are jeering at him, than it does for
a general, back in the rear, in a
place of safety, to tell a thousand
soldiers where and how to fight.

It isn't the material that goes into your repaired watch that results in a perfect job—it is the KNOW-HOW that does the business. Any bungler can buy the fine kinds of material that I use in repairing; but SKILL is the most valuable material that can be used in watch repairing; and the bungler can buy it. I sell my skill for what it is worth, and it will cost you less than bungling at a lower price.
