THEN A WOMAN FEELS OLD.

When Her Growing Grandson First Pays Her Fare on the Cars.

Mrs. Jones and Mrs. Smith met on an Minois Central suburban train, homeward bound from a morning of shoping. Mrs. Jones is 35 and a mother; Mrs. Smith 65 and a grandmother, says the Chicago Inter Ocean.

"My dear Mrs. Smith," said Mrs. Jones, "how well you are looking. I declare, you are the youngest-looking woman for your age I know. It seems that you have taken off several years every time I meet you. Have you discovered the magic fountain?"

"My dear," replied Mrs. Smith, "you mean well and I'm obliged to you, but I feel an old, old woman to-day."

"Why do you emphasize to-day?" "Well, it's this way: I started to

come down town this morning feeling **m** gay as a girl of 20. At the station **I met** my grandson. He's only 13, but he's as big as some men. I suppose the sight of him should have sobered me and made me realize what a landmark I am, but it didn't. And I kept on feeling young and frisky until the conductor came along."

"What on earth did the conductor have to do with it?"

"Why, that boy pulled out his commutation ticket, handed it to the conductor, and said, as a matter of course: Two.' Goodness knows I felt old enough when my eldest son paid my fare for the first time, but when a woman gets so aged that her grandson pays her fare she's ancient, sure enough."

BANKS HAVE USE FOR MONEY.

Way in Which Big Financial Institutions Manage to Pay Dividends to Shareholders.

Many people wonder how banks use all the money deposited in them and how they manage to pay interest thereon and yet come out at the end of the year with a big profit on the business, says the New York Telegram.

What they do is trade with the money. To the depositor they pay between one and two per cent., but the money they lend brings them in three, five, six, seven, and even eight per cent.

For instance, they give loans on all sorts of securities, such as railway debentures, government stock, public company shares, dock warrants, bills of lading, etc.

They also lend money on the se-enrity of houses and land, but not to a great extent, as repayments are

When a couple of substantial business men or farmers or professional men back a bill the bank often lends without any security at all; but now and again they have heavy and ruinous losses on these loans.

All banks, however, have large sums of money constantly lying idle, for they must keep sufficient cash at the various branches to pay checks, and even to be more or less prepared for panics. Still, the difference between the one or two per cent, they pay and the three or sight they receive on millions of dollars leaves them an immense profit on the year's business.

The Prevailing Conception of the

Historic Polsoner's Character

Is False.

"All her contemporaries agree in

describing her as singularly attractive,

with a sweet joyousness and charm

quite peculiar to herself," says "The

History of the Popes," by Dr. Henry

Pastor. "'She is of middle height and

graceful in form,' writes Uicolo Ca-

gnolo of Parma; 'her face is rather long,

the nose well cut, hair golden, eyes of

no special color, her mouth rather

large, the teeth brilliantly white, her

neck is slender and fair, the bust ad-

mirably proportioned. She is always

gay and smiling.' Other narrators spe-

"Unfortunately, we have no trust-

worthy portrait of this remarkable

woman; at the same time we can gather

from some medals which were struck

at Ferrara during her stay there, a fair

notion of her features. The best of

these medals, designed apparently by

Filippino Lippi, shows how false the

prevailing conception of this woman's

character, woven out of partisanship

and calumny, has been. The little head,

with its delicate features, is rather

charming than beautiful, the expres-

tion is maidenly, almost childish, the

abundant hair flows down over the

shoulders, the large eyes have a far-off

look. The character of the face is soft,

irresolute and gentle; there is no trace

of strong passions and rather it denotes

a weak and passive nature, incapable of

The portrait will not be Cooper's thilling stories. His head and face were apparently covered with blood, but it was soon discovered that he was still alive, as he said given unless an extortionate price is paid for a frame. The original page of pen and ink sketches by the immediately set to work to wash the pictures are never returned, and the agents leave for pastures new.

The Two-Cent Stamp Issue

During the year 1898 the United States bureau of engraving and printing issued 2,500,000,000 of the common red two-cent stamps, enough to go almost twice around the earth. Stacked one upon another, they would pile up 150 miles beyond the atmosphere, equal in weight to two of our big locomotives and would make a blanket to keep the frost off the city of Washington. If these stamps worked in relays, each taking the letters as far as allowed by the postal regulations, the letter would be carried to the most remote star.

Will Cost \$400 a Mile-

It is estimated by an exchange that the bicycle side paths to be erected in the various counties of Pennsylvania will cost \$400 a mile, which would mean an annual expenditure of \$5,000 to construct twelve and a half miles of a path in a country. The paths are expected to be raised twelve to eighteen inches above the road level. The minimum width must be three feet and the maximum six feet.

A Seedless Orange.

Not content with having produced a hybrid orange that is likely to thrive in a comparatively northern president. climate, the United States department of agriculture is now engaged in evoluting an orange that shall be seedless, and whose peel will come away as readily as the skin of a banana. This, too, it is said, will be able to withstand considerable degree of frost.

Topics of the Day.

There Is Nothing on the Island Which May Be Dignified by the Name Mine

If we listen to the voice of the charmer or go to the books on Cuba for our information we shall find that the mineral resources of this island include gold, silver, mercury, lead, antimony, copper, chrome, iron, manganese, pitch, bitumen and even coal; but when we come to look for practical metallic results commensurate with these varied mineral resources we shall be disappointed, says the Engineering Magazine.

The gold fiction is the most time honored, for the original Spanish settlers expected to find rich gold mines in Cuba. According to their historian much gold was taken from this island at the beginning of the conquest, but it seems probable that most of this was taken from the chiefs or caciques of the Indians and very little from the ground. El Vlagero Universal, Madrid, 1797, "Some of this metal (gold) is still found at Holguin." Whenever the existence of gold in Cuba is discussed this "mine" at Holguin is invariably brought forward. It is true that some work has been done at this point and a little gold has been extracted, but there has never been any systematic exploration, and there is nothing there which may be dignified with the name, of a mine.

Sheep-Shearing by Machinery.

The sheep-shearing experiment that is being tried in Sycamore, Ill., is proving successful, says the St. Louis Globe-Democrat. A gasoline engine of four horse-power runs ten clippers, which shear on an average 1,000 sheep a day. One of the advantages of the experiment is that about half a pound more wool is realized from each sheep. The test will be given to 15,000 sheep. The sheep are sheared, the wool tied and packed in large sacks holding several hundred pounds each and ready for shipment at once. The success met with in this experiment will revolutionize the sheep-shearing business.

New York's Police.

The New York police department on March 1 had a total membership of 7,264 officers and men, of whom 91 were in the bicycle squad, 89 in the tenement house squad, 164 were detectives, 83 were in the sanitary corps, and nine were detailed for service in the house of detention. There were also 38 police matrons.

Rush Work on Siberian Rallway.

It is expected that the Siberian railway will be completed to Ickutsk in February, 1900.

Many of His False Productions Are Purchased for Scientific Collections.

correspondent of the discovery of an egg forger, whose false productions are ourchased for scientific collections and by amatcurs, says the Lincoln Daily News. The man was very clever, A visitor saw him make a penguin egg that could not be distinguished from the real one that served him for a model. He made the shell of plaster of paris burnt and glazed. The egg was intended for a man who furnished eggs for a foreign scientific collection. These imitations are not difficult, for among the real eggs of most species there are so many varieties that even the most practiced expert could not distinguish all of them. The eggs of the common fly-catcher are very cheap. By chemical treatment they acquire a bluish green shining color, and are then sold at a very high price as the eggs of the silk-tail. From common duck eggs are fubricated the eggs of a falcon, for which 50 or 60 francs are paid. The duck eggs for this purpose are given a silver-green color. Pigeon and wood pigeon eggs are also transformed into rarer products of middle-sized birds. Nightingales' eggs are difficult to procure and are therefore very dear. They are imitated by coloring larks' eggs brown. The egg forger was for a long time an assistant in a natural-history museum in the provinces.

Prophetic.

The Paris papers are telling an interesting story of a newly-elected member of the French senate. M. Bassinet, like many of his colleagues, is a selfmade man, and began life as a journeyman mason. In that capacity he was employed to renovate the sculptural facade of the Luxembourg palace, when the architect, noting his skill and industry, said to him by way of encouragement: "Why, you couldn't be making a better job of it if it were wour own house." The young workman smiled, and is said to have answered: "One never knows what the future may bring forth." He had at the time no political aspirations, but all the same the witness stand in court, he grows he now sits as senator in the building he helped to adorn.

Supreme Court Sustains the Foot-Ease Trade-mark.

Justice Laughin, in Supreme Court, Buffalo, has ordered a permanent injunction, with costs, and a full accounting of sales, to issue against Paul B. Hudson, the manufactures of the foot powder called "Dr. Clark's Foot Powder," and also against a retail dealer in Brooklyn, restraining them from making or selling the Dr. Clark's Foot Powder, which is declared, in the decision of the Court, an imitation and infringement of "Foot-Ease," the powder to shake into your shoes for tired aching feet, now so largely advertised and sold all over the country. Allen S. Olmestead, of LeRoy, N. Y. is the owner of the trade-mark "Foot-Ease," and he is the first individual who ever advertised a foot powder extensively over the country. He will send a sample free to anyone who writes him for it. The decision in this case upholds his trade-mark and renders all parties liable who fraudently attempt to profit by the extensive "Foot-Ease advertising, in placing upon the mark-
