Annual Report of President Burnham.

Many policy holders evidently regarded this as a favorable opportunity to meet face to face the new chief executive officer of the Association, President Frederick A. Burnham, the man whose grasp of life insurance, whose keen executive ability and strong individuality have enabled him to take up the work laid down in death by the founder of the institution, the late Edward B. Harper, and make of the administration of his office of President, not an echo or copy of that of his predecessor, but a piece of finished work, characteristic of a man of independent views, and worthy to follow the work which had carried the Association to a position never attained in the same length of time by any life insurance organization in the world. It is rare, indeed, that a great institution like this passes, without check to its prosperity, through a change in the executive chief, for it is rare indeed that a chief like the late Mr. Harper finds so able a successor as President Burnham.

The record of the year 1895 speaks for itself, and shows the

following gratifying results.

The GROSS ASSETS have increased during the year from \$5,536,115.99 to \$5,661,707,82.

The NET SURPLUS over liabilities shows a NET GAIN the year of \$306,329.43, and now amounts to \$3,582,509.32. The INCOME from all sources shows a gain for the year of \$631,541.97, and amounts to \$5,575,281.56.

DEATH CLAIMS to the amount of \$4,084,074.92 were paid during the year, an increase over the previous year of \$1,013,560.91.

The BUSINESS IN FORCE shows a gain for the year

of \$15,293,265, and now amounts to \$308,659,371. Counting three hundred working days in the year the daily average income for 1895 is \$18,584.27; the daily average payments for death claims, \$13,652.25, and the daily average gain in business in force within a fraction of \$51,000.
