Mass Meeting of 3000 Strikers Applauds Radical Speakers.

Exciting Incidents During the Week.

The strike situation at Hazleton was rather quiet last week, but is again becoming serious as time goes of the troops is wearing away. Where the soldiers were looked upon with respect, stones are now nurled at them and they are reviled. Governor Hastings last week gave orders to stop the holding of any meetings that might have a tendency to incite to riot, but judging from the big mass meeting held there Saturday night, the orders 3000 miners, and was addressed by try are not smaller, but larger than P. Mr. Maguire urged his hearers to keep moving forward for an advance stock worth \$68,300 to his employes. of wages, and said organization would achieve their purpose. "It has brought ed the price of milk at retail from 5 success to the operators," he said, to 6 cents a quart, to take effect on "who have united in paying out the least money they can as wages, and now and then to employ deputies to shoot you down."

The address was concluded with a forcible invective against the company store system, to correct which, he said, the Attorney General of the State issued a proclamation designating should be called upon to enforce the store order law of 1891.

Mr. Maguire closed with a reference to the rise of the late Franklin B. Gowen, who, he declared, "had driven thousands of miners to famine and despair, but ended by blowing his brains out.'

While the strikers are remaining rather quiet at present, the authorities are of the opinion that they are not at all settled and that the strike will not end until more human life has been sacrificed.

#### Dun's Review of Trade-

The end of the bituminous coal strike and the return of many thousand men to work at advanced wages adds to the purchasing power of the people, and the anthracite strike affects not a fifth as many workers. The starting of many mines and works, the enormous exports of wheat and corn, the favorable news as to those crops and cotton, the fall in sterling exchange and the report showing that gold imports began in August, exceeding exports by \$2,390,587, while merchandise exports exceeded imports by \$40,953,753, have all contributed to forward the improvement in business. The replenishment of stocks cannot be half finished, though some who could see no sign of improvement a few weeks ago are now finding it so vast and rapid that they fear reaction. But consumers as well as dealers have also to supply themselves after years of ea forced economy, and while their power to purchase is increasing every day, on. The awe caused by the arrival and their actual buying at retail, rea sons for apprehension are not urgent. When the tide rises after four years of depression it does not fall again after four weeks.

TO THE COLUMBIAN :

Boston, Mass., Sept. 20, 1897. I have been in this city now about ten days, and the weather since I have been here has represented pretty nearly all the different seasons of the year. The first few days were given over to some of the hottest weather it has been my fortune to experience during the past summer, the thermometer registering up towards the hundreds. Since then it has subsided into its regular routine of alternate sunshine, clouds, mist, fog, thunderstorms, and beautiful Autumn weather, for when the weather here is pleasant, it is of the finest in the world, and it is that at present.

The interest of this city now centres in four or five different things. The new subway, the beautiful Hotel Touraine, the base ball contest for the league championship, the opening of certs, and the mayoralty contest.

The subway is a new line for the trolley cars which has been built under the common, and coming up out of the ground at the Public Gardens. It was put in in order to do away with the jam of street-cars which formerly vanity and patience when we have to blocked Tremont street for the distance of about half a mile, from morning till night, and it is succeeding admirably in its purpose. Where formerly it took about half an hour to come that distance it is now done in a few minutes. Thousands of people are taking trips through the subway daily simply for the pleasant ride. There is talk also of an overhead road in order to insure rapid transportation. The subway is not yet completed and there are several other lines in

> process of construction. The base-ball cranks are rooting for Bostion as loud as they are able, and there will be great rejoicing here if the home team wins the pennant. There will be three games here this week with Brooklyn, which team has been playing strong ball lately, after which the "bean eaters," go to Baltimore, whither they will be accompanied by a great many enthusiasts.

The music season here practically begins with the opening of the New England Conservatory, which occurred on the 9th inst. The concert season has not begun yet however. That begins with the Symphony Ochestra concerts the sale of seats for which opens this week. The orchestra gives twenty-four public rehearsals, and twenty-four concerts yearly in this city. It is one of, if not the finest orchestral organization in the Universe, and Music Hall is always crowded at these concerts. They play, of course, only the highest types of classical music. Only the greatest soloists appear at them.

The principal Episcopal Churches here are Trinity Church and the Church of the Advent. They are typical representatives of the High and Low Church forms of worship. At the former church, of which the great Phillips Brooks was the former pastor, only the plainest form of worship is used. The chancel, altar, etc. are finished handsomely but plainly, the service is all read except the ordinary morning and evening chants, which are sung by a fine mixed choir, with an excellent organist. The attendance is very large. At the latter church, the chancel is very elaborate, there being a great screen of brass before the chancel, the altar and reredos, covered with candles, while the officiating clergyman or priest chants the entire service. There is a large and magnificent vested choir, and everything is chanted even the confession, etc., in which the congregation joins. The morning service consists entirely of the celebration of the Holy Communion. Mr. S. B. Whitney, one of the finest organists in this country, presides at the organ.

I will try at some future time to give you some idea of the beautiful surroundings of Boston and historic places of interest which abound here. C. P. E.

Lancaster Farmers' Profits.

Nearly 5000 persons attended the farmers' institute at Black Barren Springs, near Lancaster on Thursday. The addresses delivered were exceptionally instructive, and foremost among them was one by ex-Attorney General W. U. Hensel. John H. Landis delivered an address, in which he referred to the great amount of money which the recent advance in the prices of cereals and all other farm products has brought into Lancaster County. He congratulated the agriculturists of the land upon the improved condition of their prospects.

## YELLOW FEVER SPREADING IN THE SOUTH.

The rapid spread of the yellow fever is causing a great sensation in the south. Two weeks ago there were but two cases known to the Board of Health of Louisiana, and in spite of all efforts made to wipe out the dreaded disease it has spread with alarming rapidity until now it is of an epidemical nature, as many as twenty-two new cases having been reported in one day the forepart of this week. The New Orleans board of health have sent an appeal to the Governor of the State asking him to supply them with \$25,000 to assist in prosecuting the fight against the fever.

## New Pension Ruling.

A new pension ruling that the veterans are kicking on, and which will affect thousands of them, has been in force for several days in the pension bureau, to the effect that "all new disability cases, where a pensioner is not receiving a pension for one disability and wants another, must be referred to a special field examiner to corroborate the evidence of the applicant, and to look up the credibility of every Sunday, and waits outside till the his con. ## Green 2-Oent Stamps.

The next lot of two-cent postage stamps turned out by the bureau of engraving and printing will be printed in green of the shade now used on silver certificates. The change was decided on after a consultation between Gage, Postmaster General Gary, and Chief Johnson of the bureau of engraving and printing, and is largely a matter of economy. The saving by using green will be some \$10,000 annually.
