## THE COLUMBIA

# WALK ASHORE!

It all happened at one of those pleasant on side resorts, where life is comedy from day to dray and tragedy has no place. She just stepped on the raft which she thought the moored, and in pure idleness of mood fall to rocking it from side to side. But the raft was not moored. Her rocking had slowly dislodged it from the sand, on which a was grounded, and when she turned around, she was afloat and the shore a rod behind her. She cried for help and was heard by a lonely fisherman who sat at some distance on the beach mending his nets. How slowly he got up. How slowly be tramped across the sandy shore. And

she was drifting, drifting, drifting ! "Save me"! she cried, "save me"! as the old wan came to the water's edge. The griz-aled mariner raised his hand to the side of his mouth and cried hoarsely, "Walk

ashore"! That's all there was of it. She was still in shoal water. All she needed was the timely word of instruction and advice. But suppose it had not come? Suppose she had not heeded it? Was there no danger? The open sea, a frail raft, and a frailer woman on the raft is a twee of the

The woman on the raft is a type of hun-dreds of thousands of her sex who are drifting into danger. Up to a definite day, they have been enjoying life in perfect security. Then, in a moment, a sense of impending danger comes. They are at the mercy of disease. Every day increases the danger. They are drifting, drifting, drift-ing. Then comes the cry for help. To thousands of appeals there has come the answer from Dr. R. V. Pierce, chief con-sulting physician to the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., The woman on the raft is a type of hun-

#### WALK ASHORE! WALK ASHORE !!

WALK ASHORE I WALK ASHORE I! You are still in the shallow waters of disease. You can still get back without more than inconvenience to the land of health behind you. All you need is just the right word of advice and common sense instruction in time, and the grip of a helping hand. That is just what Dr. Pierce offers to every one suffering from disease ; timely, health restoring, life saving advice, ptactical help. It requires some confidence to take advice when your own senses are against it. The woman on the raft could to take advice when your own senses are against it. The woman on the raft could not see the bottom of the rolly water, and the land looked so far away. So the woman in disease can't see how she can be curred, and recovery of health seems hopeless. And, perhaps, the very disease that has begun to threaten her is consumption, that dreadful disease regarded by millions as incurable. Her local doctors perhaps say, "we can make your suffering a little less, but there's no hope." Does Dr. Pierce claim to cure consump-tion? That question isn't worth arguing

tion? That question isn't worth arguing Look at the record. Take a case in point.

Look at the record. Take a case in point. Here is a man (or woman) with a hacking cough, a hectic flush, night-sweats, great enn-ciation or wasing of fiesh, spitting of blood shortness of breath and all the other symptoms. After every remedy and every local physician mas failed, he, as a last resort, takes "Golden Medical Discovery" and the cough vanishes, the check gets back its natural color, sleep becomes sound and refreshing, the spitting of blood stops, fiesh and muscles become firm, weight increases, and life goes along in quiet and com-fut may be it wasn't consumption after all? May

cases, failure

cases, and not more than three per cent of failures. One fact, at least, is well established. That the "Golden Medical Discovery" does cure weak lungs, bleeding from lungs, obstinate, lingering coughs, laryngitis, bronchitis, throat disease, and kindred affections of the air pas-sages, which, if neglected or badly treated, lead up to consumption, can no longer be doubted in view of the many thousands of well estab-lished cures of such cases reported by the most trustworthy citizens. Many of these cases have been pronounced consumption – and incurable —by the best local physicians before the suffer-ers commenced the use of Dr. Fierce's Golden Medical Discovery. Whicher the doctors have erred in their judgment in these numerous cases or not is not for us to decide.

## **PHOTOGRAPHING A BATTLE.**

#### The Incessnut Whistle of Bullets Is Not Exactly Conducive to Good Work.

Many people have has ideas of photographing a battle. A photograph of Modder river would reveal nothing but a bare stretch of veldt with a line of willows and poplars in the background. Not a Boer could be seen, and even our own men were almost invisible as they lay there in sand-colored khaki, keeping aliberal five paces apart-only here and there where a slight undulation gave a precarious cover could one see the khaki backs clustered together like a swarm of locusts on the plain, says Scribner's.

Personally, having been fortunate spough to find a small ant-hill for my head protection, I endeavored to take a few snapshots with a kodak, not besause there was anything to take, but in order to give some idea of the bare aspect of a modern battlefield, but I am free to confess that to let go the shutter and still keep one's head bekind an ant-heap proved so difficult an operation that it was a pure matter of chance whether I photographed the ·eldt or the sky.

The incessant whistle of bullets is not good for photography, though, cuviously enough, it encourages sleep. Many men dozed off that morning under the rays of a particularly insistent sun, only to be awakened by the bursting of a big shell or the repeated reports of a most disagreeable quickfiring gun employed by the enemy with "qual impartiality against our firing tine and our hospital wagons.

All the morning the one cheering note was the incessant reports of our own field pieces and naval guns. Early in the day the two field batteries had moved round from our extreme right and came up in the center just a little to the east of the railway and did most magnificent work.

riding the Filipinos as cowardly savages, they proclaim it takes nine Americans to down one Filipino .-- Pittsburg Post. Since the cession Puerto Rico has been denied the principal markets she had long enjoyed, and our tariffs have been continued against her products as when she was under Spanish sovereignty. The markets of Spain are closed to her products except upon now imposes the same duties upon those products as from any other country entering her ports. She has, there fore, lost her free intercourse with

terms to which the commerce of all nations is subjected. The island of Cuba, which used to buy her cattle and tobacco without customs duties, Spain and Cuba without any compensating benefits in this market. coffee was little knowp and not in use by our people, and, therefore, there was no demand here for this, one of her chief products. The markets of the United States should be opened up to her products. Our plain duty is to abolish all customs tariff between the United States and Puerto Rico, and her products free access to our give markets.-McKinley's Message,

In the spring the birds are singing As they build their summer home, Blades of grass and buds are springing, O'er the mead the cattle roam. In the spring your blood is freighted With the germs that cause discase, Humors, boils, are designated Signals warning you of these In the spring that tired feeling Makes you every duty shirk, Makes you feel like begging, stealing, Rather than engage in work. But there's something known that will a Man to health and vigor lead You will find Hood's Sarsaparilla Just exactly what you need A woman may forget when her birthday ones around, but that doesn't keep the wrinkles from coming in on her face. WHAT SHALL WE HAVE FOR DESSERT?

This question arises in the family every day. Let us answer it to day. Try Jell-O, a de-licious and healthful dessert. Prepared in two minutes. No boiling ! no baking ! sim-ply add a little boiling water and set to cool. Flavors :- Lemon, orange, Raspberry and strawberry. Get a package at your grocers 4 26d 4t to-day. 16cts.
