

DRAWING FOR HOMES

One Thousand Claims Awarded the First Day.

VAST CROWDS WATCH PROCEEDINGS.

Hundreds Without Food or Drink During the Entire Day—Some Valuable Prizes Drawn in the Kiowa-Comanche Country.

EL RENO, O. T., July 30.—Oklahoma's great land lottery was begun here in earnest yesterday, and when the commissioners appointed by the federal government adjourned the drawing for the day 1,000 of the choice of the 13,000 160-acre claims in the Kiowa-Comanche country had been awarded.

The first name drawn from the wheels was that of Stephen A. Holcomb of Pauls Valley, I. T., for a homestead in the El Reno district and the second Leonard Lamb of Augusta, O. T. Those two men select the two choice claims in this district. The capital prize winners, however, proved to be James R. Wood of Weatherford, O. T., whose name was the first to come from the Lawton district wheel, and Miss Mattie H. Beal of Wichita, Kan., who drew the second number in that district. They will have the privilege of making the first filings in the Lawton district and will undoubtedly choose the two quarter sections adjoining that town. These are considered the most valuable in the territory and are, it is estimated, worth from \$20,000 to \$40,000 each.

The day was one of keen excitement, replete with interesting scenes. It is estimated that fully 25,000 persons witnessed the drawing. The immense throng was wrought up to the highest pitch. The drawing of the first names was followed by a mighty shout. Each succeeding winning for a time was met with shouts of applause and merriment. All was pleasurable. Every man, though he did not draw a prize from the wheels yesterday, had steadfast faith that today or the next day will surely see him the possessor of a slip reading him a title clear to 160 acres of Oklahoma's land.

CRESCUS WORLD'S CHAMPION. All Records Broken by the Famous Trotting Stallion.

CLEVELAND, July 27.—Amid the enthusiastic cheers of nearly 10,000 people Cresceus, the world's champion trotting stallion, again demonstrated that he is the peer of all trotters by trotting a mile yesterday afternoon over the Glenview track in 2:02 1/2. This establishes a new world's trotting record for both sexes, replacing the former world's record of 2:03 1/2, held by The Abbot.

The circumstances connected with this remarkable performance were anything but conducive to fast time, as, owing to the heavy rains, the track was not in the best of condition, and it was about 6:30 p. m. before the track was deemed to be in sufficiently good shape to warrant making the attempt. At that time the sun's heat had been replaced by cool breezes.

Never once faltering notwithstanding the terrific clip, he fairly flew to the wire, being sustained only by his indomitable courage and almost human intelligence, not being touched once by the whip, his sole urging being the driver's voice and the thundering hoofs of the accompanying runners.

As the time for the mile was announced—2:02 1/2—and the immense crowd realized that a new world's record had been established Ketchum and his favorite stallion were tendered an ovation such as has been but seldom witnessed on a race track.

Cresceus now not only holds the world's trotting record for both sexes, but last week at the Detroit grand circuit by trotting in 2:00 1/2 and 2:05 in his race against Charley Herr secured the world's record for the two fastest heats ever trotted in a race, his second mile in 2:05 also being a new world's record for the fastest mile ever trotted.

Chicago Cattle Market Glutted.

CHICAGO, July 29.—The commission men and pickets at the Union stock yards during the last five or six days have taken care of \$4,000,000 worth of cattle. The animals are still coming from scorched Kansas and distant Texas and half a score of other states. The farmers are sending their stock to Chicago and are smashing all world's records and putting the stockyards people to the severest test they ever experienced. In single file, close formation, these cattle would make a line that would reach from Chicago to Bloomington, Ill. Standing upon each other's backs, they would make a tower of at least 70 miles high.

New Maine Launched.

PHILADELPHIA, July 26.—The battleship Maine, designed to be bigger, stronger and faster than her namesake, whose shapeless mass still lies in the harbor of Havana, has been launched from the yards of the William Cramp Ship and Engine Building company. The great hull's initial dip into the waters of the Delaware river was a success in every way. One of the largest crowds that have ever seen a warship leave the ways at Cramp's yard was on hand, and patriotism ran wild as the ship left her cradle.

Free Trade With Porto Rico.

WASHINGTON, July 26.—The president has issued his proclamation establishing free trade between Porto Rico and the United States and declaring the organization of a civil government for the island. The proclamation is formal, and says in the body of the resolutions adopted by the Porto Rico legislature, which have been published, does it appear that he is in a little time to free commercially in commemoration of the anniversary of the planting of the American flag on the island.

The Schley Inquiry Court.

WASHINGTON, July 26.—The secretary of the navy has announced that he court of inquiry to investigate the conduct of Rear Admiral Winfield Scott Schley will consist of Admiral George Dewey, Rear Admiral Lewis Ashford Kimberly, retired, and Rear Admiral Andrew Ellsboro Kennedy Benjamin, retired. The court, it is announced, will meet in the large reception room of the secretary of the navy's office on Sept. 12.

HORSE RUNS ERRANDS.

arrives Hall to Late Trains and Can Be Trusted to Return to His Little Stall Promptly.

Scarcely a day goes by in Ashtabula, O., but that a cream colored horse may be seen trotting along the main business streets, with a saddle on his back, but without a rider. Every now and then some one unacquainted with the animal mistakes him for a runaway, and makes a dash for the middle of the street, with outstretched arms and a loud "whoa." Then the hero of the occasion is informed that the horse is only engaged in running errands, and that he must not thus be stopped.

Dixie is a wise horse. He is owned by one of Ashtabula's business firms. He

DIXIE ON AN ERRAND.

is ten years old and weighs 900 pounds. His sole occupation is to run errands. All day long, with saddle on his back, he stands ready.

One of his duties is to carry the mails to all the south-bound mail trains. He has an open stall in the stable, and he occupies it without hitching, with the barndoor always open.

Dixie can always be trusted to return to his stall promptly when his errand is done. It matters not where the rider dismounts, even if in the heart of the business section of the city, the horse resumes his trot back to his stall without paying any attention to street cars, automobiles, threshing machines or bicycles.

Dixie is especially useful when one has but limited time to catch a train. He makes a good run to the depot with his rider, and then, when he sees that he made his train, resumes a moderate gait on his return to the barn without a rider. This knowing animal is frequently sent from the barn to his owner's home, situated some distance away. Arriving at the house Dixie waits patiently beside the door till his master comes out.

Dixie has so far played but one joke on any of his riders. One evening a young Ashtabula business man rode him into the country to call on his lady friend. Knowing Dixie's reputation of standing without hitching, he left him loose in the yard to graze. After a few hours' wait Dixie started home, unbeknown to the rider, arriving in Ashtabula several hours ahead of him.

DOG WEARS DIAMONDS.

Canine Mascot of a New Yorker's Yacht Ornamented with Earrings Worth a Fortune.

Lloyd Phoenix's little Dutch dog Skipperine, called Skip for short, is probably the first dog to boast of a \$2,000 pair of three-carat diamond earrings.

Skip has lived for seven years aboard Capt. Phoenix's smart and fast yacht Intrepid. The little black dog is not more than five inches high. Another dog named Creek also sails on the Intrepid. He is a brindle French bulldog.

Since Skip has worn the diamond earrings Creek has been so jealous

SKIP IN ALL HIS GLORY.

that he has scarcely tolerated the little Dutch dog's presence.

The Intrepid returned to Tebo's Basin, Brooklyn, the other day, after a splendid cruise, beginning at New York on April 7, to the south and Havana. During the cruise Capt. Phoenix conceived the idea of decorating the yacht's favorite mascot with valuable gems. So he pierced the little dog's ears with a gold needle and inserted a waxed silk thread. At the end of each shank is a gold screw cap, which is screwed up until it forms a clamp on the inside of the ear.

Skip did not take very kindly to his ornaments at first, but he is proud of them now.

Ideal Coal Wagon Driver.

A few years ago Lee Trickey, of Glenwood, Wis., weighed 710 pounds. Now his weight is only 360 pounds. He is a tennisman, and thinks of coming to New York to act as the driver of a coal wagon. He is content to be weighed as coal, provided he gets for salary one-half of the sum he will save for his employer.

URIBE IN COLOMBIA.

General's Friends Say He Has a Large Following.

ARMS AND AMMUNITION ABUNDANT.

Sympathizers From All Over the World Are Said to Have Contributed to Aid the Insurgent Operations.

NEW YORK, July 31.—Dr. A. J. Repp, agent here of the Colombian insurgents, and Raoul Perez, who was General Uribe Uribe's private secretary, declare, The Times says today, that the general is now in Colombia. They refused to tell just where he is, but said that they expected cable advices from him today. He will have the assistance, they say, of Generals Herrera and Marin and their armies. The latter has 3,000 men in the interior of the department of Tolima.

Senor Perez explained that in Colombia there has always been a certain degree of antagonism between the Freemasons and the clergy and that this fact was taken advantage of by the insurgent party. Sympathizers all over the world, he averred, contributed \$200,000 for munitions for General Uribe Uribe's operations. Dr. Restrepo, Senor Perez further explained, while he was in Europe bought 15,000 Mauser rifles of the most modern pattern. The doctor also bought 2,000,000 cartridges in Belgium with the funds, Uribe Uribe being in considerable need of ammunition. All this armament, Senor Perez says, was shipped months ago to Colombia in sailing vessels, labeled as potatoes and asparagus.

Still further, according to Perez, if the Liberal party, of which General Uribe Uribe is the head, succeeds in overthrowing the Conservative party's government, the French Panama Canal company will be notified that all of its concessions are void, that company having been notified some time ago that if it bought concessions when the government was willing to sell it would gain nothing if the Liberals won.

TUBERCULOSIS.

Dr. Koch's Theory Should Not Be Too Readily Accepted.

DENVER, July 31.—Dr. Charles Grosswell, chairman of the sanitary committee of the National Live Stock association, has issued a bulletin on the subject of human and bovine tuberculosis, which is of interest in connection with the theory of Dr. Koch as expressed at the international tuberculosis congress in London last week. Dr. Grosswell says:

The telegraphic report of Dr. Koch's statement that he has discovered such important differences between bovine and human tuberculosis that, in his opinion, the diseases are not intercommunicable, as was commonly supposed, is one of the most important to the cattle industry and the public, and the evidence for an against should be carefully weighed as final judgment suspended until, as Dr. Koch himself so justly recommends, a corroboration of his results has been obtained by other observers.

"Without being an alarmist I think it is necessary to sound a note of warning that conclusions so much hoped for should not too readily be accepted and that as cattlemen or dairymen we certainly must not yet congratulate ourselves that the necessity for restrictions and repressive measures against bovine tuberculosis is over nor that this disease in cattle has now no terrors for the human being."

Labor Troubles at Frisco.

SAN FRANCISCO, July 31.—Two nonunion teamsters fired into a body of strikers yesterday afternoon. One man was wounded, but not seriously. The shooters were arrested. They claim to have fired in self defense. Labor troubles in this city reached their culmination when the City Trust federation ordered a general strike on the docks of San Francisco, Oakland, Mission Rock and Port Costa, to go into effect at once. The resolution to strike, which received the unanimous endorsement of every delegate to the federation, was short, but its effect will be to cause a temporary paralysis of the shipping business of San Francisco such as has not been known before.

Mrs. Nation Pardoned.

TOPEKA, July 31.—Mrs. Carrie Nation, who is serving a sentence in the county jail for "joint smashing," has been pardoned by Governor Stanley. She would not at first accept the pardon because the fine and costs were not remitted, but afterward decided to do so. The county commissioners will allow her to pay the fine and costs, amounting to \$150, in installments of \$5 a month.

Kentucky Gets Rain.

LOUISVILLE, July 31.—The drought in Kentucky has been broken. There were heavy rainfalls in Frankfort, Owensville, Danville, Paducah, Shelbyville, Paris, Carlisle, Lancaster, Nicholasville, Burgin, Versailles and Hopkinsville. In many of these sections the rain was too late for early corn, but it will be of great value to tobacco and other late crops.

American Girl Passed at Berlin.

BERLIN, July 27.—Miss Mary Montgomery of New Haven has passed the doctor's examination in the University of Berlin.

THE SNOB IN SOCIETY.

American Said to Be a Different Creature from His British Cousin.

The accepted definition of a "snob," together with its attendant adjective, "snobbish," is not the same in America as in England. On the other side it means social pretense of some kind, and Thackeray has shown under that head what a great variety of the species there is. But with us it does not necessarily include pretense. When we call a person a snob the idea is intended to be conveyed is that he or she is ultra exclusive and wishes to associate only with persons who are considered very smart. In fact, to be "smart," a person must necessarily be somewhat snobbish, according to the American exclusiveness is even more necessary than in places where the lines are defined by rank, says the New York Tribune. The so-called Four Hundred is, as everyone knows, divided up into any number of sets and cliques, but, nevertheless, despite assertions to the contrary, there is always one set that is fashionable paramount. That is to say, invitations from its leaders are more prized than any others, and to be admitted within its limits is a coveted honor. And here we come back to our accepted definition of the word "snob." People who make an effort to get into this society, and by so doing overlook and neglect old friends, are termed snobbish, while the members themselves, who have no desire to enlarge their small coterie, or to hide their indifference to the world at large, come under the same classification. Thackeray's people, with their miserable little attempts to sell themselves off for other than they are (and we safely assert that there are more of that ilk in England than in America), we could call eads—so that the use of either term by an American does not necessarily convey the same idea as when spoken by an Englishman.

WARNED BY HIS SOUP.

Queer Yarn of How an English Broker Saved His Fortune in Wall Street.

Vermicelli cut into little letters is a thing commonly found in modern soup. But it is not often that it saves a man from financial disaster, as it did in the following case: An American visiting England was dining in London the other day during the height of the Wall street boom, says the London Daily News.

The talk turned on that subject, and the American, who had bought largely at high figures, maintained against the general opinion that the great prices rested on a solid business basis. Suddenly he saw in the spoonful of soup which he was raising to his lips four letters, forming the word "Sell." Somewhat shaken by this, for he was a man of a superstitious turn of mind, he went on with his soup in a troubled mood, until only six of the small white capitals remained floating in his plate. They spelled the word "Unload." Hastily rising he excused himself upon a plea of indisposition, and took a cab to the nearest open telegraph office. He cabled to his broker, ordering the immediate sale of all he held in railways. As New York time is five hours behind our own, the thing was done before the market closed. The next day the panic began. He had got out at the top of the market.

FLIRTING WITH FACTS.

Illustrative Instances of the Way the Daily Press Gets Things Twisted.

Some funny things concerning the paper trade appear in the daily papers now and then. For example, a New York paper stated recently that the ground wood pulp mill at Sault Ste. Marie has a daily capacity of 125,000 tons, and that a sulphite mill of a daily capacity of 75,000 tons is very near completion.

Another daily paper tells of watches, chains and all sorts of jewelry having been picked out of the beating engine of a mill at St. Joseph, Mich., and says that once every week, when the beater is cleaned, the employes of the mill plunge head-first into it in search of valuables, says the Paper Mill.

The impression is conveyed that a handful of jewelry is fished out on every occasion.

In the field of daily newspaper work it is really wonderful that the mistakes made are so few. But such mistakes as these are not excusable.

A second's consideration would show their improbability, not to say the impossibility, and so prevent the dissemination of misinformation.

Laugh Heartily and Live Long.

The disconcerted worries of a morose person may very likely shorten his days, and the general justice of nature's arrangement provides that his early departure should entail no long regrets, says a British medical journal. On the other hand, the man who can laugh keeps his health. To be perfectly healthy laughter comes often. Too commonly, though, as childhood is left behind, the habit falls, and a half smile is the best that visits the thought-lined mouth of a modern man or woman. People become more and more burdened with the accumulations of knowledge and with the weighing responsibilities of life, but they should still spare time to laugh.

Naval Station in Hawaii.

Pearl Harbor, Hawaii, will be the site of one of the most important of the American naval stations on the Pacific. Large machine shops and a dry dock will be built, and a first-class repair station for warships will be established.

"Have by some surgeon Shylock on thy charge to stop his wounds lest he do bleed to death." People can bleed to death. The loss of blood weakens the body. It must follow that gain of blood gives the body strength. The strengthening effect of Dr. Pierce's Golden Medical Discovery is in large part due to its action on the blood-making glands and the increased supply of pure, rich blood it produces. It is only when the blood is impoverished and impure that disease finds a soil in which to root. The "Discovery" purifies the blood and makes it antagonistic to disease. When the body is emaciated, the lungs are weak, and there is obstinate lingering cough, "Golden Medical Discovery" purifies the blood on a fighting footing against disease, and so increases the vitality that disease is thrown off, and physical health perfectly and permanently restored. It has cured thousands who were hopeless and helpless, and who had tried all other means of cure without avail. Twenty-one one-cent stamps to cover expense of mailing only will obtain a copy of Dr. Pierce's Common Sense Medical Adviser, 1008 pages, in paper cover. Send 31 stamps if cloth binding is preferred. Address Dr. R. V. Pierce, Buffalo, N. Y.

CASTORIA. The Kind You Have Always Bought. Bears the Signature of J. C. Ayer & Co., Lowell, Mass.

"Actions speak louder than words, you know." "Yes; they have to, to be heard above the hoisting."

Evidently no effort has been spared to make the "Ladies' Home Journal" for August a positive boon to its readers during these warm midsummer days. Its light, readable articles, bright stories, clever poems, charming music, and numerous beautiful illustrations afford the easiest and pleasantest kind of entertainment for leisure hours. Enchanting views of the lovely scenery in the Engadine Valley and among the Swiss and Italian lakes, as well as such delightful articles as "The Singing Village of Germany," and "What girl life in Italy Means," allure the thoughts to foreign lands, while there are timely suggestions about "The Picnic Basket," "Keeping a House Cool in the Dog-Days," and "Sea-Side Toys and How to Make Them." Other thoroughly interesting contributions are "The First White Baby Born in the Northwest," "My Boarding School for Girls," and the usual serial and department articles. By The Curtis Publishing Co., Philadelphia. One dollar a year; ten cents a copy.
